A smart Business Continuity Manager works hand-in-hand with their FM team to help construct both their high-level strategy and their Incident Management plans. Just like the technical support provided by IT, FM possesses a set of skills and an abundance of knowledge that BC Managers can leverage both before and during a disruption.

"The most effective business continuity plans have four components: business recovery, IT disaster recovery, supplier risk management, and emergency management," said Griffin. "Implemented unilaterally, these contingency measures can not only prevent a crisis, but actively sow the seeds of recovery - ensuring resources are managed efficiently to support rebuilding efforts going forward.
