The great thing about drifting, thinks Kekoa, is that it's more about skill than expensive parts. That's good for him. Since his mom left him on the is-

land with his grandma, his Nissan Skyline 350 is all he has to his name. Life is the opposite for Billy Cain, who can buy his way into or out of anything. But when Billy's antics threaten the few things Kekoa cares about, they'll put it to the test: does skill or money win out when it comes to wheels, winding mountain roads, honor, and love? Includes real tech specs and tuning details for the Nissan Skyline 350!

"Since its earliest days, flight has been about pushing the limits of technology and, in many cases, pushing the limits of human endurance. The human body can be the limiting factor in the design of aircraft and spacecraft. Humans cannot survive unaided at high altitudes. There have been a number of books written on the subject of spacesuits, but the literature on the high-altitude pressure suits is lacking. This volume provides a high-level summary of the technological development and operational use of partial- and full-pressure suits, from the earliest models to the current high altitude, full-pressure suits used for modern aviation, as well as those that were used for launch and entry on the Space Shuttle. The

goal of this work is to provide a resource on the technology for suits designed to keep humans alive at the edge of space."--NTRS Web site.

Covering all the essentials of turbine aircraft, this guide will prepare readers for a turbine aircraft interview, commuter ground school, or a new jet job.

'Since its first auto test fifty years ago, Consumer Reports has become the No. 1 source that car buyers turn to when buying a new or used vehicle.' -USA Today Consumer Reports is the definitive authority on unbiased automotive ratings. As stated in USA Today, 'more than 40% of car shoppers use Consumer Reports for information.....That makes Consumer Reports the biggest single source of information car buyers use.' This latest edition of the New Car Buying Guide provides information on more than 210 new car models available in the 2005 car year. This essential guide offers all the tools necessary to negotiate the best price for the best car, including: - The most comprehensive reliability ratings available, based on Consumer Reports' Annual Questionnaire - Five steps to getting the best price - Profiles on more than 220

cars, SUVs, minivans, and recommended vehicles in 15 categories - Crash-test results and key safety features - A guide to auto information on the Internet.

As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Bewary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz - rich cars, poor quality. There's only one Saturn you should buy. Toyota - enough apologies: "when you mess up, 'fess up."

Your first Business Process Management (BPM) project is a crucial first step on your BPM journey. It is important to begin this journey with a philosophy of change that allows you to avoid common pitfalls that lead to failed

BPM projects, and ultimately, poor BPM adoption. This IBM® Redbooks® publication describes the methodology and best practices that lead to a successful project and how to use that success to scale to enterprise-wide BPM adoption. This updated edition contains a new chapter on planning a BPM project. The intended audience for this book includes all people who participate in the discovery, planning, delivery, deployment, and continuous improvement activities for a business process. These roles include process owners, process participants, subject matter experts (SMEs) from the operational business, and technologists responsible for delivery, including BPM analysts, BPM solution architects, BPM administrators, and BPM developers.

This definitive guide includes exclusive discount price lists and "low prices" to help shoppers negotiate with salespeople; specifications for all body styles, horsepower ratings, and EPA fuel economy ratings; rating charts that assess each car line in 16 categories covering performance, accommodations, workmanship, and value. Over 125 photographs.

The photos in this edition are black and white. Mitsubishi's 4G63t engine is among the most powerful engines ever in the sport-compact world. It's not uncommon to find one of these four-cylinder, iron-block, aluminum-headed, 2-liter turbocharged monsters making more than 1,000 horsepower with the right modifications and tuning - well above the 200-300 hp produced in the factory-made engines. Bolted into such cars as the Mitsubishi Lancer Evolution, Eclipse, and Galant, and the Eagle Talon and Plymouth Laser, the 4G63t has more than a cult following among sport-compact enthusiasts, who know and respect this engine's immense performance potential at the track or on the street. Up until now, in-depth performance information on the 4G63t has been hard to find. For this book, author Robert Bowen went straight to the source, Robert Garcia of Road/Race Engineering in Santa Fe Springs, California. RRE is the most well-known and respected Mitsubishi turbo performance shop in the United States, and Garcia is its in-house engine builder. Mitsubishi enthusiasts will benefit from Garcia's expertise and be able to

build better, stronger engines than ever before. "How to Build Max-Performance Mitsubishi 4G63t Engines" covers every system and component of the engine, including the turbocharger system and engine management. More than just a collection of tips and tricks, this book includes a complete history of the engine and its evolution, an identification guide, and advice for choosing engine components and other parts. Profiles of successful built-up engines show the reader examples of what works, and the book includes helpful guidance for choosing your own engine building path.

An icon of World War I aerial combat, the Sopwith Camel was a superb dogfighter in the hands of a pilot who could master its vicious idiosyncrasies. The first British fighter to be armed with twin machine guns, the Camel packed a considerable punch and was highly successful, notching up a considerable number of aerial victories. The Camel was a remarkable aircraft, and one that could perform in a variety of roles, including as a ground strafing, a night fighter and a carrier-based fighter. As newer, higher performance aircraft types were introduced and began to eclipse it, the dominance of the Camel declined and losses mounted. Nevertheless, Camels appeared over battlefields throughout the war and beyond, notably in the Russian Civil War.

In today's uncertain economy, more car buyers are turning to the used car market. Based on the results of unbiased tests and surveys conducted by Consumer Reports, the

guide evaluates fuel economy, performance level, repair record, and overall quality of hundreds of 1984-1989 cars, with detailed reports on 1987-1989 models. Ratings charts, tables, index.

The term big data refers to extremely large sets of data that are analyzed to reveal insights, such as patterns, trends, and associations. The algorithms that analyze this data to provide these insights must extract value from a wide range of data sources, including business data and live, streaming, social media data. However, the real value of these insights comes from their timeliness. Rapid delivery of insights enables anyone (not only data scientists) to make effective decisions, applying deep intelligence to every enterprise application. Apache Spark is an integrated analytics framework and runtime to accelerate and simplify algorithm development, deployment, and realization of business insight from analytics. Apache Spark on IBM® z/OS® puts the open source engine, augmented with unique differentiated features, built specifically for data science, where big data resides. This IBM Redbooks® publication describes the instal-

lation and configuration of IBM z/OS Platform for Apache Spark for field teams and clients. Additionally, it includes examples of business analytics scenarios.

Phil Edmonston, Canada's automotive "Dr. Phil,"

pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade ago You can save \$2,000 by cutting freight fees and "administrative" charges Diesel annual urea fill-up scams cost you \$300, including an \$80 "handling" charge for \$25 worth of urea Lemon-Aid's 2011-12 Endangered Spe-
