Manufactured by Firebird, the Enviromax C44 is a condensing system oil boiler designed for internal floor-standing installation. The unit can fit under a standard kitchen worktop so it won't take up much space and comes housed in a durable casing with a high-quality finish to make it an aestheti-

cally pleasing addition to a kitchen or utility room. This is the most powerful boiler in the Firebird Enviromax range, boasting an output of 44 kW, which is ideal for larger homes with 2+ bathrooms. Firebird offers the most comprehensive range of oil-fired boilers available for internal, external and boilerhouse applications. Easy to Install & Service For ease of installation all Firebird boilers feature multiple tapping points and multi directional flue options. A 7-pin plug simplifies wiring and an optional condensate pumps provides

Firebird understands how difficult it is for schools and small businesses to find the time to read through the vast amount of information published about data protection, so we have produced a series of free resources to help!

Technical Data. Enviroair Heat Pump Sizing Guide. A heat pump that uses air as its heat source will perform better as the air temperature increases. The industry standard for quoting the output and efficiency of an air to water (ATW) heat pump is 7°C external temperature and a 35°C flow temperature. However, to meet MCS (Microgeneration Certification Scheme) criteria, the heat pump should be sized according to the lowest geographical temperature where the heat pump is to be installed.
