
File Type PDF March Controlled Test 2014 Geography Paper 1 Memo

Recognizing the showing off ways to acquire this ebook **March Controlled Test 2014 Geography Paper 1 Memo** is additionally useful. You have remained in right site to begin getting this info. get the March Controlled Test 2014 Geography Paper 1 Memo join that we provide here and check out the link.

You could purchase lead March Controlled Test 2014 Geography Paper 1 Memo or get it as soon as feasible. You could speedily download this March Controlled Test 2014 Geography Paper 1 Memo after getting deal. So, as soon as you require the books swiftly, you can straight acquire it. Its for that reason extremely simple and thus fats, isnt it? You have to favor to in this manner

CBSBJA - KNOX DIAZ

This book addresses the ways in which individualised, market-based models of disability support provision have been mobilised in and across different countries through cross-national investigation of individualised funding (IF) as an object of neoliberal policy mobility. Combining rich theoretical and interdisciplinary perspectives with extensive empirical research, the book provides a timely examination of the policy processes and mechanisms driving the spread of IF amongst countries at the forefront of disability policy reform. It is argued that IF's mobility is not attributable to neoliberalism alone, but to the complex intersections between neoliberal and emancipatory agendas, and to the transnational networks that have blended the two agendas in new ways in different institutional contexts. The book shows how disability rights struggles have synchronised with neoliberal agendas, which explains IF's propensity to move and mutate between different jurisdictions. Featuring first-hand accounts of the activists and advocates engaged in these struggles, the book illuminates the consequences and risks of the dangerous liaisons and political trade-offs that seemed necessary to get individualised funding on the policy agenda for disabled people. It will be of interest to all scholars and students working in disability studies, social policy, sociology and political science more generally.

This book provides a fresh approach to understanding the origins and possible future direction of the Northeast Asia "history wars." Leading scholars in history, literary studies, and education present the complex issue in a historical context by assessing its political and cultural dimensions, particularly with regards to relations between Japan and Korea. Their essays also touch on the significance of civil society efforts to advance peaceful reconciliation and the social and political forces that have worked to frustrate such efforts since 1945. At its core, this volume explores the political significance in the gap between Korean and Japanese civil society versus governmental efforts to resolve issues lingering from the Pacific War in Asia; the significance of cultural as well as political efforts to understanding historical and contemporary relations among Northeast Asian neighboring states; and specific factors—such as textbook reform, revised school curricula, and civil society education efforts—that are working to ameliorate the heretofore deadlocked "history wars."

Which public and whose space? The understanding of public space as an arena where individuals can claim full use and access hides a reality of constant negotiation, conflict and surveillance. This collection uses case studies concerning the management, use, and transgression of public space to invite reflection on the way in which everyday social interaction is framed and shaped by the physi-

cal environment and vice versa. International experts from fields including geography, criminology, sociology and urban studies come together to debate the concepts of order and conflict in public space. This book is divided into two parts: spaces of control, and spaces of transgression. Section I focuses on formal and informal surveillance and the politics of control, using case studies to compare strategies in spaces including Olympic cities, luxury skyscrapers, residential neighbourhoods and shopping malls. Section II focuses on transgressive or deviant behaviour in public spaces, with case studies examining behaviour in nightlife districts, governance of homelessness, boy-racer culture and abortion protests. The epilogue concludes the book with an exploration of possible future avenues for research on public space, and a critical appraisal of the concept of public space itself. This interdisciplinary collection will be of interest to students, researchers and professionals in the areas of criminology, sociology, surveillance studies, human and social geography, and urban studies and planning.

Pulmonary rehabilitation programmes are a fundamental part of the clinical management of patients with chronic respiratory diseases. This comprehensive reference book places pulmonary rehabilitation within the wider framework of respiratory disease. Now in six parts, it includes new sections on the development of PR as a discipline, global perspectives on quality control, new chapters on early PR post exacerbation and personalized rehabilitation, innovative approaches to exercise, PR in interstitial lung disease and lung transplantation, and the latest research into the application of music, dance and yoga. Key Features Global contributions compare practice around the world where differences have developed. New six Part structure covers new approaches to exercise testing, interstitial lung diseases and other diseases, and add-on interventions drawing on new technologies. Contains recommendations of the large collaborative ERS/ATS task forces on guidelines for PR as well as suggested policies for its implementation and use. Covers the important topic of balance impairment as a focus of rehabilitation for the at-risk patient and a new chapter on monitoring physical activity. The voices of patients and caregivers describe the impact of chronic respiratory disease on their lives. Features an exclusive chapter on COVID-19 that discusses the short- and long-term pathophysiological consequences, provides information about the potential role of physiotherapy in the management of hospitalized patients with confirmed or suspected COVID-19, and details on who, where, and how to deliver programs to COVID-19 and non COVID-19 patients in the lockdown and post lockdown era.

This Handbook offers an insightful and comprehensive overview from a geographic perspective of the numerous and varied technologies that are shaping the contemporary world. It shows how geog-

raphy and technology are intimately linked by examining the origins, growth, and impacts of 27 different technologies and highlighting how they influence the structure and spatiality of society.

Given the centrality of Hague Law to the lawful prosecution of warfare, the relative paucity of dedicated works is surprising. The general formulation of Hague Law rules is largely uncontroversial, but this clarity stands in stark contrast to their interpretation and practical application. How precisely, for instance, the fundamental rules of distinction and proportionality in attack are to dictate and constrain the planning and practice of warfare continues to be highly uncertain. This important new publication fills the gap in the literature. Offering a comprehensive assessment of Hague Law, it explores questions of definitions and accountability and navigates the substantive rules and their application to different types of warfare.

Of all of the lies, fragile alliances, and predatory financial dealings that have been revealed in the wake of the Global Financial Crisis of 2008, we have yet to come to terms with the ways in which structural inequalities around gender and race factor into (and indeed make possible) the current economic order. *Scandalous Economics* is about "silences" - the astonishing neglect of gender and race in explanations of the Global Financial Crisis. But, it is also about "noises" - the sexual scandals and gendered austerity policies that have relegated public debate, and the crisis itself, into political oblivion. While feminist economists and movements such as Occupy Wall Street have pointed to the distributional inequalities that are an effect of financial deregulation, scholars haven't really grappled with the representational inequalities inherent in the way we view the politics of the market. For example, capitalism won't be made more equitable simply by appointing women to leadership positions within financial firms or corporations. And the next crisis will not be averted if our understandings of gendered inequalities are framed by sexual scandals in media and popular culture. We need to look at the activities and the privileges of the advantaged - the "TED women" of the crisis -- as much as the victimization of the disadvantaged - to fully grasp the interplay between gender and economy in this fragile age of restoration. *Scandalous Economics* breaks new ground by doing precisely this. It argues that normalization of the post-GFC economic order in the face of its obvious breakdown(s) has been facilitated by co-optation of feminist and queer perspectives into national and international responses to the crisis. *Scandalous Economics* builds upon the Occupy movement and other critical analysis of the GFC to comprehensively examine gendered material, ideational and representational dimensions that have served to make the crisis and its effects, 'the new normal' in Europe and America as well as Latin America and Asia.

