In a warm, perceptive essay that touches on economics, fashion, literature, and politics, the Strega Prize-winning author of *Story of My People* reflects on the seismic shifts of 2020 and the diverse ways we're adapting. Attempting to make sense of the incredible upheaval of 2020—from the devastating impact of COVID-19 to the sudden loss of his father—Edoardo Nesi considers the changing global economy and its effect on our lives. He shares the stories of Alberto Magelli, a small textile entrepreneur; Livia Firth, a prominent advocate for sustainability; Elisa Martelli, a young Sangiovese winemaker; Enrico Giovannini, a leading economist and statistician; Rino Pratesi, a proud butcher from the heart of Tuscany; and more. From the overworked to the unemployed, we're all grappling with difficult questions about our current disorienting world: Will we ever feel healthy again, and what will it take to regain "normality?" What does progress mean today? Have science and technology let us down? What will the increased prevalence of remote working mean for our cities, and for our lifestyles generally? Deftly weaving together the personal and the economic, Nesi takes us on a fascinating journey to understanding.

Beyond Audubon: A quirky, "lively and illuminating" account of bird-watching's history, including "rivalries, controversies, [and] bad behavior" (The Washington Post Book World). From the moment Europeans arrived in North America, they were awestruck by a continent awash with birds—great flocks of wild pigeons, prairies teeming with grouse, woodlands alive with brilliantly colored songbirds. Of a Feather traces the colorful origins of American birding: the frontier ornithologists who collected eggs between border skirmishes; the society matrons who organized the first effective conservation movement; and the luminaries with checkered pasts, such as Alexander Wilson (a convicted blackmailer) and the endlessly self-mythologizing John James Audubon. Naturalist Scott Weidensaul also recounts the explosive growth of modern birding that began when an awkward schoolteacher named Roger Tory Peterson published *A Field Guide to the Birds* in 1934. Today, birding counts iPod-wearing teens and obsessive "listers" among its tens of millions of participants, making what was once an eccentric hobby into something so completely mainstream it's now (almost) cool. This compulsively readable popular history will surely find a roost on every birder's shelf. "Weidensaul is a charming guide. . . . You don't have to be a birder to enjoy this look at one of today's fastest-growing (and increasingly competitive) hobbies." —The Arizona Republic

Prompted by the success of the MX-5 the SLK was based on a shortened C-class platform designed to include the Vario retractable steel roof and shown as a concept car in 1994. Full production began two years later but the UK only got the flagship model with a 193bhp, 2.3-litre supercharged engine with automatic gearbox. It was not until 2000 that the 3.2 litre V6 engine mated to a six-speed manual gearbox. became available. With this came body styling changes. The CLK was also

based on the C-class platform but came with four seats and looked very similar to the E-class. It quickly went from the 2.3 to the 3.2 engine. Then came a cabriolet version.
