The Great Escape for the Great War: the astonishing true story of two World War I prisoners who pulled off one of the most ingenious escapes of all time. FINALIST FOR THE EDGAR® AWARD • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY THE WASHINGTON POST AND NPR • “Fox unspools Jones and Hill’s delightfully elaborate scheme in nail-biting episodes that advance like a narrative Rube Goldberg machine.”—The New York Times Book Review Imprisoned in a remote Turkish POW camp during World War I, having survived a two-month forced march and a terrifying shootout in the desert, two British officers, Harry Jones and Cedric Hill, join forces to bamboozle their iron-fisted captors. To stave off despair and boredom, Jones takes a handmade Ouija board and fakes elaborate séances for his fellow prisoners. Word gets around, and one day an Ottoman official approaches Jones with a query: Could Jones contact the spirit world to find a vast treasure rumored to be buried nearby? Jones, a trained lawyer, and Hill, a brilliant magician, use the Ouija board—and their keen understanding of the psychology of deception—to build a trap for their captors that will ultimately lead them to freedom. A gripping nonfiction thriller, The Confidence Men is the story of one of the only known con games played for a good cause—and of a profound but unlikely friendship. Had it not been for “the Great War,” Jones, the Oxford-educated son of a British lord, and Hill, a mechanic on an Australian sheep ranch, would never have met. But in pain, loneliness, hunger, and isolation, they formed a powerful emotional and intellectual alliance that saved both of their lives. Margalit Fox brings her “nose for interesting facts, the ability to construct a taut narrative arc, and a Dickens-level gift for concisely conveying personality” (Kathryn Schulz, New York) to this tale of psychological strategy that is rife with cunning, danger, and moments of high farce that rival anything in Catch-22. There is a void in the literature on how to conduct research in the finance and economics of higher education. Students, professors, and practitioners have no concise document that examines the field, provides history, definitions of terms, sources of data, and research methods. Higher Education Finance Research: Policy, Politics, and Practice fills that void. The book is structured in four parts. The first section provides a brief history and description of the general organization of American higher education, the sources and uses of funds over the last 100 years, and who is served in what types of institutions. Definitions of terms that are unique to higher education are provided, and some basic rules for conducting research on the economics and finance of higher education are established. Although in some ways, conducting research in higher education funding is similar to that for elementary/secondary education, there are some important distinctions that also are provided. The second section introduces guiding philosophies, sources of data, data elements/vocabulary, metrics, and analytics related to institutional revenues and expenditures. Chapters in this section focus on student oriented revenues, institutionally-oriented revenues, and funding formulas. The third section introduces accountability-related concepts by first examining the accountability movement in higher education and performance-based approaches applied in budgeting and funding, then looking at methods to determine public and private returns on investment in postsecondary education, and closing with an examination of finance from the perspective of the primary consumer: students. The fourth and last section of the book focuses on presenting postsecondary finance research to policy audiences to assist in connecting academic research and policy making. Chapters focus on accounting for time considerations in analysis, the placing of data in context to make the data and findings relevant, and ways to effectively communicate findings to various policy-making audiences.

A multi-country study of the conditions under which decentralized countries might ensure fiscal discipline. In many parts of the world, lower levels of government are taking over responsibilities from national authorities. This often leads to difficulty in maintaining fiscal discipline. So-called soft budget constraints allow these subnational governments to expand expenditures without facing the full cost. Until now, however, there has been little understanding of how decentralization leads to large fiscal deficits and macroeconomic instability. This book, based on a research project at the World Bank, develops an analytical framework for considering the issues related to soft budget constraints, including the institutions, history, and policies that drive expectations for bailouts among subnational governments. It examines fiscal, financial, political, and land market mechanisms for subnational discipline in Argentina, Brazil, Canada, China, Germany, Hungary, India, Norway, South Africa, Ukraine, and the United States. The book concludes that the dichotomy between market and hierarchical mechanisms is false. Most countries--and virtually all developing countries--must rely on market mechanisms as well as hierarchical constraints to maintain fiscal discipline. When bailouts cannot be avoided, they present important opportunities to reform underlying institutions. Successful market discipline--where voluntary lenders perform important monitoring functions--is most likely to emerge from a gradual process that begins with carefully crafted rules and oversight.