This book covers the history of cocoa and chocolate from its origins in Central America to the recent consumption boom in emerging markets and the growing importance of sustainable sourcing of cocoa and the demand for high quality specialty chocolate. It analyzes the role of the industrial revolution, the determinants of consumers' choices, and how governments have regulated the chocolate industry. It studies the complex structure of the global cocoa-chocolate value chain, the development and trade implications for rich consumers and poor producers.

The Geography of Beer Culture and Economics Springer Nature

One of the few bestselling introductory criminal justice texts written by professors who actively teach the course to large numbers of undergraduates each year, *INTRODUCTION TO CRIMINAL JUSTICE* is uniquely attuned to the needs of today's students and instructors. Now in its sixteenth edi-

tion and known for its authoritative, solidly researched content, Siegel and Worrall's text delivers comprehensive, cutting-edge coverage of criminal justice. Extremely student friendly, the text's balanced and objective presentation is packed with provocative real-world examples and the latest developments from the field. Crisp writing, complemented by vivid illustrations, deftly guides readers through the intricate workings of the police, courts, and correctional systems; the concepts and processes of justice; and key policy issues. The book also includes an emphasis on today's criminal justice careers, offering insights from numerous professionals on the rewards and realities of their jobs. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

This unique culinary history of America offers a fascinating look at our past and uses long-forgotten recipes to explain how eight flavors changed how we eat. The United States boasts a culturally and ethnically diverse population which makes for a continually changing culinary landscape. But a young historical gastronomist named Sarah Lohman discovered that American food is united by eight flavors: black pepper, vanilla, curry powder, chili powder, soy sauce, garlic, MSG, and Sriracha. In *Eight Flavors*, Lohman sets out to explore how these influential ingredients made their way to the American table. She begins in the archives, searching through economic, scientific, political, religious, and culinary records. She pores over cookbooks and manuscripts, dating back to the eighteenth century, through modern standards like *How to Cook Everything* by Mark Bittman. Lohman discovers when each of these eight flavors first appear in American kitchens—then she asks why. *Eight Flavors* introduces the explorers, merchants, botanists, farmers, writers, and chefs whose choices came to define the American palate. Lohman takes you on a journey through the past to tell us something about our present, and our future. We meet John Crowninshield a New England merchant who traveled to Sumatra in the 1790s in search of black pepper. And Edmond Albius, a twelve-year-old slave who lived on an island off the coast of Madagascar, who discovered the technique still used to pollinate vanilla orchids today. Weaving together original research, historical recipes, gorgeous illustrations and Lohman's own adventures both in the kitchen and in the field, *Eight Flavors* is a delicious treat—ready to be devoured.

The Geography of Beer Culture and Economics Springer Nature This book builds on the highly successful *Geography of Beer: Regions, Environment, and Society* (2014) and investigates the geography of beer from two expanded perspectives: culture and economics. The respective chapters provide case studies that illustrate various aspects of these themes. As the beer industry continues to reinvent itself and its economic and cultural geographies, this book showcases historical, current, and future trends at the local, regional, national, and international scales. *Assessment in Geographical Education: An International Perspective* Springer Nature *Order and Conflict in Public Space* Routledge Which public and whose space? The understanding of public space as an arena where individuals can claim full use and access hides a reality of constant negotiation, conflict and surveillance. This collection uses case studies concerning the management, use, and transgression of public space to invite reflection on the way in which everyday social interaction is framed and shaped by the physical environment and vice versa. A Geography of Infection Spatial Processes and Patterns in Epidemics and Pandemics Oxford University Press Despite advances in modern medicine, the power of plagues to terrify, disrupt and bring huge swings in morbidity and mortality in their wake remains potent. A Geography of Infection explores the spatial mechanisms by which infectious diseases, such as measles and influenza, can develop into epidemics and pandemics.

Handbook on Geographies of Technology Edward Elgar Publishing This Handbook offers an insightful and comprehensive overview from a geographic perspective of the numerous and varied technologies that are shaping the contemporary world. It shows how geography and technology are intimately linked by examining the origins, growth, and impacts of 27 different technologies and highlighting how they influence the structure and spatiality of society.

The Routledge Companion to the Geography of International Business Routledge The fields of Economic Geography and International Business share an interest in the same phenomena, whilst each provides both a differing perspective and different research methods in attempting to understand those phenomena. The Routledge Companion to the Geography of International Business explores the nature and scope of inter-disciplinary work between Economic Geography and International Business in explaining the central issues in the international economy. Contributions written by leading specialists in each field (including some chapters written by inter-disciplinary teams) focus on the nature of multinational firms and their strategies, where they choose to locate their activities, how they create and manage international networks and the key relationships between multinationals and the places where they place their operations. Topics covered include the internationalisation of service industries, the influence of location on the competitiveness of firms and the economic dynamism of regions and where economic activity takes place and how knowledge, goods and services flow between locations. The book examines the areas for fruitful inter-disciplinary work between International Business and Economic Geography and sets out a road map for future joint research, and is an essential resource for students and practitioners of International Business and Economic Development.

CCEA A-level Geography Student Guide 5: A2 Philip Allan Exam Board: CCEA Level: A-level Subject: Geography First Teaching: September 2016 First Exam: June 2018 Reinforce students' geographical understanding throughout their course; clear topic summaries with sample questions and answers help students improve their exam technique and achieve their best. Written by a teacher with extensive examining experience, this guide: - Helps students identify what they need to know with a concise summary of the topics examined at AS and A-level - Consolidates understanding through assessment tips and knowledge-check questions - Offers opportunities for students to improve their exam technique by consulting sample graded answers to exam-style questions - Develops independent learning and research skills - Provides the content students need to produce their own revision notes-

Magbook India & World Geography for Civil services prelims/state PCS & other Competitive Exam 2022 Arihant Publications India limited 1. Magbook series deals with the preliminary examinations for civil series. 2. It's a 2 in 1 series offers advantages of both Magazine and book. 3. The entire syllabus of Indian and World Geography divided into 24 Chapters. 4. Focuses on the Topics and Trends of question asked in Previous Years? Questions. 5. Offers Chapterwise Practice and well detailed explanations the previous Years? questions. 6. More than 3000 MCQs for the revision of the topics. 7. 5 Practice sets and 2 Previous Years solved Papers sets for thorough practice. 8. The book uses easy language for quick understanding. Fresh and New like a Magazine, Deep & Comprehensive like a book... Here's presenting the revised edition of Magbook Indian and World Geography that is designed to provide complete syllabus of general studies' portion of the UPSC and State PCS examination. Serving as resource book, it proves to be an extremely useful tool for the aspirants as the book is divided into 24 Chapters covering all the topics in a concise and note format. Apart from paying attention to theories, sheer focus is given to the topics & trends of Questions provided in previous years' civil services exams, Chapterwise practice questions are also mentioned to help students in easy remembrance and quick revision and lastly, Subjectwise detailed explanations of previous civil services exams. Including topical coverage of syllabus and previous years' questions with more than 3000 MCQs, this Magbook of Indian and World Geography is a must for civil services (Pre) Examination, state PCS and other competitive exams. TOC India and world Geography - The universe and the solar system, the Earth, Geomorphology, Geomorphology II, Climatology, Oceanography, Biogeography, human Geography, economic Geography, continents, India: physical aspects, Indian Agriculture, industrial features of India, transport, trade and Communication in India, India cultural settings, urbanisation in India, ecology and diversity - ecology: basic concepts, environment, diversity and its conservation, climate change, disaster Management, sustainable development, practice sets (1-5), previous years' solved papers 1, Previous years' solved papers 2

