"State Minor Consent Laws: A Summary 3rd Edition, summarizes the laws in each of the 50 U.S. states and the District of Columbia that allow minors to give their own consent for health care. A brief overview of the laws in each jurisdiction is provided. The laws summarized for each jurisdiction are divided into two groups: laws that are based on the status of the minor; and laws that are based on the type of health care the minor is seeking."--Preface.

"Working mothers are common in the United States. In over half of all two-parent families, both parents work, and women's paychecks on average make up 35 percent of their families' incomes. Most of these families yearn for available and affordable child care--but although most developed countries offer state-funded child care, it remains scarce in the United States. And even in prosperous times, child care is rarely a priority for U.S. policy makers. In *In Our Hands: The Struggle for U.S. Child Care Policy*, Elizabeth Palley and Corey S. Shdaimah explore the reasons behind the relative paucity of U.S. child care and child care support. Why, they ask, are policy makers unable to convert widespread need into a feasible political agenda? They examine the history of child care advocacy and legislation in the United States, from the Child Care Development Act of the 1970s that was vetoed by Nixon through the Obama administration's Child Care Development Block Grant. The book includes data from interviews with 23 prominent child care and early education advocates and researchers who have spent their careers seeking expansion of child care policy and funding and an examination of the legislative debates around key child care bills of the last half-century. Palley and Shdaimah analyze the special interest and niche groups that have formed around existing policy, arguing that such groups limit the possibility for debate around U.S. child care policy. Ultimately, they conclude, we do not need to make minor changes to our existing policies. We need a revolution"--

A basic framework to the current law relating to the care of children in England and Wales, including reference to all recent legislation, guidance and standards and a summary of the main statutes regulations and court rules currently in force. *The Debate Over Child Care: 1969-1990* offers a new perspective on the pervading problem of providing child care services in the United States. The author traces the contemporary debate over the sponsorship of child care services and compares this to the past debate over the sponsorship of kindergartens during the Progressive Era. Klein compares the function of child care across societal sectors, and points out that turf fighting and imbedded ideological differences have prohibited the development of a proac-

tive social policy for providing needed child care services. She analyzes the advantages and disadvantages of five different sponsors: the public schools, the church, private enterprise, non-profit organizations, and corporations. Past and present federal legislation is discussed in relation to the divisive issue of sponsorship.

Our current era of globalization, war, and socioeconomic unrest has revealed public health as a worldwide concern and a major frontier for social justice with maternal and child health at its epicenter. Yet, there has been a relative scarcity of training resources specifically dedicated to this crucial area. "Maternal and Child Health: Global Challenges, Programs, and Policies" addresses this gap in current knowledge by analyzing the range of socioeconomic and environmental factors, health care disparities, politics, policies, and cultural practices that impact the health and safety of mothers, as well as the well-being and optimum development of their children. Individual sections focus on unequal distribution of the world's resources, politics and power, specific disease concerns, programs, policies and emerging concerns with a focus on what is currently being done, and what needs to be done to improve the health status of women, children, and adolescents. The book's contributors are some of the world's most respected experts, carefully selected to represent different global geographic regions and diverse professional disciplines related to maternal and child health from both academic and field practice perspectives. Among the topics in this authoritative volume: The impact of war, globalization, gender inequity, and harmful traditional practices (e.g., female genital mutilation). Specific health concerns, including tuberculosis, malaria, HIV, and malnutrition. Child and adolescent health issues, from abuse and neglect to children in difficult circumstances. Pregnancy-related issues: safety, abortion and post-abortion care, teen pregnancy, and more. Strategies for planning, developing, and maintaining maternal and child health systems in developing countries. The status of global initiatives, such as Integrated Management of Childhood Illnesses and the Millennium Development Goals. The status of evidence-based maternal and child health in the developing world. With such a wealth of information on both practical and conceptual levels, "Maternal and Child Health: Global Challenges, Programs, and Policies" is as relevant to students and researchers in the field as it is to policy makers and those working for global health and development organizations. It also makes an excellent stand-alone text for courses in global health in general and global maternal and child health in particular.

Describes and analyzes the results of a 2004 survey on the child care needs and choices of military families. It defines outcomes of potential interest to DoD (reported child-care usage, unmet child-care need, and unmet child-care preference), details the distribution of these outcomes among military families, and analyzes the relationships between these outcomes and military readiness and retention.

