The book includes the authors' experiences, encouragement to parents to start, sample letters, and 100 colorful tear out sheets. Children are subjected to great stress and anxiety while growing up in a dangerous and fast changing world. Parents struggle too, especially to find ways to communicate with their children and to show how much they care. This practical and valuable little book presents a proven method of staying in touch with your children throughout their school years. Lunch Box Letters is the result of the experience of two parents who--separately--wrote notes to their children on a regular basis and were immensely encouraged by the results. Now they show how you can use their successful method to communicate with your own kids. They provide sample letters to let you see just how simple these little notes are to write--and how important they are to both parent and child. They also answer common questions that parents raise, such as 'Where do I find the time?' 'What if I have three kids?' or 'What if I'm a lousy speller?'"--

Excerpt: ...tribe. He had faculties. He had also various idiosyncrasies. He was undeniably the best hunter and trapper and trainer of dogs to sledge, as well as the most expert upon snowshoes of all the Indians living upon the point, and he was, furthermore, one of the dirtiest of them and the biggest drunkard whenever opportunity afforded. Fortunately for him and for his squaw, Bigbeam, as she had been facetiously named by an agent of the company, the opportunities for getting drunk were rare, for the company is conservative in the distribution of that which makes bad hunters. Given an abundance of firewater and tobacco, Red Dog was the happiest Indian between the northern boundary of the United States and Lake Gary; deprived of them both he hunted vigorously, thinking all the while of the coming hour when, after a long journey and much travail, he should be in what was his idea of heaven again. To-day, though, the rifle bought from the company stood idle beside the ridge-pole, the sledge dogs snarled and fought upon the snow outside, and Bigbeam, squat and broad as became her name, looked askance at her lord as she prepared the moose meat, uncertain of his temper, for his face was cloudy. Red Dog was, in fact, perplexed, and was planning deeply. Good reason was there for Red Dog's thought. Events of the immediate future were of moment to him and all his fellows, among whom, though no chief was formally acknowledged, he was recognized as leader; for had he not at one time been with the company as a hired hunter? Had he not once gone with a fur-carrying party even to Hudson's Bay, and thence to the far south and even to Quebec? And did he not know the ways of the company, and

could not he talk a French patois which enabled him to be understood at the stations? Now, as fitting representative of himself and of his clan, a great responsibility had come upon him, and he was lost in as anxious thought as could come to a biped of his quality. Like a more or less...

A veteran teacher provides surefire tips on how parent-teacher communication can work for everyone!

Statistics show 51 percent of teens are afraid of talking to their parents about personal, private problems. It's even slightly higher when it comes to talking to their teachers. What are parents to do? One solution is for parents to write to their teens about these problems. In Love Letters from Parents to Teens, author Marlene Riddle offers examples of letters written by parents to their teens to help guide them through difficult situations, life's challenges, and times of discouragement and confusion. Riddle—an educator for more than forty years—believes if parents take the first step in writing to their teens, the adolescent may like the idea and begin writing back. With time, these letters may no longer be necessary, and the parent and teen may be talking to each other face to face, having conversations in an atmosphere of trust and harmony. The sample letters address everything from trust, to relationships, choosing friends, dealing with bullies, being popular, jealousy, labeling, enjoying adolescence, having a vision and purpose, and more. Adolescence doesn't have to be the most difficult time of a person's life. A parent can transform these short years into fun, exciting experiences. A parent's responsibility is to build teens up, not tear them down, creating a strong, meaningful relationship. And it can all begin with a letter.

The breakdown of the family has moved in recent years to the forefront of national consciousness. All manner of social ills, from poor academic performance to teenage drug use and gang crime, have been attributed to high divorce rates and the collapse of the traditional two-parent family. Targets of particularly harsh criticism are parents who lose all contact with their children after a divorce. So-called "deadbeat dads" are denounced in political speeches and ridiculed on billboard advertisements; mothers who lose touch with their children are stigmatized as emotionally unstable or lacking maternal instincts. Everyone seems to understand the importance of children being raised by two-parent families and the damage that can occur when