The U.S.-China Military Scorecard Forces, Geography, and the Evolving Balance of Power, 1996-2017 Rand Corporation A RAND study analyzed trends in the development of Chinese and U.S. military capabilities in two scenarios (centered on Taiwan and the Spratly Islands) and multiple types of operations from 1996 to 2017. Consumers, Corporations, and Public Health A Case-Based Approach to Sustainable Business Oxford University Press The public health footprint associated with corporate behavior has come under increased scrutiny in the last decade, with an increased expectation that private profit not come at the expense of consumer welfare. Consumers, Corporations, and Public Health assembles 17 case studies at the intersection of business and public health to illustrate how each side can inform and benefit the other. Through contemporary examples from a variety of industries and geographies, this collection provides students with an appreciation for the importance of consumer empowerment and consumer behavior in shaping both health and corporate outcomes.

In Sickness and in Wealth Migration, Gendered Morality, and Central Java Indiana University Press An expert in migration studies examines the cultural context of villages in Central Java and their influence on those who pursue migrant labor. Villagers in Indonesia hear a steady stream of stories about the injuries, abuses, and even deaths suffered by those who migrate in search of work. So why do hundreds of thousands of Indonesian workers continue to migrate every year? Carol Chan explores this question from the perspective of the origin community and provides a fascinating look at how gender, faith, and shame

shape these decisions to migrate. Chan reveals how villagers evaluate men's and women's migrations differently. This disparity leads to different ideas about which kinds of human or financial flows should be encouraged and which should be discouraged or even criminalized. Despite routine and well-documented instances of exploitation of Indonesian migrant workers, some villagers still emphasize that a migrant's success or failure ultimately depends on that individual's morality, fate, and destiny. Indonesian villagers construct strategies for avoiding migration-related risks that are closely linked to faith and belief in supernatural agency. These strategies shape the flow of migration from the country and help to ensure the continued confidence Indonesian people have in migration as an act of promise and hope.

The Geography of South Africa: Contemporary Changes and New Directions Springer This edited collection examines contemporary directions in geographical research on South Africa. It encompasses a cross section of selected themes of critical importance not only to the discipline of Geography in South Africa, but also of relevance to other areas of the Global South. All chapters are original contributions, providing a state of the art research baseline on key themes in physical, human and environmental geography, and in understanding the changing geographical landscapes of modern South Africa. These contributions set the scene for an understanding of the relationships between modern South Africa and the wider contemporary world, including issues of sustainable development and growth in the Global South.

All Hell Breaking Loose The Pentagon's Perspective on Climate Change Metropolitan Books All Hell Breaking Loose is an eye-opening examination of climate change from the perspective of the U.S. military. The Pentagon, unsentimental and politically conservative, might not seem likely to be worried about climate change—still linked, for many people, with polar bears and coral reefs. Yet of all the major institutions in American society, none take climate change as seriously as the U.S. military. Both as participants in climate-triggered conflicts abroad, and as first responders to hurricanes and other disasters on American soil, the armed services are already confronting the impacts of global warming. The military now regards climate change as one of the top threats to American national security—and is busy developing strate-

gies to cope with it. Drawing on previously obscure reports and government documents, renowned security expert Michael Klare shows that the U.S. military sees the climate threat as imperiling the country on several fronts at once. Droughts and food shortages are stoking conflicts in ethnically divided nations, with "climate refugees" producing worldwide havoc. Pandemics and other humanitarian disasters will increasingly require extensive military involvement. The melting Arctic is creating new seaways to defend. And rising seas threaten American cities and military bases themselves. While others still debate the causes of global warming, the Pentagon is intensely focused on its effects. Its response makes it clear that where it counts, the immense impact of climate change is not in doubt.

Community Quality-of-Life Indicators: Best Cases VIII Springer Nature This book offers critical insights into the thriving international field of community indicators, incorporating the experiences of government leaders, philanthropic professionals, community planners and a wide range of academic disciplines. It illuminates the important role of community indicators in diverse settings and the rationale for the development and implementation of these innovative projects. This book details many of the practical "how to" aspects of the field as well as lessons learned from implementing indicators in practice. The case studies included here also demonstrate how, using a variety of data applications, leaders of today are monitoring and measuring progress and communities are empowered to make sustainable improvements in their wellbeing. With examples related to the environment, economy, planning, community engagement and health, among others, this book epitomizes the constant innovation, collaborative partnerships and the consummate interdisciplinarity of the community indicators field of today.

Food and Poverty: Food Insecurity and Food Sovereignty among America's Poor Vanderbilt University Press Food insecurity rates, which skyrocketed with the Great Recession, have yet to fall to pre-recession levels. Food pantries are stretched thin, and states are imposing new restrictions on programs like SNAP that are preventing people from getting crucial government assistance. At the same time, we see an increase in obesity that results from lack of access to healthy foods. The poor face a daily choice between paying bills and paying for food.

The Economics of Chocolate Oxford University Press This book covers the history of cocoa and chocolate from its origins in Central America to the recent consumption boom in emerging markets and the growing importance of sustainable sourcing of cocoa and the demand for high quality specialty chocolate. It analyzes the role of the industrial revolution, the determinants of consumers' choices, and how governments have regulated the chocolate industry. It studies the complex structure of the global cocoa-chocolate value chain, the development and trade implications for rich consumers and poor producers.

Managing China's Energy Sector Between the Market and the State Routledge Since China has now become the world's largest energy consumer, its energy sector has understandably huge implications for the global economy. This book examines the transformation of China's conventional and renewable energy sectors, with special attention to state-business relations. Two studies examine the development of China's energy profile, especially China's renewable energy. Two others explore governmental relations with state-owned enterprises (SOEs) and their reform. Despite drastic restructuring in the late 1990s, SOEs continue their oligopolistic control of the oil and gas sectors and even overshadow the stock market. Three studies investigate the factors that help propel the expansion of China's conventional energy firms, as well as those producing renewable energy (i.e. solar PV industry). A study of China's solar PV industry suggests that China's governmental support for it has evolved from subsidising production (a "mercantile" stage aimed at expanding the industry's global production and export share) to subsidising the demand side (aiming at expanding domestic demand and absorbing redundant manufacture capacity). Another review of this industry finds that firms tend to pay heavy attention to extra-firm institutional network relationships both inside and outside China, and that buyer-supplier networks are influenced by extra-local managerial education. The final chapter compares China's provinces and their embedded carbon-footprints per capita in urban areas from a consumption perspective, using a self-organizing feature map (SOFM) model. This book was originally published as a special issue of the Asia Pacific Business Review.