The programs are specific, detailed, and activity oriented - but are designed to support long-range goals, which may be handed down by a parent organization or the community in general.

'The Impact of School Infrastructure on Learning: A Synthesis of the Evidence provides an excellent literature review of the resources that explore the areas of focus for improved student learning, particularly the aspiration for “accessible, well-built, child-centered, synergetic and fully realized learning environments.” Written in a style which is both clear and accessible, it is a practical reference for senior government officials and professionals involved in the planning and design of educational facilities, as well as for educators and school leaders. --Yuri Belfali, Head of Division, Early Childhood and Schools, OECD Directorate for Education and Skills This is an important and welcome addition to the surprisingly small, evidence base on the impacts of school infrastructure given the capital investment involved. It will provide policy makers, practitioners, and those who are about to commission a new build with an important and comprehensive point of reference. The emphasis on safe and healthy spaces for teaching and learning is particularly welcome. --Harry Daniels, Professor of Education, Department of Education, Oxford University, UK This report offers a useful library of recent research to support the, connection between facility quality and student outcomes. At the same time, it also points to the unmet need for research to provide verifiable and reliable information on this

connection. With such evidence, decisionmakers will be better positioned to accurately balance the allocation of limited resources among the multiple competing dimensions of school policy, including the construction and maintenance of the school facility. --David Lever, K-12 Facility Planner, Former Executive Director of the Interagency Committee on School Construction, Maryland Many planners and designers are seeking a succinct body of research defining both the issues surrounding the global planning of facilities as well as the educational outcomes based on the quality of the space provided. The authors have finally brought that body of evidence together in this well-structured report. The case for better educational facilities is clearly defined and resources are succinctly identified to stimulate the dialogue to come. We should all join this conversation to further the process of globally enhancing learning-environment quality! --David Schrader, AIA, Educational Facility Planner and Designer, Former Chairman of the Board of Directors, Association for Learning Environments (A4LE) Essential tools and guidance for effective nonprofit financial management Financial Management for Nonprofit Organizations provides students, professionals, and board members with a comprehensive reference for the field. This project, based on the Public Expenditure and Financial Accountability (PEFA) data set, researched how PEFA can be used to shape policy development in public financial management (PFM) and other major relevant policy areas such as anticorruption, revenue mobilization, political economy analysis, and fragile states. The report explores what shapes the PFM system in low- and middle-income countries by examining the relationship between political institutions and the quality of the PFM system. Although the report finds some evidence that multiple political parties in control of the legislature is associated with better PFM performance, the report finds the need to further refine and test the theories on the relationship between political institutions and PFM. The report addresses the question of the outcomes of PFM systems, distinguishing between fragile and nonfragile states. It finds that better PFM performance is associated with more reliable budgets in terms of expenditure composition in fragile states, but not aggregate budget credibility. Moreover, in contrast to existing studies, it finds no evidence that PFM quality matters for deficit and debt ratios, irrespective of whether a country is fragile or not. The report also explores the relationship between perceptions of corruption and PFM performance. It finds strong evidence of a relationship between better PFM performance and improvements in perceptions of corruption. It also finds that PFM reforms associated with better controls have a stronger relationship with improvements in perceptions of corruption compared to PFM reforms associated with more transparency. The last chapter looks at the relationship between PEFA indicators for revenue administration and domestic resource mobilization. It focuses on the credible use of penalties for noncompliance as a proxy for the type of political commitment required to improve tax performance. The analysis shows that countries that credibly enforce penalties for noncompliance collect more taxes on average.

