For Viewers of the TNT Series I Am the Night and Fans of the Root of Evil Podcast, the Bestselling Book That Revealed the Shocking Identity of the Black Dahlia Killer and the Police Corruption That Concealed It for So Long A New York Times Bestseller An International Bestseller A New York Times Notable Book An Edgar Award Finalist In 1947, the brutal, sadistic murder of a beautiful young woman named Elizabeth Short led to the largest manhunt in LA history. The killer teased and taunted the police and public for weeks, but his identity stayed a mystery, and the murder remained the most tantalizing unsolved case of the last century, until this book revealed the bizarre solution. Steve Hodel, a retired LAPD detective who was a private investigator, took up the case, reviewing the original evidence and records as well as those of a separate grand jury investigation into a series of murders of single women in LA at the time. The prime suspect had in fact been identified, but never indicted. Why? And who was he? In an account that partakes both of LA Confidential and Zodiac, for the corruption it exposes and the insight it offers into a serial killer's mind, Hodel demonstrates that there was a massive police cover-up. Even more shocking, he proves that the murderer, a true-life Jekyll and Hyde who was a highly respected member of society by day and a psychopathic killer by night, was his own father. This edition of the book includes new findings and photographs added after the original publication, together with a new postscript by the author. The Last Gasp takes us to the dark side of human history in the first full chronicle of the gas chamber in the United States. In page-turning detail, award-winning writer Scott Christianson tells a dreadful story that is full of surprising and provocative new findings. First constructed in Nevada in 1924, the gas chamber, a method of killing sealed off and removed from the sight and hearing of witnesses, was originally touted as a "humane" method of execution. Delving into science, war, industry, medicine, law, and politics, Christianson overturns this mythology for good. He exposes the sinister links between corporations looking for profit, the military, and the first uses of the gas chamber after World War I. He explores little-known connections between the gas chamber and the eugenics movement. Perhaps most controversially, he has unearthed new evidence about American and German collaboration in the production and lethal use of hydrogen cyanide and about Hitler's adoption of gas chamber technology developed in the United States. More than a book about the death penalty, this compelling history ultimately reveals much about America's values and power structures in the twentieth century.

Collects stories of escapes from kidnappers, jails, natural disasters, oppressive regimes, man-made disasters, and military prisons.

Provides a counter argument to "Silent Spring" in this study into the effects, uses, control and research of agricultural pesticides. The author takes the position that it is necessary to protect against insect borne diseases and that there is a need for a bountiful supply of good food.

For her honeymoon, a former Peace Corps volunteer takes her husband to Ecuador to revisit old haunts. They get caught up in the violent politics of the rainforest where a multinational company is exterminating Indian tribes.

The effects of those years continue to be felt as the state's three-strikes law and expanding prison-construction program spark heated arguments over rehabilitation and punishment. Known as the Red Light Bandit, Chessman allegedly stalked lovers' lanes in Los Angeles. Eventually convicted of rape and kidnapping, he was sentenced to death in 1948. In prison he gained significant notoriety as a writer, beginning with his autobiographical Cell 2455 Death Row (1954). In the following years Chessman presented himself not only as an innocent man but also as one rehabilitated from his prior life of crime. He acquired an enthusiastic audience among leading criminologists, liberal intellectuals, and ordinary citizens, many of whom engaged in protests to halt Chessman's execution. Hamm analyzes how Chessman convinced thousands of Californians to support him, and why Governor Edmund G. (Pat) Brown, who opposed the death penalty, allowed the execution to go forward. He also demonstrates the intrinsic limits of the popular commitment to the rehabilitative ideal. Rebel and a Cause places the Chessman case in a broad cultural and historical context, relating it to histories of prison reform, the anti-death penalty movement, the popularization of psychology, and the successive rise and decline of the New Left and the more enduring rise of the New Right.-Mainliner DenverThe Bombing of Flight 629Big Earth Publishing"Join author and researcher Andrew J. Field as he explores aviation and legal history, unraveling the mystery behind the bombing of the "Mainliner Denver." In an absorbing, investigative style, Field recounts the mid-twentieth century's golden age of flight, painting a picture of the aviation world leading up to and following this incredible story. Detailing the changes in aviation security policy that occurred as a result of this incident, and the birth of televised courtroom proceedings that took place at the trial of the bomber, Field describes the comprehensive FBI investigation and highly-publicized courtroom drama that revealed the calculating perpetrator behind it all: a young man who (Jack Graham), in his obsession to murder his mother, killed her and all forty-three of the other people who were traveling aboard the "Mainliner Denver" on that fateful night fifty years ago"--From publisher's website.Legal Executions in New EnglandA Comprehensive Reference, 1623-1960McFarlandBetween 1623 and 1960 (the date of the last execution as of 1999), Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island and Vermont legally put to death more than 700 men and women for a wide variety of capital crimes ranging from army desertion to murder. How an advertisement erected in 1923, touting the real estate development Hollywoodland, took on a life of its own is a