Fish Sticks, Sports Bras, & Aluminum The Politics of Everyday Technologies Johns Hopkins University Press + ORMA revealing look at the history, politics, and social meanings behind everyday objects. Who would have guessed that the first sports bra was made out of two jockstraps sewn together or that it succeeded because of federal anti-discrimination laws? What do simple decisions about where to build a road or whether to buy into the carbon economy have to do with Hurricane Katrina or the Fukushima nuclear disaster? How did massive flood control projects on the Mississippi River and New Deal dams on the Columbia River lead to the ubiquity of high fructose corn syrup? And what explains the creation—and continued popularity—of the humble fish stick? In *Fish Sticks, Sports Bras, and Aluminum Cans*, historian Paul R. Josephson explores the surprising origins, political contexts, and social meanings of ordinary objects. Drawing on archival materials, technical journals, interviews, and field research, this engaging collection of essays reveals the forces that shape (and are shaped by) everyday objects. Ultimately, Josephson suggests that the most familiar and comfortable objects—sugar and aluminum, for example, which are inextricably tied together by their linked history of slavery and colonialism—may have the more astounding and troubling origins. Students of consumer studies and the history of technology, as well as scholars and general readers, will be captivated by Josephson's insights into the complex relationship between society and technology. "Josephson's conclusions are guaranteed to make you think of the modern world and its interconnectedness in a different light." —Cosmos "Every chapter of this book offers surprising insights and is a pleasure to read." —ICON

Woman: An Intimate Geography (Revised and Updated) Hachette UK WOMAN explores the essence of what it means to be female. In mapping the inner woman - from organs to orgasms - Natalie Angier presents an extraordinary new vi-

sion of the female body as an evolutionary masterpiece. 'Anyone living in or near a female body should read this book' - Gloria Steinem 'Women have long been regarded as slaves to biology and evolution, prisoners in a hormonal swamp. But now, some of the sacred tenets of evolutionary psychology . . . have come under fresh challenge. As the century turns, it could be Goodbye women's lib; hello female liberation! . . . WOMAN is a delicious cocktail of estrogen and amphetamine designed to pump up the ovaries as well as the cerebral cortex' - Barbara Ehrenreich, Time magazine 'Drawing on science, literature and history, Angier provides valuable insight into the power of hormones, breast milk and the all-important clitoris. A must for every woman's bookshelf' - Woman's Journal

Department of Defense Authorization for Appropriations for Fiscal Year 2014 and the Future Years Defense Program Hearings Before the Committee on Armed Services, United States Senate, One Hundred Thirteenth Congress, First Session, on S. 1197, to Authorize Appropriations for Fiscal Year 2014 for Military Activities of the Department of Defense, for Military Construction, and for Defense Activities of the Department of Energy, to Prescribe Military Personnel Strengths for Such Fiscal Year, and for Other Purposes Afghanistan Under Siege The Afghan Body and the Postcolonial Border Bloomsbury Publishing In this book, based on field work undertaken in Afghanistan itself and through engagement with postcolonial theory, Bojan Savic critiques western intervention in Afghanistan by showing how its casting of Afghan natives as "dangerous" has created a power network which fractures the country - in echoes of 19th and 20th century colonial powers in the region. Savic also offers an analysis of how and by what means global security priorities have affected Afghan lives.

Mobile Media Making in an Age of Smartphones Springer With the rise of smartphones and the proliferation of applications, the ways everyday media users and creative professionals represent, experience, and share the everyday is changing. This collection reflects on emergent creative practices and digital ethnographies of new socialities associated with smartphone cameras in everyday life.

Department of Defense Authorization for Appropriations for Fiscal Year 2014 and the Future Years Defense Program, Part 7, S. Hrg. 113-108, Pt. 7, Hearings Through Post-Atomic Eyes McGill-Queen's Press - MQUP What does it mean to live in a post-atomic world? Photography and contemporary art offer a provocative lens through which to comprehend the by-products of the atomic age, from weapons proliferation, nuclear disaster, and aerial surveillance to toxic waste disposal and climate change. Confronting cultural fallout from the dawn of the nuclear age, *Through Post-Atomic Eyes* addresses the myriad iterations of nuclear threat and their visual legacy in the twentieth and twenty-first centuries. Whether in the iconic black-and-white photograph of a mushroom cloud rising over Nagasaki in 1945 or in the steady stream of real-time video documenting the 2011 meltdown at the Fukushima Daiichi nuclear power plant, atomic culture - and our understanding of it - is inextricably constructed by the visual. This book takes the image as its starting point to address the visual inheritance of atomic anxieties; the intersection of photography, nuclear industries, and military technocultures; and the complex temporality of nuclear technologies. Contemporary artists contribute lens-based works that explore the consequences of the nuclear, and its afterlives, in the Anthropocene. Revealing, through both art and prose, startling new connections between the ongoing threat of nuclear catastrophe and current global crises, *Through Post-Atomic Eyes* is a richly illustrated examination of how photography shapes and is shaped by nuclear culture.

Work Rules! Insights from Inside Google That Will Transform How You Live and Lead Twelve From the visionary head of

Google's innovative People Operations comes a groundbreaking inquiry into the philosophy of work - and a blueprint for attracting the most spectacular talent to your business and ensuring that they succeed. "We spend more time working than doing anything else in life. It's not right that the experience of work should be so demotivating and dehumanizing." So says Laszlo Bock, former head of People Operations at the company that transformed how the world interacts with knowledge. This insight is the heart of *Work Rules!*, a compelling and surprisingly playful manifesto that offers lessons including: Take away managers' power over employees Learn from your best employees-and your worst Hire only people who are smarter than you are, no matter how long it takes to find them Pay unfairly (it's more fair!) Don't trust your gut: Use data to predict and shape the future Default to open-be transparent and welcome feedback If you're comfortable with the amount of freedom you've given your employees, you haven't gone far enough. Drawing on the latest research in behavioral economics and a profound grasp of human psychology, *Work Rules!* also provides teaching examples from a range of industries-including lauded companies that happen to be hideous places to work and little-known companies that achieve spectacular results by valuing and listening to their employees. Bock takes us inside one of history's most explosively successful businesses to reveal why Google is consistently rated one of the best places to work in the world, distilling 15 years of intensive worker R&D into principles that are easy to put into action, whether you're a team of one or a team of thousands. *Work Rules!* shows how to strike a balance between creativity and structure, leading to success you can measure in quality of life as well as market share. Read it to build a better company from within rather than from above; read it to reawaken your joy in what you do. 'History Wars' and Reconciliation in Japan and Korea *The Roles of Historians, Artists and Activists* Springer This book provides a fresh approach to understanding the origins and possible future direction of the Northeast Asia "history wars." Leading scholars in history, literary studies, and education present the complex issue in a historical context by assessing its political and cultural dimensions, particularly with regards to relations between Japan and Korea. Their essays also touch on the significance of civil society efforts to advance peaceful reconciliation and the social and political forces that have worked to frustrate such efforts since 1945. At its core, this volume explores the political significance in the gap between Korean and Japanese civil society versus governmental efforts to resolve issues lingering from the Pacific War in Asia; the significance of cultural as well as political efforts to understanding historical and contemporary relations among Northeast Asian neighboring states; and specific factors—such as textbook reform, revised school curricula, and civil society education efforts— that are working to ameliorate the heretofore deadlocked "history wars." *Drift: Illicit Mobility and Uncertain Knowledge* Univ of California Press "This book was written late in the North American night, with the rumbling thuds and booming train horns of the nearby rail yard echoing through my windows, reminding me of the train hoppers and gutter punks out there rolling through the darkness." In *Drift*, Jeff Ferrell shows how dislocation and disorientation can become phenomena in their own right. Examining the history of drifting, Ferrell situates the contemporary global phenomenon of drift within today's economic, social, and cultural dynamics. He also highlights a distinctly North American form of drift—that of the train-hopping hobo—by tracing the hobo's political history and by sharing his own immersion in the world of contemporary train-hoppers. Along the way, Ferrell sheds light on the ephemeral intensity of drifting communities and explores the contested politics of

