OphthoBook is the printed version of the amazing OphthoBook.com online book and video series. The combination of this text, along with the online video lectures, creates the most informative and easy-to-understand ophthalmology review ever written. It is geared toward medical students, optometry students, and non-ophthalmologists who want to learn more about the eye without getting bogged down with mindless detail. The book is broken down into ten chapters: 1. Eye History 2. Anatomy 3. Glaucoma 4. Retina 5. Infection 6. Neuroophthalmology 7. Pediatric Ophthalmology 8. Trauma 9. Optics 10. Lens and Cataract Each chapter also includes "pimp questions" you might be asked in a clinic. Also, an entire chapter of ophthalmology board-review questions, flashcards, and eye abbreviations. Perhaps most useful, each chapter corresponds to the 20-minute video lectures viewable at OphthoBook.com. And lots of fun cartoons!

A compilation of tidbits and factoids to assist in preparation for JCAHPO testing at COA, COT, and COMT levels. I've had at least a dozen people in the last couple months ask for copies of my self-compiled notes I used for studying for (and passing!) the JCAHPO COA, COT, and COMT tests. Typically when someone asks, I gladly and dutifully run out to Kinko's, copy and print the files, and sometimes have them spiral bound for ease of use as well, and then am reimbursed for the cost. I've finally decided to streamline the process and get out of the middle of it, AND produce a nicer looking product (and save gas money and time in front of the printer, lol!) The factoids are compiled from a multitude of resources through the years and started geared towards the COA. It was then added to and grown as I studied for the COT and COMT exams. I've found that different resources sometimes contradict one another, so occasionally you'll find some contradictions in the notes as well.

The principal purpose of this study guide is to assist you in preparing to take the Certified Ophthalmic Technician (COT®) examination. This guide will help build on what you have already learned, aid you in identifying where you need to focus your study time, identify areas where you feel less confident, and help you study more effectively. While this study guide cannot give you the questions and answers for the examination, it does provide you with the knowledge and content areas for the examination, describes study methods that have worked for other COTs, and offers you a self-assessment of sample items and a practice examination so you will have a better idea of what to expect when you take the actual examination. Also included are the Quick Study Cards to help you prepare for IJCAHPO's certification examinations. These flashcards assist in preparation for the COT exam. The questions highlighted on the Quick Study Cards will help you prepare for each examination content area.

About the Author After graduating with a Bachelor of Science in Biology from the University of North Carolina at Chapel Hill and prior to enrolling in medical school, my job search brought me back home to Atlanta where I accepted a position as an Ophthalmic Medical Scribe. I had no prior experience as a scribe or in the healthcare field, but I knew that quickly improving my understanding of ophthalmology would be essential for my success. I searched the web to obtain every piece of relevant ophthalmology information that I could find, and I spent hours experimenting with the functionalities of the eye clinic's electronic medical record to better prepare myself for my new role. However, I found that it took a significant amount of time and effort to sift through the excessive online information before I was able to hone in on the relevant material. Due to the lack of designated ophthalmic medical scribe training resources and the vast amount of irrelevant information online, I decided that the creation of The Ophthalmic Scribe Manual was warranted. With over 3 years of scribing experience and over 20,000 patient encounters, as well as having published a variety of first author case reports and review articles in prominent ophthalmic medical journals, I am confident that my experiences will offer an immediate benefit to those seeking to excel in this rewarding profession.

Review "Very well-written! This looks terrific and will be great for widespread use particularly in training programs, especially with the growing need for trained ophthalmic personnel." The Ophthalmic Assistant Mosby Elsevier Health Science This is a thorough reference guide for the ophthalmic office.

Background is provided on ophthalmic disease, surgical procedures and instrumentation, and practical technical information on the tasks performed by the ophthalmic assistant is given.

Lippincott Williams and Wilkins' Comprehensive Medical Assisting We're pleased to introduce the fourth edition of Lippincott Williams & Wilkins' Comprehensive Medical Assisting, the medical assisting text designed to meet your challenges. This dynamic package of text and resources represent more than just a textbook, instead providing a suite of learning resources. This is the one text aimed at making sure that every graduate can quickly change their cap and gown for a set of scrubs and immediately be a vital member of the medical office. We do this by: Providing the content in an engaging style that speaks to students. Putting pedagogy to work in the text through key features like patient education boxes, competency checklists, procedure boxes, etc. Placing students in the real environment in through our web-based EMR and PMS software package. Showing what we teach through skills videos that demonstrate the procedures and skills described. Constantly reinforcing the learning through additional online ancillaries including animations, ESL resources, etc. Helping instructors lessen planning time, with robust instructor resources. A competency spreadsheet helps faculty members and students track their progress through the material. New content in the fourth edition focuses on addressing crucial changes in policy and technology. Without changing the engaging writing style we're known for, we've made sure that the content is up-to-date and in-line with the needs of the market. We've added content on emergency preparedness, a crucial topic in today's medical office. In addition, instructors will be happy to find the latest CAAHEP and ABHES competencies clearly addressed throughout the text.

The validation of analytical methods and the calibration of equipment are important aspects of quality assurance in the laboratory. This manual deals with both of these within the context of testing of illicit drugs in seized materials and biological specimens. It provides an introduction and practical guidance to national authorities and analysts in the implementation of method validation and verification, and also in the calibration/performance verification of laboratory instrumentation and equipment within their existing internal quality assurance programmes. The procedures described represent a synthesis of the experience of scientists from several reputable laboratories around the world.

