Unplugging the Classroom: Teaching with Technologies to Promote Students' Lifelong Learning provides techniques to help teaching and learning in an age where technology untethers instruction from the classroom, from semester seat-time, and from a single source of expertise. The book brings together researchers and practitioners from diverse academic fields, including library perspectives, and presents interdisciplinary discussions from both theoretical and applied areas. It is unique in its goal of bringing educators and librarians together to explore the challenges that are faced by students and faculty in any time, any place, any path, and any pace learning. In spite of the fact that the mobile revolution has definitively arrived, students and faculty alike aren't ready to make the leap to mobile learning.