drift—the legal and political strategies designed to control drifters in the interest of economic development, the irony by which these strategies spawn further social and spatial exclusion, and the ways in which drifters and those who embrace drift create their own slippery strategies of resistance. With an eye toward the truth, Ferrell keenly argues that the lessons of drift can provide us with new models for knowing and engaging with the world around us. *Hague Law Interpreted: The Conduct of Hostilities under the Law of Armed Conflict* Bloomsbury Publishing Given the centrality of Hague Law to the lawful prosecution of warfare, the relative paucity of dedicated works is surprising. The general formulation of Hague Law rules is largely uncontroversial, but this clarity stands in stark contrast to their interpretation and practical application. How precisely, for instance, the fundamental rules of distinction and proportionality in attack are to dictate and constrain the planning and practice of warfare continues to be highly uncertain. This important new publication fills the gap in the literature. Offering a comprehensive assessment of Hague Law, it explores questions of definitions and accountability and navigates the substantive rules and their application to different types of warfare. *Communities in Action: Pathways to Health Equity* National Academies Press In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome. *Introduction to Criminal Justice* Cengage Learning One of the few bestselling introductory criminal justice texts written by professors who actively teach the course to large numbers of undergraduates each year, *INTRODUCTION TO CRIMINAL JUSTICE* is uniquely attuned to the needs of today's students and instructors. Now in its sixteenth edition and known for its authoritative, solidly researched content, Siegel and Worrall's text delivers comprehensive, cutting-edge coverage of criminal justice. Extremely student friendly, the text's balanced and objective presentation is packed with provocative real-world examples and the latest developments from the field. Crisp writing, complemented by vivid illustrations, deftly guides readers through the intricate workings of the police, courts, and correctional systems; the concepts and processes of justice; and key policy issues. The book also includes an emphasis on today's criminal justice careers, offering insights from numerous professionals on the rewards and realities of their jobs. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. *Creative Economies, Creative Communities: Rethinking Place, Policy and Practice* Routledge Investigating how people and places are connected into the creative economy, this volume takes a holistic view of the intersections between

community, policy and practice and how they are co-constituted. The role of the creative economy and broader cultural policy within community development is problematised and, in a significant addition to work in this area, the concept of 'place' forms a key cross cutting theme. It brings together case studies from the European Union across urban, rural and coastal areas, along with examples from the developing world, to explore tensions in universal and regionally-specific issues. Empirically-based and theoretically-informed, this collection is of particular interest to academics, postgraduates, policy makers and practitioners within geography, urban and regional studies, cultural policy and the cultural/creative industries.

Politics and Leadership in North KoreaThe Guerilla DynastyRoutledgePolitics and Leadership in North Korea, now fully updated in this second edition, presents an accessible and comprehensive account of North Korea's political, economic and foreign policies since its creation in 1945. Moving away from media representations of North Korea as dangerously erratic and dysfunctional, Adrian Buzo provides a thorough analysis of Kim Il Sung's vision for the DPRK and demonstrates the consistency of the successive leaderships' approach to politics, economics and international affairs. This second edition has been fully revised and takes into account all the important events of the last fifteen years in North Korea, such as:

- endemic food shortages;
- the steady growth of military emphasis in both politics and ideology;
- the acquisition and continued development of nuclear capabilities;
- the implementation and eventual failure of South Korea's 'sunshine policy';
- the growth of private enterprise and a consumer economy.

As such, it will continue to be an essential resource for students of North Korea, East Asian Politics and International Politics.

Pulmonary RehabilitationCRC PressPulmonary rehabilitation programmes are a fundamental part of the clinical management of patients with chronic respiratory diseases. This comprehensive reference book places pulmonary rehabilitation within the wider framework of respiratory disease. Now in six parts, it includes new sections on the development of PR as a discipline, global perspectives on quality control, new chapters on early PR post exacerbation and personalized rehabilitation, innovative approaches to exercise, PR in interstitial lung disease and lung transplantation, and the latest research into the application of music, dance and yoga. Key Features Global contributions compare practice around the world where differences have developed. New six Part structure covers new approaches to exercise testing, interstitial lung diseases and other diseases, and add-on interventions drawing on new technologies. Contains recommendations of the large collaborative ERS/ATS task forces on guidelines for PR as well as suggested policies for its implementation and use. Covers the important topic of balance impairment as a focus of rehabilitation for the at-risk patient and a new chapter on monitoring physical activity. The voices of patients and caregivers describe the impact of chronic respiratory disease on their lives. Features an exclusive chapter on COVID-19 that discusses the short- and long-term pathophysiological consequences, provides information about the potential role of physiotherapy in the management of hospitalized patients with confirmed or suspected COVID-19, and details on who, where, and how to deliver programs to COVID-19 and non COVID-19 patients in the lockdown and post lockdown era.

The New Political Economy of DisabilityTransnational Networks and Individualised Funding in the Age of NeoliberalismRoutledgeThis book addresses the ways in which individualised, market-based models of disability support provision have been mobilised in and across different countries through cross-national investigation of individualised funding (IF) as an object of neoliberal policy mobility. Combining rich theoretical and interdisciplinary per-

spectives with extensive empirical research, the book provides a timely examination of the policy processes and mechanisms driving the spread of IF amongst countries at the forefront of disability policy reform. It is argued that IF's mobility is not attributable to neoliberalism alone, but to the complex intersections between neoliberal and emancipatory agendas, and to the transnational networks that have blended the two agendas in new ways in different institutional contexts. The book shows how disability rights struggles have synchronised with neoliberal agendas, which explains IF's propensity to move and mutate between different jurisdictions. Featuring first-hand accounts of the activists and advocates engaged in these struggles, the book illuminates the consequences and risks of the dangerous liaisons and political trade-offs that seemed necessary to get individualised funding on the policy agenda for disabled people. It will be of interest to all scholars and students working in disability studies, social policy, sociology and political science more generally.

