The company's main goal is the client's satisfaction, our architectural model makers handle a great deal of responsibility and discipline which always result in on-time delivery of our architectural scale models, renderings & designs.

Architectural Scale Models by Frank Whittock & Associates

Architectural models bring a building down to a small scale for studying, to mock up, or to display. They can be especially useful for examing a building in all directions in a small environment, to catch any designs that might be unappealing once applied to a full scale building. Or envision changes, where it's more economical to use a model.

Architectural Model Making—The Guide—First In Architecture

The architectural model is a tool often used to express a building design or masterplan. The model represents architectural ideas, and can be used at all stages of design. An architectural model shows the scale and physical presence of a proposed design. The model is a 3 dimensional replica or expression of the design, usually at a scale much smaller than full size.
