In Discovering Geometry we develop  
reasoning skills in four general ways: 1.  
First, when students perform  
investigations and make conjectures in the  
form of formulas (e.g., a formula for the  
number of diagonals of an  $n$ -gon or a  
formula for the sum of the measures of the  
interior angles of an  $n$ -gon) students must  
use inductive reasoning while doing  
geometry.