Scandalous EconomicsGender and the Politics of Financial CrisesOxford University PressOf all of the lies, fragile alliances, and predatory financial dealings that have been revealed in the wake of the Global Financial Crisis of 2008, we have yet to come to terms with the ways in which structural inequalities around gender and race factor into (and indeed make possible) the current economic order. Scandalous Economics is about "silences" - the astonishing neglect of gender and race in explanations of the Global Financial Crisis. But, it is also about "noises" - the sexual scandals and gendered austerity policies that have relegated public debate, and the crisis itself, into political oblivion. While feminist economists and movements such as Occupy Wall Street have pointed to the distributional inequalities that are an effect of financial deregulation, scholars haven't really grappled with the representational inequalities inherent in the way we view the politics of the market. For example, capitalism won't be made more equitable simply by appointing women to leadership positions within financial firms or corporations. And the next crisis will not be averted if our understandings of gendered inequalities are framed by sexual scandals in media and popular culture. We need to look at the activities and the privileges of the advantaged - the "TED women" of the crisis -- as much as the victimization of the disadvantaged - to fully grasp the interplay between gender and economy in this fragile age of restoration. Scandalous Economics breaks new ground by doing precisely this. It argues that normalization of the post-GFC economic order in the face of its obvious breakdown(s) has been facilitated by co-optation of feminist and queer perspectives into national and international responses to the crisis. Scandalous Economics builds upon the Occupy movement and other critical analysis of the GFC to comprehensively examine gendered material, ideational and representational dimensions that have served to make the crisis and its effects, 'the new normal' in Europe and America as well as Latin America and Asia.

WORLD REGIONAL GEOGRAPHY. (PRODUCT ID 23958336).

American Health CrisisOne Hundred Years of Panic, Planning, and Politics"Despite enormous advances in medical science and public health education over the last century, access to health care remains a dominant issue in American life. U.S. health care is often hailed as the best in the world, yet the public health emergencies of today very often echo the public health emergencies of yesterday: the Great Influenza Pandemic of 1918-19 and COVID-19; the displacement of the Dust Bowl and the havoc of Hurricane Maria; the Reagan administration's antipathy toward the AIDS epidemic and the lack of accountability during the water crisis in Flint, Michigan"--

Eight FlavorsThe Untold Story of American CuisineSimon and SchusterThis unique culinary history of America offers a fascinating look at our

past and uses long-forgotten recipes to explain how eight flavors changed how we eat. The United States boasts a culturally and ethnically diverse population which makes for a continually changing culinary landscape. But a young historical gastronomist named Sarah Lohman discovered that American food is united by eight flavors: black pepper, vanilla, curry powder, chili powder, soy sauce, garlic, MSG, and Sriracha. In *Eight Flavors*, Lohman sets out to explore how these influential ingredients made their way to the American table. She begins in the archives, searching through economic, scientific, political, religious, and culinary records. She pores over cookbooks and manuscripts, dating back to the eighteenth century, through modern standards like *How to Cook Everything* by Mark Bittman. Lohman discovers when each of these eight flavors first appear in American kitchens—then she asks why. *Eight Flavors* introduces the explorers, merchants, botanists, farmers, writers, and chefs whose choices came to define the American palate. Lohman takes you on a journey through the past to tell us something about our present, and our future. We meet John Crowninshield a New England merchant who traveled to Sumatra in the 1790s in search of black pepper. And Edmond Albius, a twelve-year-old slave who lived on an island off the coast of Madagascar, who discovered the technique still used to pollinate vanilla orchids today. Weaving together original research, historical recipes, gorgeous illustrations and Lohman's own adventures both in the kitchen and in the field, *Eight Flavors* is a delicious treat—ready to be devoured.

Despite advances in modern medicine, the power of plagues to terrify, disrupt and bring huge swings in morbidity and mortality in their wake remains potent. *A Geography of Infection* explores the spatial mechanisms by which infectious diseases, such as measles and influenza, can develop into epidemics and pandemics.

"This book was written late in the North American night, with the rumbling thuds and booming train horns of the nearby rail yard echoing through my windows, reminding me of the train hoppers and gutter punks out there rolling through the darkness." In *Drift*, Jeff Ferrell shows how dislocation and disorientation can become phenomena in their own right. Examining the history of drifting, Ferrell situates the contemporary global phenomenon of drift within today's economic, social, and cultural dy-

namics. He also highlights a distinctly North American form of drift—that of the train-hopping hobo—by tracing the hobo's political history and by sharing his own immersion in the world of contemporary train-hoppers. Along the way, Ferrell sheds light on the ephemeral intensity of drifting communities and explores the contested politics of drift—the legal and political strategies designed to control drifters in the interest of economic development, the irony by which these strategies spawn further social and spatial exclusion, and the ways in which drifters and those who embrace drift create their own slippery strategies of resistance. With an eye toward the truth, Ferrell keenly argues that the lessons of drift can provide us with new models for knowing and engaging with the world around us.

"Despite enormous advances in medical science and public health education over the last century, access to health care remains a dominant issue in American life. U.S. health care is often hailed as the best in the world, yet the public health emergencies of today very often echo the public health emergencies of yesterday: the Great Influenza Pandemic of 1918-19 and COVID-19; the displacement of the Dust Bowl and the havoc of Hurricane Maria; the Reagan administration's antipathy toward the AIDS epidemic and the lack of accountability during the water crisis in Flint, Michigan"--

Since China has now become the world's largest energy consumer, its energy sector has understandably huge implications for the global economy. This book examines the transformation of China's conventional and renewable energy sectors, with special attention to state-business relations. Two studies examine the development of China's energy profile, especially China's renewable energy. Two others explore governmental relations with state-owned enterprises (SOEs) and their reform. Despite drastic restructuring in the late 1990s, SOEs continue their oligopolistic control of the oil and gas sectors and even overshadow the stock market. Three studies investigate the factors that help propel the expansion of China's conventional energy firms, as well as those producing renewable energy (i.e. solar PV industry). A study of China's solar PV industry suggests that China's governmental support for it has evolved from subsidising production (a "mercantile" stage aimed at expanding the industry's global production and export share) to subsidising the demand side (aiming at expanding domestic demand and absorbing redundant manufacture capacity). Another review of this industry finds that firms tend to pay heavy attention to extra-firm institutional network relationships both inside and outside China, and that buyer-supplier networks are influenced by extra-local managerial education. The final chapter compares China's provinces and their embedded carbon-footprints per capita in urban areas from a consumption perspective, using a self-organizing feature map (SOFM) model. This book was originally published as a special issue of the *Asia Pacific Business Review*.

In this book, based on field work undertaken in Afghanistan itself and through engagement with post-colonial theory, Bojan Savic critiques western intervention in Afghanistan by showing how its casting of Afghan natives as "dangerous" has created a power network which fractures the country – in echoes of 19th and 20th century colonial powers in the region. Savic also offers an analysis of how and by what means global security priorities have affected Afghan lives.