story worthy of a movie itself. Leo Braudy traces the remarkable life of this distinctly American landmark, which has been saved over the years by a various fans and supporters, among them Alice Cooper and Hugh Hefner, who spearheaded its reconstruction in the 1970s. He also uses the sign's history to offer an intriguing look at the rise of the film business from its earliest, silent days through the development of the studio system that helped define modern Hollywood. Mixing social history, urban studies, literature, and film, along with forays into such topics as the lure of Hollywood for utopian communities and the development of domestic architecture in Los Angeles, The Hollywood Sign is a fascinating account of how a temporary structure has become a permanent icon of American culture. “An entertaining tale.”—The Washington PostMiracle DogHow Quentin Survived the Gas Chamber to Speak for Animals on Death RowAlpine Publications IncorporatedA miraculous, funny, eye-opening and inspirational story for all animal lovers. Nalle had been aided in his initial escape from slavery by the Underground Railroad, captured, and then forcibly freed by Harriet Tubman and others in New York in 1860. It's a well-written, well-researched story that says as much about the tormented race relations in slavery-era America as it does about the men and women who helped him. Based upon interviews with more than 200 people and reviews of hundreds internal case files, court records, smoking-gun memoranda, and other documents, Scott Christianson gets inside the legal cases, revealing the mistakes, abuses, and underlying factors that led to miscarriages of justice, while also describing how determined prisoners, post-conviction attorneys, advocates, and journalists struggle against tremendous odds to try to win their exonerations. The result is a powerful work that recounts the human costs of a criminal justice system gone awry, and shows us how wrongful convictions can—and do—happen everywhere.With Liberty for Some500 Years of Imprisonment in AmericaUPNEFrom Columbus' voyages to the New World through today's prison expansion movements, incarceration has played an impor-

tant, yet disconcerting, role in American history. In this sweeping examination of imprisonment in the United States over five centuries, Scott Christianson exposes the hidden record of the nation's prison heritage, illuminating the forces underlying the paradox of a country that sanctifies individual liberty while it continues to build and maintain a growing complex of totalitarian institutions. Based on exhaustive research and the author's insider's knowledge of the criminal justice system, *With Liberty for Some* provides an absorbing, well-written chronicle of imprisonment in its many forms. Interweaving his narrative with the moving, often shocking, personal stories of the prisoners themselves and their keepers, Christianson considers convict transports to the colonies; the international trade in captive indentured servants, slaves, and military conscripts; life under slavery; the transition from colonial jails to model state prisons; the experience of domestic prisoners of war and political prisoners; the creation of the penitentiary; and the evolution of contemporary corrections. His penetrating study of this broad spectrum of confinement reveals that slavery and prisons have been inextricably linked throughout American history. He also examines imprisonment within the context of the larger society. *With Liberty for Some* is a thought-provoking work that will shed new light on the ways in which imprisonment has shaped the American experience. As the author writes, "Prison is the black flower of civilization -- a durable weed that refuses to die." *A Manual of the Flowering Plants of California* Univ of California Press Amerika, Florenwerke, Kalifornien. The Zamorano 80A Selection of Distinguished California Books Made by Members of the Zamorano Club-Martino PubLetters to the Next President Andrew Hamilton grew up in a family where his father was a known womanizer. He watched his father disrespect his mother on a consistent basis in the presence of friends and family. Jesse Hamilton, Andrew's father, was not much of a role model to Andrew or his siblings. He never spent a lot of time with them or provided for them. But he had plenty of time to spend with other women and hang out with his drinking buddies. His family was second class citizens and was not top priority to him. Doreen Hamilton, Andrew's mother, was a church-going Christian who tried to keep her family together. The harder she tried the more Jesse put her down. She could not do anything right. Doreen's family and friends tried to get her to leave him, but she was determined to stick with her marriage for better or for worse. Andrew took up football to pass the time away while in school and became one of the best running backs to come out of high school. He was an all-state football star. He was exceptionally good, and major universities were interested in signing him to a full athletic football scholarship. His father was always busy doing other things, so he never came to any of his games. Jesse thought it was a waste of time and boring. Andrew vowed that he would never be like his father. He did not want to be the type of man who was a womanizing dog that did not care about anybody but himself. He promised that he would never disrespect or mistreat women. But he became a product of the environment that his father introduced him to. Andrew inherited his father's womanizing player ways and became what he hated most about him hence "A Player's Inheritance." Andrew Hamilton grew up in a family where his father was a known womanizer. He watched his father disrespect his mother on a consistent basis in the presence of friends and family. Jesse Hamilton, Andrew's father, was not much of a role model to Andrew or his siblings. He never spent a lot of time with them or provided for them. But he had plenty of time to spend with other women and hang out with his drinking buddies. His family was second class citizens and was not top priority to him. Doreen Hamilton, Andrew's mother, was a church-going Christian who tried to keep her family together. The harder she tried the more Jesse put her down. She could not do anything right. Doreen's family and friends tried to get her to leave him, but she was determined to stick with her marriage for better or for worse. Andrew took up football to pass the time away while in school and became one of the best running backs to come out of high school. He was an all-state football star. He was exceptionally good, and major universities were interested in signing him to a full athletic football scholarship. His father was always busy doing other things, so he never came to any of his games. Jesse thought it was a waste of time and boring. Andrew vowed that he would never be like his father. He did not want to be the type of man who was a womanizing dog that did not care about anybody but himself. He promised that he would never disrespect or mistreat women. But he became a product of the environment that his father introduced him to. Andrew inherited his father's womanizing player ways and became what he hated most about him hence "A Player's Inheritance."

"Join author and researcher Andrew J. Field as he explores aviation and legal history, unraveling the mystery behind the bombing of the "Mainliner Denver." In an absorbing, investigative style, Field recounts the mid-twentieth century's golden age of flight, painting a picture of the aviation world leading up to and following this incredible story. Detailing the changes in aviation security policy that occurred as a result of this incident, and the birth of televised courtroom proceedings that took place at the trial of the bomber, Field describes the comprehensive FBI investigation and highly-publicized courtroom drama that revealed the calculating perpetrator behind it all: a young man who (Jack Graham), in his obsession to murder his mother, killed her and all forty-three of the other people who were traveling aboard the "Mainliner Denver" on that fateful night fifty years ago"--From publisher's website.