one parent loses contact completely. What is significantly less clear is why this loss of contact occurs and what can be done to prevent it. In *Out of Touch*, Geoffrey Greif explores these issues with clarity, compassion, insight, and an evenhandedness rarely encountered in an arena far more susceptible to acrimonious debate than sympathetic understanding. Setting out to find the reality beneath the catchall categorization of out-of-touch parents as deadbeats, substance abusers, child mistreaters, or criminals, Greif focuses on those parents who tried and, for a vast array of reasons, failed to maintain contact with their children. It is their voices, in a discussion dominated up till now by the custodial parent, that we most need to hear, Greif argues, if we are to uncover ways to avoid such failures in the future. Rather than offering dry statistics and abstract generalizations, Greif lets us hear these voices directly in 26 in-depth interviews with estranged parents and with children caught in the crossfire of painful divorces. Extending over a period of two to ten years, these interviews, and Greif's perceptive analyses of them, reveal the whole spectrum of logistical, emotional, and legal difficulties that keep parents and children apart. From the ordinary problems of visitation rights and child support to the more complex and troubling issues--bitter court battles, accusations of sexual abuse, domestic violence, children rejecting a parent, child kidnapping, and many others--*Out of Touch* vividly and often heartbreakingly presents all the ways that fathers and mothers, even with the best intentions, can lose contact with their children. But the book does more than tell the stories of failed relationships. Its concluding chapter offers a series of specific and extremely helpful suggestions for families--parents, children, grandparents--who find themselves in danger of complete estrangement. Greif outlines how families can employ support systems, communication skills, mediation, and many other strategies to overcome the most difficult obstacles that occur after a divorce. It is here that the lessons gleaned from the broken relationships of the past become invaluable advice for the future. Informed by fresh perspectives, moving personal accounts, and a clear-sighted approach to a tangled issue, *Out of Touch* is a timely and deeply important book about both the forces that drive parents and children apart and the understanding that can keep them together. *The Smart Classroom Management Way* is a collection of the very best writing from

ten years of *Smart Classroom Management (SCM)*. It isn't, however, simply a random mix of popular articles. It's a comprehensive work that encompasses every principle, theme, and methodology of the SCM approach. The book is laid out across six major areas of classroom management and includes the most pressing issues, problems, and concerns shared by all teachers. The underlying SCM themes of accountability, maturity, independence, personal responsibility, and intrinsic motivation are all there and weave their way throughout the entirety of the book. Together, they form a simple, unique, and sometimes contrarian approach to classroom management that anyone can do. Whether you're an elementary, middle, or high school teacher, *The Smart Classroom Management Way* will give you the strategies, skills, and know-how to turn any group of students into the motivated, well-behaved class you love teaching.

Little Ethiopia of the Pacific Northwest tells the story of the Ethiopian community in Seattle. The community began with approximately two dozen college students who came to the city during the Ethiopian revolution of 1974. These sojourning students earned college and university degrees, but were unable to return home to use them to modernize the developing nation. These stranded students became pioneers who built a micro-community in inner-city Seattle. Providing background with an analysis of Seattle's geographic, demographic, social, and economic challenges, this volume studies the students who became asylum seekers; their falls in position, power, prestige; and the income of these elite and non-elite settlers. The authors analyze examples of those who became entrepreneurs and the ingenuity and determination they employed to start successful businesses. The authors examine the challenges imposed on them by a school system that assigned their children to grade levels according to age rather than knowledge. They explore how the American welfare system worked in practice and explain how and why Ethiopians die young in Seattle. This fascinating study will be of interest to sociologists, ethnographers, and regional analysts.

Teaching children how to manage their thoughts and words without interrupting. Louis always interrupts! All of his thoughts are very important to him, and when he has something to say, his words rumble and grumble in his tummy, they wiggle and jiggle on his tongue and then they push on his teeth, right before he ERUPTS (or interrupts). His mouth is a volcano! But when others begin to interrupt Louis, he learns how to respectfully wait for his turn to talk. *My Mouth Is A Volcano* takes an empathetic approach to the habit of interrupting and teaches children a witty technique to help them manage their rambunctious thoughts and words. Told from Louis' perspective, this story provides parents, teachers, and counselors with an entertaining way to teach children the value of respecting others by listening and waiting for their turn to speak.