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing,

poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

Investigating how people and places are connected into the creative economy, this volume takes a holistic view of the intersections between community, policy and practice and how they are co-constituted. The role of the creative economy and broader cultural policy within community development is problematised and, in a significant addition to work in this area, the concept of 'place' forms a key cross cutting theme. It brings together case studies from the European Union across urban, rural and coastal areas, along with examples from the developing world, to explore tensions in universal and regionally-specific issues. Empirically-based and theoretically-informed, this collection is of particular interest to academics, postgraduates, policy makers and practitioners within geography, urban and regional studies, cultural policy and the cultural/creative industries.

Food insecurity rates, which skyrocketed with the Great Recession, have yet to fall to pre-recession levels. Food pantries are stretched thin, and states are imposing new restrictions on programs like SNAP that are preventing people from getting crucial government assistance. At the same time, we see an increase in obesity that results from lack of access to healthy foods. The poor face a daily choice between paying bills and paying for food.

From the visionary head of Google's innovative People Operations comes a groundbreaking inquiry into the philosophy of work -- and a blueprint for attracting the most spectacular talent to your business and ensuring that they succeed. "We spend more time working than doing anything else in life. It's not right that the experience of work should be so demotivating and dehumanizing." So says Laszlo Bock, former head of People Operations at the company that transformed how the world interacts with knowledge. This insight is the heart of *Work Rules!*, a compelling and surprisingly playful manifesto that offers lessons including: Take away managers' power over employees Learn from your best employees-and your worst Hire only people who are smarter than you are, no matter how long it takes to find them Pay unfairly (it's more fair!) Don't trust your gut: Use data to predict and shape the future Default to open-be transparent and welcome feedback If you're comfortable with the amount of freedom you've given your employees, you haven't gone far enough. Drawing on the latest research in behavioral economics and a profound grasp of human psychology, *Work Rules!* also provides teaching examples from a range of industries-including lauded companies that happen to be hideous places to work and little-known companies that achieve spectacular results by valuing and listening to their employees. Bock takes us inside one of history's most explosively successful businesses to reveal why Google is consistently rated one of the best places to work in the world, distilling 15 years of intensive worker R&D into principles that are easy to put into action, whether you're a team of one or a team of thousands. *Work Rules!* shows how to strike a balance between

creativity and structure, leading to success you can measure in quality of life as well as market share. Read it to build a better company from within rather than from above; read it to reawaken your joy in what you do.

The fields of Economic Geography and International Business share an interest in the same phenomena, whilst each provides both a differing perspective and different research methods in attempting to understand those phenomena. The *Routledge Companion to the Geography of International Business* explores the nature and scope of inter-disciplinary work between Economic Geography and International Business in explaining the central issues in the international economy. Contributions written by leading specialists in each field (including some chapters written by inter-disciplinary teams) focus on the nature of multinational firms and their strategies, where they choose to locate their activities, how they create and manage international networks and the key relationships between multinationals and the places where they place their operations. Topics covered include the internationalisation of service industries, the influence of location on the competitiveness of firms and the economic dynamism of regions and where economic activity takes place and how knowledge, goods and services flow between locations. The book examines the areas for fruitful inter-disciplinary work between International Business and Economic Geography and sets out a road map for future joint research, and is an essential resource for students and practitioners of International Business and Economic Development.

A RAND study analyzed trends in the development of Chinese and U.S. military capabilities in two scenarios (centered on Taiwan and the Spratly Islands) and multiple types of operations from 1996 to 2017.

Exam Board: CCEA Level: A-level Subject: Geography First Teaching: September 2016 First Exam: June 2018 Reinforce students' geographical understanding throughout their course; clear topic summaries with sample questions and answers help students improve their exam technique and achieve their best. Written by a teacher with extensive examining experience, this guide: - Helps students identify what they need to know with a concise summary of the topics examined at AS and A-level - Consolidates understanding through assessment tips and knowledge-check questions - Offers opportunities for students to improve their exam technique by consulting sample graded answers to exam-style questions - Develops independent learning and research skills - Provides the content students

need to produce their own revision notes

The public health footprint associated with corporate behavior has come under increased scrutiny in the last decade, with an increased expectation that private profit not come at the expense of consumer welfare. *Consumers, Corporations, and Public Health* assembles 17 case studies at the intersection of business and public health to illustrate how each side can inform and benefit the other. Through contemporary examples from a variety of industries and geographies, this collection provides students with an appreciation for the importance of consumer empowerment and consumer behavior in shaping both health and corporate outcomes.

This book builds on the highly successful *Geography of Beer: Regions, Environment, and Society* (2014) and investigates the geography of beer from two expanded perspectives: culture and economics. The respective chapters provide case studies that illustrate various aspects of these themes. As the beer industry continues to reinvent itself and its economic and cultural geographies, this book showcases historical, current, and future trends at the local, regional, national, and international scales.

Politics and Leadership in North Korea, now fully updated in this second edition, presents an accessible and comprehensive account of North Korea's political, economic and foreign policies since its creation in 1945. Moving away from media representations of North Korea as dangerously erratic and dysfunctional, Adrian Buzo provides a thorough analysis of Kim Il Sung's vision for the DPRK and demonstrates the consistency of the successive leaderships' approach to politics, economics and international affairs. This second edition has been fully revised and takes into account all the important events of the last fifteen years in North Korea, such as: • endemic food shortages; • the steady growth of military emphasis in both politics and ideology; • the acquisition and continued development of nuclear capabilities; • the implementation and eventual failure of South Korea's 'sunshine policy'; • the growth of private enterprise and a consumer economy. As such, it will continue to be an essential resource for students of North Korea, East Asian Politics and International Politics.

An expert in migration studies examines the cultural context of villagers in Central Java and their influence on those who pursue migrant labor. Villagers in Indonesia hear a steady stream of stories about the injuries, abuses, and even deaths suffered by those who migrate in search of work. So why do hundreds of thousands of Indonesian workers continue to migrate every year? Carol Chan explores this question from the perspective of the origin community and provides a fascinating look at how gender, faith, and shame shape these decisions to migrate. Chan reveals how villagers evaluate men's and women's migrations differently. This disparity leads to different ideas about which kinds of human or financial flows should be encouraged and which should be discouraged or even criminalized. Despite routine and well-documented instances of exploitation of Indonesian migrant workers, some villagers still emphasize that a migrant's success or failure ultimately depends on that individual's morality, fate, and destiny. Indonesian villagers construct strategies for avoiding migration-related risks that are closely linked to faith and belief in supernatural agency. These strategies shape the flow of migration from the country and help to ensure the continued confidence Indonesian people have in migration as an act of promise and hope.

