### **EWOJXB - KRAMER ROCCO**

---

This volume offers a compAndium of the best ideas, analyses, and practices relating to the undergraduate curriculum as described by leading figures in the field. It contains both conceptual and practical information on effective practices, research, management, and assessment. In thirty-four original chapters, top practitioners and scholars detail a range of philosophies, frameworks, program designs, instructional strategies, and assessment methods being used to strengthen and transform the curriculum. They examine both the current state of knowledge and teaching in the disciplines and the forces that will reshape the curriculum in the com-

ing years. The Handbook of Undergraduate Curriculum will prove valuable both to practitioners—as an operating manual or desk reference—and to faculty as a primary text for graduate courses on the curriculum. In addition, the book will be a useful tool for those serving on a general education curriculum committee or conducting a departmental review of a major program, as well as having numerous other practical applications for anyone with responsibility for or interest in the curriculum.

"The ancient Phoenician civilization is still shrouded in mystery. Scholars question when the Phoenicians became powerful, where they came from, and how they came to be such brilliant navigators and

merchants that they colonized much of the Mediterranean rim. This detailed study of the Phoenicians is filled with important essays and illustrations that trace the rise and fall, the art and customs, the trade and exploration, and the rich legacy of this fascinating culture." -- Publisher's description.

The publication presents an overview of foreign labour recruitment practices in OECD member countries. It discusses challenges to the negotiation of labour recruitment agreements and the prospects for potential co-operation on migration.

Graffiti writing was born in the streets of Philadelphia in the late 1960s. But it was in New York in the early 1970s that it be-

came a full-fledged urban art, gradually taking over the landscape of the city, from its walls to its subway cars. This is a writing manual, a detailed examination of how graffiti writers have developed the twenty-six letters of the alphabet. It includes the contribution of ten of the international scene's most talented creators answer Woshe's questions about matters that include their practice, their relationship with letters and their backgrounds. It includes a map of New York with the sites where the most important graffiti are located.

The Science Focus Second Edition is the complete science package for the teaching of the New South Wales Stage 4 and 5 Science Syllabus. The Science Focus Second

Edition package retains the identified strengths of the highly successful First Edition and includes a number of new and exciting features, improvements and components. The innovative Teacher Edition with CD allows a teacher to approach the teaching and learning of Science with confidence as it includes pages from the student book with wrap around teacher notes including answers, hints, strategies and teaching and assessment advice.

The first kings of the Achaemenid Persian empire, Cyrus the Great and Darius, sought to devise for their capital cities new styles in monumental architecture and sculpture to express their imperial status and mastery of the known world. With no local tra-

dition to guide designers, a homogeneous style was created from the example of the many new subjects - Ionian Greeks, Lydians, Mesopotamians, and Egyptians. This book traces these sources and explores the way that traditional Achaemenid motifs, if not styles, also permeated the empire. The Achaemenid Persian experiment was unique in antiquity, and it was successful for as long as the empire lasted. Even after Alexander the Great brought about its downfall, it continued to influence the arts from Greece to India. This is a record of the brilliant flowering of an artificial yet unified construct, unmatched in the art of the Old World.
