A dietary supplement's safety depends on many things, such as its chemical makeup, how it works in the body, how it is prepared, and the amount you take. Before taking any dietary supplement, use the information sources listed in this brochure and talk to your healthcare providers to answer these questions:

The efficacy and safety of zinc, biotin, vitamin D, nicotinamide, and polypodium in the management of dermatology disorders was assessed and data published in the Journal of the American Academy of Dermatology. Although evidence was sparse for most supplements, some studies supported the use of nicotinamide to prevent nonmelanoma skin cancers.

Detailed information on the efficacy and safety of the most commonly used weight-loss dietary supplements has been recently published by the National Institutes of Health (NIH). However, in this report the thorny issue that may result from drug in-

teractions with weight-loss dietary supplements has been not sufficiently addressed.

The FDA regulates dietary supplements for exercise and athletic performance in accordance with the Dietary Supplement Health and Education Act of 1994. Like other dietary supplements, exercise- and athletic-performance supplements differ from over-the-counter or prescription medications in that they do not require premarket review or approval by FDA.
