LMRA-First is an application that enables you to control and direct the safety process. The LMRA First solution enables supervisors to give their guidance and support within minutes of an occurrence (for example through SMS). Safety conditions are first evaluated and approved before work can start. LMRA Last Minute Risk Analysis – Eine wesentliche Neuerung der SCC Version 2011 Auf der Internet-seite der DGMK finden Sie eine ausführliche Gegenüberstellung der alten SCC Checkliste (Dokument 003, Version 2006) mit der neuen SCC Checkliste (Dokument 003, Version 2011). LAST MINUTE RISK ANALYSIS (LMRA) It’s a final and short assessment at the work place of any poten-tial risk involving safety, health and environment. WHY PERFORM A LMRA?

A Last Minute Risk Analysis is a short and final assessment at the workplace, filled out by workers. Of-ten a LMRA is a short checklist that has a few common subjects; safety, health and environment. The purpose of a LMRA is to create awareness and exclude potential risks. Therefore, safety procedures are in place so that hazards can be identified and eliminated in a time-ly manner. But a double-check is always necessary. Just before employees start working, a quick ex-tra safety check – also known as a last-minute risk analysis (LMRA) – is necessary. With three simple actions, you can guarantee the safety of the workplace and the surrounding area. This tool is the Last Minute Risk Assessment (LMRA). Monday – Unsafe Behaviors A high percentage of injuries are caused by at-risk behaviors. Injuries caused by unsafe actions and behavior are entire-ly preventable.
