Accounting for churches is not the same as accounting for businesses. A church bookkeeper must be aware of the special tax codes that govern the church's unique tax standing. But it is often hard for overworked or volunteer administrators to know every aspect of tax code that affects their church's ability to accept donations, oversee a benevolence fund, and offer a compensation package for their minister. Lisa London, The Accountant Beside You who brought you QuickBooks for Churches & QuickBooks for Non-profits, explains the specialized needs of church accounting in an easy--

to-understand manner for church administrators and volunteers. A CPA with decades of experience working with businesses as well as churches and other nonprofits, Lisa explains complex concepts in a reader-friendly, engaging manner. She is joined by Vickey Boatright, an accountant who runs THE online site for all things church accounting, www.freechurchaccounting.com. Together, Lisa and Vickey guide you through every essential aspect of church accounting. Church Accounting: The How-To Guide for Small & Growing Churches is a must-have reference for all the nuts and bolts of church accounting no matter what your accounting system. Lisa and Vickey

help you set up accounting spreadsheets and explain the different types of accounting packages. If you are already using QuickBooks, it is also a perfect compliment to QuickBooks for Churches and Other Religious Organizations. Accounting Principles Accounting is about so much more than crunching numbers. Accounting impacts the lives of everyone, from the average person who does a budget every month to CEOs looking for the best way to invest in their business. It is a truly useful skill that benefits anyone who learns it. But, why is accounting so important? Established accounting principles make it possible for financial entities to communicate in-

formation. Homeowners and taxpayers can also use it when budgeting for the year, either to determine their own personal net worth or for financial planning. It is important that people in many job positions be familiar with reading and understanding financial reports. From business owners to CEOs to marketing managers and banking officials, there are many people whose jobs can benefit from learning accounting. Many people lead busy lives once they start their career and you may not have time to go back to college or hundreds (or thousands) of dollars to spend on an accounting class. This book is designed for those people, as well as for students that may need a little more help to understand their accounting class. One of the biggest obstacles to overcome in accounting is understanding the terminology. This book will break down important terms and principles in a way that is easy for the average person to understand. As you read about the principles of accounting, you'll find clear examples that will help you apply the principles to accounting work, whether preparing statements or interpreting. Finally, we'll

discuss how you can use the principles you've learned about to prepare financial statements, complete the accounting cycle and determine ratios that will tell you more about what is going on with a business. Though we'll focus heavily on the principles, this book is the perfect starter's guide to learning everything you need to enter the field of accounting. Complete with detailed examples and information, you'll be an expert in no time. Thank you for downloading and happy reading!

Introduction to Financial Accounting
This textbook, originally by D. Annand and H. Dauderis, was intended for a first course in introductory financial accounting. It focuses on core introductory financial accounting topics that match pre-requisite requirements for students advancing to Intermediate Financial Accounting. A corporate approach is utilized versus beginning with a sole proprietorship emphasis and then converting to a corporate approach; this consistency throughout the book reduces confusion for the introductory student. This most recent revision by D. Marchand converted the text from IFRS to reflect the Generally Accepted Accounting Principles of the United States (U.S. GAAP).
