Jerry Wellington discusses the major issues in science education today - such questions as the balance of content and process in the curriculum, the role of practical work and the nature of science as a subject - and uses this discussion to support a very practical resource for teachers in training and their mentors. The book covers every aspect of science teaching, including: Planning Differentiation and special needs Assessment Practical work Problem solving and investigations IT in science Handling sensitive issues, e.g. sex education Building on children's prior learning Throughout, Wellington's guidance is accompanied by suggestions for discussion, activities for individual and group use and annotated lists of further reaing aimed at helping the reader to build up a personal approach to the teaching of the subject. Students will also be helped by the glossaries of specialist terminology at the end of each chapter and by the references to National Curriculum attainment targets at every point in the book.GCSE Success AQA Additional Science Revision GuideLetts and LonsdaleHelps students manage their revision and prepare for exams efficiently. This title offers content that is broken into manageable sections. It provides exam tips and techniques to support students in the revision process.Gcse Success Workbook FrenchLetts and LonsdaleHelps students to test their knowledge and gain crucial exam practice.The Sutherland InquiryThe Stationery OfficeThe Sutherland Inquiry, (HCP 62, session 2008-09, ISBN 9780102958393), is an independent inquiry remitted by the Office of the Qualifications and Examinations Regulator (Ofqual) and

the Secretary of State for Children, Schools and Families, into the delivery of the National Curriculum tests in 2008. In July 2008, 1.2 million pupils heard that their National Curriculum test results would be delayed. The test delivery service represented a failure in customer delivery service, to the pupils, schools and also the markers upon whom the National Curriculum testing regime relies. The primary responsibility must therefore rest with the American organisation, ETS Global BV (ETS), which won the public contract to deliver the tests and failed its customers. This report examines how this organisation secured the contract, what its plans were, and why its systems and process as a whole were not properly tested. The report will also describe how ETS's systems failed during the test delivery process. There was also a failure on the part of the Government's Non-Departmental Public Body, the Qualifications and Curriculum Authority to deliver its remit. The report also sets out the procurement process that QCA used to select its delivery supplier, ETS, and how it managed the contract. The report sets out a number of recommendations on how test delivery can improve in future years, and has set out a number of key priorities, including: that the delivery process of the National Curriculum tests should be modernised and improved, in consultation with the marking community, including piloting online marking; that whatever process is used should be thoroughly piloted and project managed to ensure schools and pupils get their results on time; that the customer service provided to markers must be vastly improved to ensure that they are properly supported and are able to access up-to-date information.Maths Foundation WorkbookLetts and LonsdaleThis volume covers the 2006 GCSE maths specifications, since the elimination of the intermediate level that has been absorbed by the Higher and Foundation level.GCSE Core Science FoundationLetts and LonsdaleThis volume covers the 2006 Gateway Science specification for all exam boards - AQA, Edexcel and OCR. The content emphasises the shift from fact learning to investigating and understanding how science works, making it more exciting, up-to-date and relevant to everyday life.Maths Higher-Letts and LonsdaleThis volume covers the 2006 maths specifications for all exam boards, since the elimination of the intermediate level that has been absorbed by the Higher and Foundation levels. The text is laid out in 'sound bite' boxes to aid recollection, with clearly labelled diagrams to add visual clarity and further demonstrate the subject matter.Learning to Teach in the Secondary SchoolRoutledgeThis best-selling textbook offers a sound and practical introduction to the skills needed to gain Qualified Teacher Status, and will help student-teachers to develop the qualities that lead to good practice and a successful future in educationNumeracy for TeachingSAGE`Comprises a very helpful resource for students who are obliged to succeed in passing the QTS numeracy test in order to gain QTS. It should provide a valuable resource for students to increase their confidence as well as their competence' - Mathematics in Schools`The stated aim of this book is to help teacher-trainees prepare for the numeracy test all new entrants to the profession now have to pass. Any trainee worried about the test should find this a useful resource.... As in similar books by Derek Haylock, the mathematical content is written in a clear and accessible style' - Mike Askew, Times Educational Supplement Quotes from the author's students`The book is excellent. I think it will present students and others with a valuable resource, not only to help with the QTS test, but also for teaching. I could see myself using it on "dip-in-as-necessary" basis.`The practice questions were really helpful for checking and consolidating learning. The material was useful for the QTS test, particularly the mental calculations. Many thanks for letting me work through your sample material. I cannot begin to tell you how much more I have learnt! This has definitely made me feel more confident about passing the QTS numeracy skills test! I have definitely demonstrated to myself from this material that my ability to complete calculations mentally has increased. I can calculate faster and with some accuracy now!`Comprises a very helpful resource for students who are obliged to succeed in passing the QTS numeracy test in order to gain QTS. It should provide a valuable resource for students to increase their confidence as well as their compe-

tenance' - Mathematics in Schools This book is designed to help teacher-trainees prepare for the Qualified Teaching Standards numeracy test that must now be passed by all entrants to the teaching profession. The author focuses especially on weaknesses in numeracy often observed in adults, and in teacher-trainees in particular. As far as possible, this mathematics is set in the professional context of teaching, drawing on statistics and other data from individual schools, the DfEE and the Qualifications and Curriculum Agency (QCA).

This volume contains everything students need to know for Key Stage 3 foundation science. The text is laid out in 'sound bite' boxes to aid recollection, with clearly labelled diagrams to add visual clarity and further demonstrate the subject matter.

This workbook offers accessible practice to help manage GCSE Science revision and prepare for the exam efficiently. The content is broken into manageable sections and advice is given to help build confidence. Tips and techniques provide support throughout the revision process.

This volume covers the 2006 Gateway Science specification for all exam boards - AQA, Edexcel and OCR. The content emphasises the shift from fact learning to investigating and understanding how science works, making it more exciting, up-to-date and relevant to everyday life.

This revision guide for Key Stage 3 science contains in-depth course coverage and advice on how to get the best results in the Year 9 National Test. It has progress check questions and exam practice questions.