What does it mean to live in a post-atomic world? Photography and contemporary art offer a provocative lens through which to comprehend the by-products of the atomic age, from weapons prolifera-

tion, nuclear disaster, and aerial surveillance to toxic waste disposal and climate change. Confronting cultural fallout from the dawn of the nuclear age, *Through Post-Atomic Eyes* addresses the myriad iterations of nuclear threat and their visual legacy in the twentieth and twenty-first centuries. Whether in the iconic black-and-white photograph of a mushroom cloud rising over Nagasaki in 1945 or in the steady stream of real-time video documenting the 2011 meltdown at the Fukushima Daiichi nuclear power plant, atomic culture - and our understanding of it - is inextricably constructed by the visual. This book takes the image as its starting point to address the visual inheritance of atomic anxieties; the intersection of photography, nuclear industries, and military technocultures; and the complex temporality of nuclear technologies. Contemporary artists contribute lens-based works that explore the consequences of the nuclear, and its afterlives, in the Anthropocene. Revealing, through both art and prose, startling new connections between the ongoing threat of nuclear catastrophe and current global crises, *Through Post-Atomic Eyes* is a richly illustrated examination of how photography shapes and is shaped by nuclear culture.

All Hell Breaking Loose is an eye-opening examination of climate change from the perspective of the U.S. military. The Pentagon, unsentimental and politically conservative, might not seem likely to be worried about climate change—still linked, for many people, with polar bears and coral reefs. Yet of all the major institutions in American society, none take climate change as seriously as the U.S. military. Both as participants in climate-triggered conflicts abroad, and as first responders to hurricanes and other disasters on American soil, the armed services are already confronting the impacts of global warming. The military now regards climate change as one of the top threats to American national security—and is busy developing strategies to cope with it. Drawing on previously obscure reports and government documents, renowned security expert Michael Klare shows that the U.S. military sees the climate threat as imperiling the country on several fronts at once. Droughts and food shortages are stoking conflicts in ethnically divided nations, with “climate refugees” producing worldwide havoc. Pandemics and other humanitarian disasters will increasingly require extensive military involvement. The melting Arctic is creating new seaways to defend. And rising seas threaten American cities and military bases themselves. While others still debate the causes of global warming, the Pentagon is intensely focused on its effects. Its response makes it clear that where it counts, the immense impact of climate change is not in doubt.

With the rise of smartphones and the proliferation of applications, the ways everyday media users and creative professionals represent, experience, and share the everyday is changing. This collection reflects on emergent creative practices and digital ethnographies of new socialities associated with smartphone cameras in everyday life.

This book offers critical insights into the thriving international field of community indicators, incorporating the experiences of government leaders, philanthropic professionals, community planners and a wide range of academic disciplines. It illuminates the important role of community indicators in diverse settings and the rationale for the development and implementation of these innovative projects. This book details many of the practical “how to” aspects of the field as well as lessons learned from implementing indicators in practice. The case studies included here also demonstrate how, using a variety of data applications, leaders of today are monitoring and measuring progress and communities are empowered to make sustainable improvements in their wellbeing. With examples relat-

ed to the environment, economy, planning, community engagement and health, among others, this book epitomizes the constant innovation, collaborative partnerships and the consummate interdisciplinarity of the community indicators field of today.

This edited collection examines contemporary directions in geographical research on South Africa. It encompasses a cross section of selected themes of critical importance not only to the discipline of Geography in South Africa, but also of relevance to other areas of the Global South. All chapters are original contributions, providing a state of the art research baseline on key themes in physical, human and environmental geography, and in understanding the changing geographical landscapes of modern South Africa. These contributions set the scene for an understanding of the relationships between modern South Africa and the wider contemporary world, including issues of sustainable development and growth in the Global South.

1. Magbook series deals with the preliminary examinations for civil series. 2. It's a 2 in 1 series offers advantages of both Magazine and book. 3. The entire syllabus of Indian and World Geography divided into 24 Chapters. 4. Focuses on the Topics and Trends of question asked in Previous Years? Questions. 5. Offers Chapterwise Practice and well detailed explanations the previous Years? questions. 6. More than 3000 MCQs for the revision of the topics. 7. 5 Practice sets and 2 Previous Years solved Papers sets for thorough practice. 8. The book uses easy language for quick understanding. Fresh and New like a Magazine, Deep & Comprehensive like a book... Here's presenting the revised edition of Magbook Indian and World Geography that is designed to provide complete syllabus of general studies' portion of the UPSC and State PCS examination. Serving as resource book, it proves to be an extremely useful tool for the aspirants as the book is divided into 24 Chapters covering all the topics in a concise and note format. Apart from paying attention to theories, sheer focus is given to the topics & trends of Questions provided in previous years' civil services exams, Chapterwise practice questions are also mentioned to help students in easy remembrance and quick revision and lastly, Subjectwise detailed explanations of previous civil services exams. Including topical coverage of syllabus and previous years' questions with more than 3000 MCQs, this Magbook of Indian and World Geography is a must for civil services (Pre) Examination, state PCS and other competitive exams. TOC India and world Geography - The universe and the solar system, the Earth, Geomorphology, Geomorphology II, Climatology, Oceanography, Biogeography, human Geography, economic Geography, continents, India: physical aspects, Indian Agriculture, industrial features of India, transport, trade and Communication in India, India cultural settings, urbanisation in India, ecology and diversity

- ecology: basic concepts, environment, diversity and its conservation, climate change, disaster Management, sustainable development, practice sets (1-5), previous years' solved papers 1, Previous years' solved papers 2

WOMAN explores the essence of what it means to be female. In mapping the inner woman - from organs to orgasms - Natalie Angier presents an extraordinary new vision of the female body as an evolutionary masterpiece. 'Anyone living in or near a female body should read this book' - Gloria Steinem 'Women have long been regarded as slaves to biology and evolution, prisoners in a hormonal swamp. But now, some of the sacred tenets of evolutionary psychology . . . have come under fresh challenge. As the century turns, it could be Goodbye women's lib; hello female liberation! . . . WOMAN is a delicious cocktail of estrogen and amphetamine designed to pump up the ovaries as well as the cerebral cortex' - Barbara Ehrenreich, Time magazine 'Drawing on science, literature and history, Angier provides valuable insight into the power of hormones, breast milk and the all-important clitoris. A must for every woman's bookshelf' - Woman's Journal

A revealing look at the history, politics, and social meanings behind everyday objects. Who would have guessed that the first sports bra was made out of two jockstraps sewn together or that it succeeded because of federal anti-discrimination laws? What do simple decisions about where to build a road or whether to buy into the carbon economy have to do with Hurricane Katrina or the Fukushima nuclear disaster? How did massive flood control projects on the Mississippi River and New Deal dams on the Columbia River lead to the ubiquity of high fructose corn syrup? And what explains the creation—and continued popularity—of the humble fish stick? In *Fish Sticks, Sports Bras, and Aluminum Cans*, historian Paul R. Josephson explores the surprising origins, political contexts, and social meanings of ordinary objects. Drawing on archival materials, technical journals, interviews, and field research, this engaging collection of essays reveals the forces that shape (and are shaped by) everyday objects. Ultimately, Josephson suggests that the most familiar and comfortable objects—sugar and aluminum, for example, which are inextricably tied together by their linked history of slavery and colonialism—may have the more astounding and troubling origins. Students of consumer studies and the history of technology, as well as scholars and general readers, will be captivated by Josephson's insights into the complex relationship between society and technology. "Josephson's conclusions are guaranteed to make you think of the modern world and its interconnectedness in a different light." —Cosmos "Every chapter of this book offers surprising insights and is a pleasure to read." —ICON