This issue brief analyzes the two new child care grant programs that were established during the 101st Congress. It also analyzes the new and expanded tax credits created to assist low-income families with children. The provisions of the Child Care and Development Block Grant (CCDBG) and the Child Care Services Entitlement concern: (1) eligibility of families and child care providers; (2) requirements that states must meet in order to receive funds; (3) requirements for reporting by states; and (4) availability of federal funds to states. Changes in federal law concerning the Earned Income Tax Credit concern an increase in credit; a supplemental tax credit for newborns; and a health care tax credit. Related children's programs and services affected by 1990 legislation include: (1) Head Start; (2) Medicaid; (3) Coordinated Services for Children, Youth, and Families; (4) increased funding for health services for homeless children through the Stewart B. McKinney Homeless Assistance reauthorization; and (5) the Education and Handicapped Act. Appendixes include the annual allocation of block grants possible for each state in 1991, 1992, and 1993; a list of spending for block grants by state; and tables describing child care and the Earned Income Tax Credit. A list of eight references is included. (BC)

"This report sets out an analysis of the law on child care in the North, which for the purposes of this project, is defined as the Yukon Territory, the Northwest Territories and Labrador. It should be noted that this report does not deal with the law on child welfare, which may be described as the law dealing with adoption issues and with protection of children from hostile family environments. This report is the result of a project that was designed to consist of three phases. The first phase was a review of the law affecting child care or child day care in the urban North, including facilitates, personnel, programming, funding and other aspects re-

specting the establishment and operation of day care. The second phase was an analysis of the effect of the law on child care, especially with respect to Aboriginal people. The final phase was to make conclusions and recommendations for law reform"--Overview, p. 4.

In November 2014, with broad bipartisan support, Congress reauthorized CCDBG [Child Care and Development Block Grant] (the major federal child care program) for the first time since 1996. The new law strengthens CCDBG's dual role as a major early childhood education program and a work support for low-income families. This implementation guide is designed to help policymakers and advocates gain a better understanding of what is entailed in fully implementing the law. It summarizes and analyzes key sections of the reauthorization, offering recommendations and areas of caution for states. It also includes a detailed chart comparing specific provisions of the new law with those of the previous law, an implementation timeline, a checklist indicating state compliance with select provisions of the law, a summary of the law, and state-by-state information on CCDBG funding and children served. The following are appended: (1) Child Care and Development Block Grant Act of 2014: Summary; (2) Child Care and Development Block Grant Act of 2014: Implementation Timeline; (3) Checklist of Select State Child Care Policies; (4) FY 2015 Estimated Federal and State CCDBG Allocations; (5) Average Monthly Number of Children Served in CCDBG; (6) Average Monthly Share of Children Served by CCDBG in All Types of Care, FY 2013; (7) Number of Providers Receiving CCDBG by Settings, FY 2013; and (8) Child Care and Development Block Grant Act of 2014: Changes to Previous Law.

The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this important work, Joan Lombardi, one of America's foremost experts on child care, shows how our current system is not meeting the needs of America's families and describes a vision for re-

designing this system to promote healthy child and youth development. Both as an expert and as a parent, the author guides the reader through the problems that face the current child care system and outlines the possible solutions. Drawing on the most recent innovations from across the country, she offers fresh ideas for improving the quality and availability of child care, both for young children and those in after school programs. From renewal of welfare reform to the administration's efforts to promote literacy, debate at both the state and federal levels about child care will continue for the foreseeable future. Joan Lombardi shows how to bridge the gap between early education and child care by taking advantage of the hours that children spend in care to encourage child and youth development and by creating a system of program and community supports to improve quality. Author note: Joan Lombardi served as the first Associate Commissioner for Child Care in the U.S. Department of Health and Human Services where she was responsible for the direction and leadership for the nation's child care assistance program. Prior to that, she served as the staff director for the Secretary's Advisory Committee on Head Start Quality and Expansion. She currently serves as an advisor to a number of national foundations and organizations including ZERO THREE and the Center for Law and Social Policy in Washington D.C.

Written in plain English for the non-legal specialist, this concise guide offers a simple introduction to the main legal provisions in England and Wales relating to the care of children.

Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child out-

comes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Law and Ethics in Children's Nursing is an important and practical guide on the legal and ethical aspects of child healthcare that enables nurses to understand the legal and ethical principles that underpin everyday nursing practice. It explores the concept of childhood and children's rights, the extent to which their rights are upheld in a variety of settings, and the relationship between law and ethics and how they interact in resolving problems and dilemmas that commonly arise in practice. With case studies, learning outcomes and scenarios throughout, Law and Ethics in Children's Nursing places the care and treatment of children in a legal and ethical framework, and explores the way in which legal and ethical aspects of children's nursing differ from those of adults. It explores general principles such as autonomy and consent, confidentiality, accountability and negligence. It then goes on to look at specialist areas such as abortion, sterilisation, research, mental health, organ donation, child protection and death.

Why is the United States one of the few advanced democratic market societies that do not offer child care as a universal public benefit or entitlement? This book - a comprehensive history of child care policy and practices in the United States from the colonial period to the present - shows why the current child care system evolved as it did and places its history within a broad comparative context.
