My Game Create a Game Your Money Personal Finance Wealth Management ... As prices respond only to information available in the market, no one can out-profit anyone else.

This is an unrealistic time frame for mobile games because it would be nearly impossible to even break even, let alone make a profit. Most mobile games only cost the consumer \$.99-\$5.00 on average. That means if you sell your game at \$2 you have to sell 50,000 copies if you want to break even on a game with a \$100,000 budget.