For those who are new to the subject, ocular pharmacology can be a difficult and sometimes overwhelming topic. Ophthalmic Medications and Pharmacology, Second Edition is a reader-friendly guide that provides a quick review and basic clinical reference of ocular pharmacology. In this updated and revised second edition, Drs. Duvall and Kershner present an overview to the medication and drugs found most commonly in ophthalmic practice without overwhelming those professionals new to the subject. Ophthalmic Medications and Pharmacology concisely reviews commonly used and prescribed medications, how they work, dosage, therapeutic use, and potential side effects. This new edition also highlights key information for patients about the medications they encounter and are prescribed in the clinic. Ophthalmic staff, students, and research professionals looking for an introduction and basic go-to guide will welcome having a copy of Ophthalmic Medications and Pharmacology by their side. New to this edition: An appendix focused on the drug approval process. A chapter on retinal therapies. Study icons to assist in the learning process. New coverage of vasoconstrictors.

Ophthalmic Nursing provides an overview for those just setting out in a role within ophthalmic nursing. It includes basic and comprehensible anatomy and physiology – the foundations for understanding how the eye functions and why and how problems occur – and relates them to the care and needs of the patient. This accessible text includes evidence-based procedure guidelines and the inclusion of reflective activities in most chapters allows readers to apply their knowledge to the realities of the care setting. Also covered are the most recent National Institute for Health and Care Excellence (NICE) guidelines for glaucoma and age-related macular degeneration. Since the publication of the fourth edition, there have been many advances in the care and management of the ophthalmic patient. The authors have updated the chapters

accordingly and included new colour images and diagrams. References, further reading and websites have also been updated to reflect current trends. A valuable resource for nurses in practice and training, this book continues to be the 'go-to' source for those caring for the ophthalmic patient.

Product Description The Ophthalmic Scribe Manual is the ultimate how-to manual for learning to scribe in ophthalmology. If you're interested in learning more about scribing in retina, cornea, comprehensive, glaucoma, or oculoplastics, this manual has you covered. Inside, you will find over 100 full-color figures and tables illustrating the most important concepts, Anatomy & Physiology, organized high-yield abbreviations, must know medications, must know imaging modalities, and high-yield specialty-specific pathology. About the Author After graduating with a Bachelor of Science in Biology from the University of North Carolina at Chapel Hill and prior to enrolling in medical school, my job search brought me back home to Atlanta where I accepted a position as an Ophthalmic Medical Scribe. I had no prior experience as a scribe or in the healthcare field, but I knew that quickly improving my understanding of ophthalmology would be essential for my success. I searched the web to obtain every piece of relevant ophthalmology information that I could find, and I spent hours experimenting with the functionalities of the eye clinic's electronic medical record to better prepare myself for my new role. However, I found that it took a significant amount of time and effort to sift through the excessive online information before I was able to hone in on the relevant material. Due to the lack of designated ophthalmic medical scribe training resources and the vast amount of irrelevant information online, I decided that the creation of The Ophthalmic Scribe Manual was warranted. With over 3 years of scribing experience and over 20,000 patient encounters, as well as having published a variety of first author case reports and review articles in prominent ophthalmic medical journals, I am confident that my experiences will offer an immediate benefit to those seeking to excel in this rewarding profession. Review "Very well-written! This looks terrific and will be great for widespread use particularly in training programs, especially with the growing need for trained ophthalmic personnel."

Leading academic and pharmaceutical researchers and clinicians from many disciplines synthesize and summarize current clinical and basic knowledge concerning abnormal growth of blood vessels in the eye, the cause of major neovascular eye diseases. The authors also identify and assess the most promising approaches with potential for commercial exploitation and discuss the challenges encountered in developing therapeutics for ocular neovascular diseases. Highlights include illuminating chapters on gene therapy and novel drug delivery systems and excellent summaries of the newest therapeutic approaches.

We're pleased to introduce the fourth edition of Lippincott Williams & Wilkins' Comprehensive Medical Assisting, the medical as-

sisting text designed to meet your challenges. This dynamic package of text and resources represent more than just a textbook, instead providing a suite of learning resources. This is the one text aimed at making sure that every graduate can quickly change their cap and gown for a set of scrubs and immediately be a vital member of the medical office. We do this by: Providing the content in an engaging style that speaks to students. Putting pedagogy to work in the text through key features like patient education boxes, competency checklists, procedure boxes, etc. Placing students in the real environment in through our web-based EMR and PMS software package. Showing what we teach through skills videos that demonstrate the procedures and skills described. Constantly reinforcing the learning through additional online ancillaries including animations, ESL resources, etc. Helping instructors lessen planning time, with robust instructor resources. A competency spreadsheet helps faculty members and students track their progress through the material. New content in the fourth edition focuses on addressing crucial changes in policy and technology. Without changing the engaging writing style we're known for, we've made sure that the content is up-to-date and in-line with the needs of the market. We've added content on emergency preparedness, a crucial topic in today's medical office. In addition, instructors will be happy to find the latest CAAHEP and ABHES competencies clearly addressed throughout the text.

The Basic Bookshelf for Eyecare Professionals is a series that provides fundamental and advanced material with a clinical approach to clinicians and students. A special effort was made to include information needed for the certification exams in ophthalmic and optometric assisting, as well as for surgical assistants, opticians, plus low vision, and contact lens examiners. This book contains basic guidelines and typical scenarios that the ophthalmic surgical assistant needs to know. The text begins with the operative patient, including preoperative testing and consents, and travels through the operating room experience. Topics include gowning and gloving, preparing trays and tables, and sterilization techniques. Detailed descriptions of common operative procedures such as plastics, cataract, corneal, and retinal procedures are also included. Operative notes are written on a minute-by-minute basis so the reader can become familiar with the instruments and other implements, and the order in which they are used. This text will help prepare the ophthalmic assistant for any setting, whether it be hospital or office based.
