Holley has been the undisputed leader in fuel systems for over 100 years. Holley carburetors have powered every NASCAR® Cup team and nearly every NHRA® Pro-Stock champion for four decades.

Carburetor Installation And Tuning Blog - Holley

Holley Carburetor Full Power Circuit Calibration Guide. July 27, 2015 by Muscle Car DiY. Strange as it may seem, the main jet on a Holley carb is not what you should be using to calibrate the WOT mixture delivered to the engine. That job is the function of the power valve and the PVRC. The main jet, however, is the most often changed jet; the one changed in an effort to optimize the mixture for maximum power.

Holley Carburetor Full Power Circuit Calibration Guide

Thankfully, adjusting the mixture on a Holley carburetor is quite simple, as the mixture screws are located on the outside of the carburetor and can be quickly adjusted with a screwdriver. Step 1 Locate the two air/fuel mixture screws on the metering blocks. Holley carburetors consist of a "body" and several components which attach to the body.

How to Adjust the Air Mixture for a Holley Carburetor | It ...

Holley carbs are calibrated for sea level operation and an inlet air temperature of 70 degrees Fahrenheit. Once you know the correct stock jetting for your particular

Holley carb, you can determine whether you live or race at an altitude above sea level. For every 2000 foot increase in altitude, you can reduce the jet size by one size.

How To Tune Holley Carburetors. How to tell what size carb you need: You take the engine cubic inch and multiply by the maximum RPM and divide by 3456. If you have an automatic transmission you will need a vacuum sec. carb, a standard transmission can use a Double Pumper carb. How to adjust the mixture screws on your carburetor: To set idle mixture screws perform the following steps:

Tech Tip: How To Tune Holley Carburetors

When it comes to calibration, Holley carburetors are base line jetted at sea level at 70 degrees F. A few specific carburetors require stagger jetting, but for the most part, the factory installed jets will be within a couple of numbers of being right. Fair enough. Keep in mind though, the density of air decreases when temperature increases.
