I was born and raised in Rockland County, which until the mid-fifties, was a region of New York State characterized by small villages and farms just 18 miles or so from New York City. After high school and college and having seen enough of "progress" destroying this wonderful way of life, my wife and I moved to a small community a few miles from Cooperstown, New York, home of the Baseball Hall of Fame. After raising three daughters and a career in education I decided to change the tempo of life and began a new occupation as a full-time writer of automotive history. This was simply an extension of what I had been doing since my preadolescent years when my brother and I would collect sales

brochures from any auto dealer who wouldn't show us the exit/door, since we obviously had no cash, no credit and no intention of buying a new car. Ever since I was in elementary school I was fascinated by the hopped-up Fords and Chevys (and even an occasional Plymouth) of the late '30's and '40's that the older "cool" boys drove to school. Recollections of those cars from long ago instantly came to mind when I first saw the PT Cruiser in 2000. Having previously written numerous articles and several books on Chrysler vehicles, my interest in the PT as the subject of a forthcoming volume was instantaneous.

Why are people around the world so very different? What makes us live, buy, even love as we do? The answers are in the codes. In *The Culture Code*, internationally revered cultural anthropologist and marketing expert Clotaire Rapaille reveals for the first time the techniques he has used to improve profitability and practices

for dozens of Fortune 100 companies. His groundbreaking revelations shed light not just on business but on the way every human being acts and lives around the world. Rapaille's breakthrough notion is that we acquire a silent system of codes as we grow up within our culture. These codes—the Culture Code—are what make us American, or German, or French, and they invisibly shape how we behave in our personal lives, even when we are completely unaware of our motives. What's more, we can learn to crack the codes that guide our actions and achieve new understanding of why we do the things we do. Rapaille has used the Culture Code to help Chrysler build the PT Cruiser—the most successful American car launch in recent memory. He has used it to help Procter & Gamble design its advertising campaign for Folger's coffee – one of the longest lasting and most successful campaigns in the annals of advertising. He has used it to help companies as diverse as GE, AT&T, Boeing, Honda, Kellogg, and L'Oréal improve their bottom line at home and overseas. And now, in *The Culture Code*, he uses it to reveal why Americans act distinctly like Americans, and what makes us different from the world around us. In *The Culture Code*, Dr. Rapaille decodes two dozen of our most fundamental archetypes—ranging from sex to money to health to America itself—to give us “a new set of glasses” with which to view our actions and motivations. Why are we so often disillusioned by love? Why is fat a solution rather than a problem? Why do we reject the notion of perfection? Why is fast food in our lives to stay? The answers are in the Codes. Understanding the Codes gives us unprecedented freedom over our lives. It lets us do business in dramatically new ways. And it finally explains why people around the world really are different, and reveals the hid-

den clues to understanding us all.

Here is the book that exposed the Daimler-Chrysler "merger of equals" as a bold German takeover of an industrial icon. Taken for a Ride reveals the shock waves felt around the world when Daimler-Benz bought Chrysler for \$36 billion in 1998. In a gripping narrative, Bill Vlasic and Bradley A. Stertz go behind the scenes of the defining corporate drama of the decade -- and in a new epilogue chart its chaotic aftermath.

Chicago has been called the “most American of cities” and the “great American city.” Not the biggest or the most powerful, nor the richest, prettiest, or best, but the most American. How did it become that? And what does it even mean? At its heart, Chicago is America's great hub. And in this book, Chicago magazine editor and longtime Chicagoan Whet Moser draws on Chicago's social, urban, cultural, and often scandalous history to reveal how the city of stinky onions grew into the great American metropolis it is today. Chicago began as a trading post, which grew into a market for goods from the west, sprouting the still-largest rail hub in America. As people began to trade virtual representations of those goods—futures—the city became a hub of finance and law. And as academics studied the city's growth and its economy, it became a hub of intellect, where the University of Chicago's pioneering sociologists shaped how cities at home and abroad understood themselves. Looking inward, Moser explores how Chicago thinks of itself, too, tracing the development of and current changes in its neighborhoods. From Boystown to Chinatown, Edgewater to Englewood, the Ukrainian Village to Little Village, Chicago is famous for them—and infamous for the segregation be-

tween them. With insight sure to enlighten both residents and anyone lucky enough to visit the City of Big Shoulders, Moser offers an informed local's perspective on everything from Chicago's enduring paradoxes to tips on its most interesting sights and best eats. An affectionate, beautifully illustrated urban portrait, his book takes us from the very beginnings of Chicago as an idea—a vision in the minds of the region's first explorers—to the global city it has become.
