START-UP NATION addresses the trillion dollar question: How is it that Israel-- a country of 7.1 million, only 60 years old, surrounded by enemies, in a constant state of war since its founding, with no natural resources-- produces more start-up companies than large, peaceful, and stable nations like Japan, China, India, Korea, Canada and the UK? With the savvy of foreign policy insiders, Senor and Singer examine the lessons of the country's adversity-- driven culture, which flattens hierarchy and elevates informality-- all backed up by government policies focused on innovation. In a world where economies as diverse as Ireland, Singapore and

Dubai have tried to re-create the "Israel effect", there are entrepreneurial lessons well worth noting. As America reboots its own economy and can-do spirit, there's never been a better time to look at this remarkable and resilient nation for some impressive, surprising clues. Adapting to the ever-changing GMAT exam, Manhattan Prep's 6th Edition GMAT Strategy Guides offer the latest approaches for students looking to score in the top percentiles. Written by active instructors with 99th-percentile scores, these books are designed with the student in mind. the GMAT. As a result, students benefit from thorough and comprehensive subject material, clear explanations of fundamental principles, and step-by-step instructions of important techniques. In-action practice problems and detailed answer explanations challenge the student, while topical sets of Official Guide problems provide the opportunity for further growth. Purchase of this book includes one year of access to Manhattan Prep's online computer-adaptive GMAT practice exams and Integrated Reasoning and Essay Question Bank. L'auteure aborde la question du leadership, de l'initiative du gestionnaire dans l'entreprise et dans les services publics. Elle montre, par l'analyse fouillée et lucide d'une grande institution bancaire, comment les technocrates ont détruit ce qu'avaient bâti les artistes et préservé les artisans. Nous devons comprendre ces différents styles de gestion et l'effet qu'ils peuvent exercer sur l'entreprise (Henry Mintzberg).

As a member of the board of directors of several major international financial services corporations, Patricia Pitcher was in a privileged position to observe the inner workings of the corporate world. What she witnessed was a crisis of leadership rooted in a misunderstanding of what leading is all about. Not content to simply offer an opinion—opinions come cheap—she embarked on an eight-year research project to document the reasons for the rapid collapse of a global giant. That collapse, she shows us, began with one critical succession error and was compounded by a chronic failure to understand the importance of personality in the leadership equation. One wrong person at the helm turned a dream into a nightmare. In *The Drama of Leadership*, Patricia Pitcher shares her findings and, in the process, explodes a number of popular myths about leadership, including the one that leadership and vision are qualities that can be taught in management seminars. She refutes the

common belief that leaders are in short supply and proves that the corporate talent pool abounds with potential leaders whose talents either go unrecognized or are tragically undervalued. And she explains why, at a time when vision, innovation, humanity, and passion are so desperately needed, so many companies cast in leadership roles people who possess none of these qualities, and who distrust anyone who does. But who are the good and bad leaders, and how do you identify them? In answer to this question, Patricia Pitcher identifies three types of leaders: Artists, who are people-oriented, open-minded, intuitive, and visionary; Craftsmen, to whom the adjectives "humane," "dedicated," and "wise" best apply; and Technocrats - brilliant and well-schooled in the latest theory, they are detail-oriented, rigid, methodical, self-centered, and, when left in control, pose a serious threat to corporate competitiveness. The power struggles between these types are dramas being played out in companies everywhere. Whether the story has a happy or an unhappy ending depends entirely upon which type gets top billing. The

author also offers her wise recommendations on what companies can do to protect themselves against a technocratic hegemony and how to cultivate the talents of Artists and Craftsmen. She also tells you how to determine what type of leader you are and how to interact with other types to achieve both personal and corporate success. *The Drama of Leadership* is an articulate, insightful, passionate appeal to develop the kind of leaders and organizations that can take us into the twenty-first century.

ACE THE GMAT is based on a simple but powerful observation: Test-takers who score high on the GMAT exam do so primarily by understanding how to solve a finite number of the most important, recurring problems that appear on the GMAT. What are these important, recurring problems? The answer to this question is the basis

of this book. This manual provides in-depth analysis of over 200 all-star problems that are key to mastering the seven major GMAT problem types including Problem Solving, Data Sufficiency, Sentence Correction, Critical Reasoning, Reading Comprehension, Analytical Writing, and Integrated Reasoning. Apart from providing readers with answers and full explanations, a special feature of this book is that each problem is categorized by type ("classification"), rated by difficulty level ("chili rating"), and supplemented with a problem-solving strategy ("snapshot"). "Chance favors the prepared mind." Whether you're a candidate already enrolled in a test-prep course or are undertaking self-study, this guidebook will serve as a rigorous skill-building study guide to help you conquer the math, verbal, analytical writing, and integrated reasoning sections of the exam. Studying for the math and verbal sections of the GMAT exam requires some 100 hours of study time. This book's content is conveniently divided into topics, which require two to three hours of study time per day. Total study time will vary between 80 to 120 hours for

the entire 40 days. Most startups fail. But many of those failures are preventable. The Lean Startup is a new approach being adopted across the globe, changing the way companies are built and new products are launched. Eric Ries defines a startup as an organization dedicated to creating something new under conditions of extreme uncertainty. This is just as true for one person in a garage or a group of seasoned professionals in a Fortune 500 boardroom. What they have in common is a mission to penetrate that fog of uncertainty to discover a successful path to a sustainable business. The Lean Startup approach fosters companies that are both more capital efficient and that leverage human creativity more effectively. Inspired by lessons from lean manufacturing, it relies on "validated learning," rapid scientific experimentation, as well as a number of counter-intuitive practices that shorten product development cycles, measure ac-

tual progress without resorting to vanity metrics, and learn what customers really want. It enables a company to shift directions with agility, altering plans inch by inch, minute by minute. Rather than wasting time creating elaborate business plans, The Lean Startup offers entrepreneurs—in companies of all sizes—a way to test their vision continuously, to adapt and adjust before it's too late. Ries provides a scientific approach to creating and managing successful startups in a age when companies need to innovate more than ever.
