the role of insurance as a risk management mechanism in livestock and aquaculture enterprises. With the focus of the book being on enterprises in developing countries, most attention is given to livestock (especially cattle, sheep, goats, poultry) kept for food and/or fibre, and transport/motive

Livestock and Aquaculture Insurance in Developing Countries

In North America, aquaculture insurance is treated similarly to agriculture crop and livestock insurance. The agricultural insurance programme in the United States is complex and heavily subsidized (Skees, 2000), and its traditional crop insurance programme has grown from insuring only losses from shortfalls in crop yields to insuring losses in gross revenue.

Review of the current state of world aquaculture insurance

Bangladesh : Policy Options for Crop and Livestock and Aquaculture Insurance (English) Abstract. Agriculture is a key sector in Bangladesh, but it is highly exposed to risks. While agriculture is a source of employment and livelihood for nearly one in two adults in Bangladesh and contributes about 16 percent to GDP, it is highly exposed to natural...
