Personality can not be determined by IQ testing. IQ tests are developed for testing of intelligence, or to be more precise, for measuring the so-called Intelligence Quotient. The term “Personality” is used to describe typical patterns of behavior, thinking and emotions that remain relatively stable throughout person's life.

**Creativity, Intelligence, and Personality**

Those that emphasise a person-centered view of creativity usually assess creativity with reference to personal attributes, like intelligence or personality (e.g. Guilford, 1950). There are also those who see creativity in an almost pathological light, i.e. as a result of unusual personality processes ( Eysenck, 1993 , Eysenck, 1995 ).