Planning guide for maintaining school facilities DIANE Publishing The Confidence Men How Two Prisoners of War Engineered the Most Remarkable Escape in History Random House The Great Escape for the Great War: the astonishing true story of two World War I prisoners who pulled off one of the most ingenious escapes of all time. FINALIST FOR THE EDGAR® AWARD • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY THE WASHINGTON POST AND NPR • "Fox unspools Jones and Hill's delightfully elaborate scheme in nail-biting episodes that advance like a narrative Rube Goldberg machine."—The New York Times Book Review Imprisoned in a remote Turkish POW camp during World War I, having survived a two-month forced march and a terrifying shootout in the desert, two British officers, Harry Jones and Cedric Hill, join forces to bamboozle their iron-fisted captors. To stave off despair and boredom, Jones takes a handmade Ouija board and fakes elaborate séances for his fellow prisoners. Word gets around, and one day an Ottoman official approaches Jones with a query: Could Jones contact the spirit world to find a vast treasure rumored to be buried nearby? Jones, a trained lawyer, and Hill, a brilliant magician, use the Ouija board—and their keen understanding of the psychology of deception—to build a trap for their captors that will ultimately lead them to freedom. A gripping nonfiction thriller, The Confidence Men is the story of one of the only known con games played for a good cause—and of a profound but unlikely friendship. Had it not been for "the Great War," Jones, the Oxford-educated son of a British lord, and Hill, a mechanic on an Australian sheep ranch, would never have met. But in pain, loneliness, hunger, and isolation, they formed a powerful emotional and intellectual alliance that saved both of their lives. Margalit Fox brings her "nose for interesting facts, the ability to construct a taut narrative arc, and a Dickens-level gift for concisely conveying personality" (Kathryn Schulz, New York) to this tale of psychological strategy that is rife with cunning, danger, and moments of high farce that rival anything in Catch-22. Chicago Tribune Index The Truly Disadvantaged The Inner City, the Underclass, and Public Policy, Second Edition University of Chicago Press Renowned American sociologist William Julius Wilson takes a look at the social transformation of inner city ghettos, offering a sharp evaluation of the convergence of race and poverty. Rejecting both conservative and liberal interpretations of life in the inner city, Wilson offers essential information and a number of solutions to policymakers. The Truly Disadvantaged is a wide-ranging examination, looking at the relationship between race, employment, and education from the 1950s onwards, with surprising and provocative findings. This second edition also includes a new afterword from Wilson himself that brings the book up to date and offers fresh insight into its findings. "The Truly Disadvantaged should spur critical thinking in many quarters about the causes and possible remedies for inner city poverty. As policymakers grapple with the problems of an enlarged underclass they—as well as community leaders and all concerned Americans of all races—would be advised to examine Mr. Wilson's incisive analysis."—Robert Greenstein, New York Times Book Review Fiscal Decentralization and the Challenge of Hard Budget Constraints MIT Press A multi-country study of the conditions under which decentralized countries might ensure fiscal discipline. In many parts of the world, lower levels of government are taking over responsibilities from national authorities. This often leads to difficulty in maintaining fiscal discipline. So-called soft budget constraints allow these subnational governments to expand expenditures without facing the full cost. Until now, however, there has been little understanding of how decentralization leads to large fiscal deficits and macroeconomic instability. This book, based on a research project at the World Bank, develops an analytical framework for considering the issues related to soft budget constraints, including the institutions, history, and policies that drive expectations for bailouts among subnational governments. It examines fiscal, financial, political, and land market mechanisms for subnational discipline in Argentina, Brazil, Canada, China, Germany, Hungary, India, Norway, South Africa, Ukraine, and the United States. The book concludes that the dichotomy between market and hierarchical mechanisms is false. Most countries—and virtually all developing countries—must rely on market mechanisms as well as hierarchical constraints to maintain fiscal discipline. When bailouts cannot be avoided, they present important opportunities to reform underlying institutions. Successful market discipline—where voluntary lenders perform important monitoring functions—is most likely to emerge from a gradual process that begins with carefully crafted rules and oversight. The Impact of School Infrastructure on Learning A Synthesis of the Evidence World Bank Publications The Impact of School Infrastructure on Learning: A Synthesis of the Evidence provides an excellent literature review of the resources that explore the areas of focus for improved student learning, particularly the aspiration for "accessible, well-built, child-centered, synergistic and fully realized learning environments." Written in a style which is both clear and accessible, it is a practical reference for senior government officials and professionals involved in the planning and design of educational facilities, as well as for educators and school leaders. --Yuri Belfali, Head of Division, Early Childhood and Schools, OECD Directorate for Education and Skills This is an important and welcome addition to the surprisingly small, evidence base on the impacts of school infrastructure given the capital investment involved. It will provide policy makers, practitioners, and those who are about to commission a new build with an important and comprehensive point of reference. The emphasis on safe and healthy spaces for teaching and learning is particularly welcome. --Harry Daniels, Professor of Education, Department of Education, Oxford University, UK This report offers a useful library of recent research to support the, connection between facility quality and student outcomes. At the same time, it also points to the unmet need for research to provide verifiable and reliable information on this connection. With such evidence, decisionmakers will be better positioned to accurately balance the allocation of limited resources among the multiple competing dimensions of school policy, including the construction and maintenance of the school facility. --David Lever, K-12 Facility Planner, Former Executive Director of the Interagency Committee on School Construction, Maryland Many planners and designers are seeking a succinct body of research defining both the issues surrounding the global planning of facilities as well as the educational outcomes based on the quality of the space provided. The authors have finally brought that body of evidence together in this well-structured report. The case for better educational facilities is clearly defined and resources are succinctly identified to stimulate the dialogue to come. We should all join this conversation to further the process of globally enhancing learning-environment quality! --David Schrader, AIA, Educational Facility Planner and Designer, Former Chairman of the Board of Directors, Association for Learning Environments (A4LE) Teaching Lab Science Courses Online Resources for Best Practices, Tools, and Technology John Wiley & Sons Teaching Lab Science Courses Online is a practical resource for educators developing and teaching fully online lab science courses. Finally, the book reveals how to get administrative and faculty buy-in for teaching science online and shows how to negotiate internal politics and assess the budget implications of online science instruction. Beyond Budgeting How Managers Can Break Free from the Annual Performance Trap Harvard Business Press In their groundbreaking book, authors Jeremy Hope and Robin Fraser show how organizations can break free from the annual budget trap once and for all. Beyond Budgeting is not a new financial-planning process - it is an alternative, coherent management model that enables companies to manage performance through processes specifically tailored to today's volatile marketplace. Hope and Fraser spent five years studying a wide range of international companies - from a global corporation to a small charity, from a bank to a ball-bearings manufacturer - that have already abandoned traditional budgeting to varying degrees. From these pioneering experiences, the authors have distilled a set of guiding principles that will take any company beyond budgeting to a whole new level of competitiveness. Based on the decision-making needs of front-line managers, Beyond Budgeting enables readers to take advantage of two major opportunities: 1) a set of adaptive management processes that replace centrally controlled, predetermined goals with self-regulating, relative competi-

