A radical educator's paradigm-shifting inquiry into the accepted, normal demands of school, as illuminated by moving portraits of four young "problem children" In this dazzling debut, Carla Shalaby, a former elementary school teacher, explores the everyday lives of four young "troublemakers," challenging the ways we identify and understand so-called problem children. Time and again, we make seemingly endless efforts to moderate, punish, and even medicate our children, when we should instead be concerned with transforming the very nature of our institutions, systems, and structures, large and small. Through delicately crafted portraits of these memorable children—Zora, Lucas, Sean, and Marcus—Troublemakers allows us to see school through the eyes of those who know firsthand what it means to be labeled a problem. From Zora's proud individuality to Marcus's open willfulness, from Sean's struggle with authority to Lucas's tenacious imagination, comes profound insight—for educators and parents alike—into how schools engender, exclude, and then try to erase trouble, right along with the young people accused of making it. And although the harsh disciplining of adolescent behavior has been called out as part of a school-to-prison pipeline, the children we meet in

these pages demonstrate how a child's path to excessive punishment and exclusion in fact begins at a much younger age. Shalaby's empathetic, discerning, and elegant prose gives us a deeply textured look at what noncompliance signals about the environments we require students to adapt to in our schools. Both urgent and timely, this paradigm-shifting book challenges our typical expectations for young children and with principled affection reveals how these demands—despite good intentions—work to undermine the pursuit of a free and just society.

Alex just has to convince his mom to let him have an iguana, so he puts his arguments in writing. He promises that she won't have to feed it or clean its cage or even see it if she doesn't want to. Of course Mom imagines life with a six-foot-long iguana eating them out of house and home. Alex's reassurances: It takes fifteen years for an iguana to get that big. I'll be married by then and probably living in my own house. and his mom's replies: How are you going to get a girl to marry you when you own a giant reptile? will have kids in hysterics as the negotiations go back and forth through notes. And the lively, imaginative illustrations show their polar opposite dreams of life with an iguana.

I have made this Phonics Letter of the Week unit to address the Kindergarten(Prep) level of learning. The contents of this packet provide teachers with a variety of games, activities and worksheets to help teach correct letter formation, written letter identification and recognition of initial letter sound. My aim when creating this book was to provide a unit for teaching one letter of the alphabet at a time. There is a great emphasis on letter sounds, which makes this an ideal tool for phonics teaching. There are 30 games, activities and worksheets that can be used to help you teach the letter Bb at the beginning of the year and to reinforce and consolidate what has been learnt throughout the year.
