N9AXTO - WEBER MASON

When using standard flash mode, the burst of flash is unable to illuminate the entire scene. Instead it simply illuminates the part of the scene that is open to the “gap” in the shutter. Look to your flash manual to see if your flash has High Speed Flash capabilities.

The flash guide number tells you - in a general sense - how powerful the flash is and hence, how much of an area it can illuminate. Put another way: If your goal is to take intimate portraits in a small room, you don't need flashes with huge guide numbers; If it's your intention to photograph the interior of cathedrals, then you do

Camera groups and available flash modes In this manual, Nikon SLR cameras are divided into nine groups: cameras compatible with CLS*, digital SLRs not compatible with CLS*, and cameras in Groups I to VII unless otherwise noted. First, consult the camera group table to see which group your camera belongs to. Then as you read the manual, you will

Nikon Flash Guide

The Nikon SB-5000 is the most current top-of-the-line speedlight in Nikon’s arsenal of flash units. It is the first Nikon speedlight to utilize radio frequency instead of infrared for flash operation, making the SB-5000 a versatile flash that can be used in daylight conditions without any interference.

The main feature of the Nikon CLS system is the ability to use TTL metering with the remote flash. This is called i-TTL balanced fill flash. The Speedlight sends out pre-flashes before the main flash, which are then picked up by the flash units TTL flash sensor.