tive benchmarks, and 2) the transfer of power and decision-making authority from the center of the organization to the front line. Renowned American sociologist William Julius Wilson takes a look at the social transformation of inner city ghettos, offering a sharp evaluation of the convergence of race and poverty. Rejecting both conservative and liberal interpretations of life in the inner city, Wilson offers essential information and a number of solutions to policymakers. The Truly Disadvantaged is a wide-ranging examination, looking at the relationship between race, employment, and education from the 1950s onwards, with surprising and provocative findings. This second edition also includes a new afterword from Wilson himself that brings the book up to date and offers fresh insight into its findings. "The Truly Disadvantaged should spur critical thinking in many quarters about the causes and possible remedies for inner city poverty. As policymakers grapple with the problems of an enlarged underclass they—as well as community leaders and all concerned Americans of all races—would be advised to examine Mr. Wilson's incisive analysis."—Robert Greenstein, New York Times Book Review

Sport is big business! As the world of sport continues to grow, there is a great need for the sport manager to have a working knowledge of business practices and financial management. The sport manager must assume a proactive role in dealing with the financial aspects of their organisations. The challenges of financing small and large sport organisations are daunting in the uncertain economy sport managers face today. An entrepreneurial approach is absolutely necessary to be a successful sport manager. The development and financing of new programs, facilities, and revenue streams is essential for the organisation to be successful. Customers, clients and spectators demand quality service at sport venues. The task of all sport managers is to provide an enjoyable sport experience for everyone. The book started out as a team project to develop a standard format for information to be covered in an undergraduate sport finance course that would meet all the standards established by the National Association for Sport and Physical Education (NASPE), North American Society for Sport Management (NASSM), and the Council on Sport Management Accreditation (COSMA). After a number of years in developing the course materials, it was obvious that the team should convert the basic work into a sport finance textbook. This book is now in its second edition. This edition has 26 chapters divided into six parts.
