LEADERSHIP Effective leadership does not occur by chance. Leaders must be trained and groomed for the daunting responsibility of leading organizations. This textbook edition offers examples of leadership and governance from the non-profit sector, businesses, public and private education, higher education, and other organizations. The author highlights over 50 case studies to illustrate concepts about leadership. Also, there are 531 references and numerous theories and concepts about many aspects of leadership. Key concepts, discussion items, and lessons learned are provided at the end of each chapter. Research shows that half of the people currently in leadership positions will fail. Why they fail and what can be done to prevent failure are the main subjects of this book. The author shows that effective leadership is possible and he illustrates why and how.

Why do various racial, ethnic, religious, and gender groups differ in academic and job performance? Standard explanations for these disparities typically invoke either biological or socialization perspectives. The research summarized in this book, however, suggests that subtle reminders of cultural stereotypes play a critical yet underappreciated role in interfering with intellectual performance and in creating an illusion of group differences in ability.

The incredible true story of the twelve boys trapped with their coach in a flooded cave in Thailand and their inspiring rescue. On June 23, 2018, twelve members of the Wild Boars soccer team and their coach were exploring the Tham Luang cave complex in northern Thailand when disaster struck. A rainy season downpour flooded the tunnels, trapping them as they took shelter on a shelf of the dark cave. Eight days of searching yielded no signs of life, but on July 2 they were discovered by two British divers. The boys and their coach were eventually rescued in an international operation that took three days. What could have been a terrible tragedy became an amazing story of survival. Award-winning author Marc Aronson brings us the backstory behind how this astounding rescue took place. Rising Water highlights the creative thinking and technology that made a successful mission possible by examining the physical, environmental, and psychological factors surrounding the rescue. From the brave Thai Navy SEAL who lost his life while placing oxygen tanks along the passageways of the cave, to the British divers that ultimately swam the boys to safety, to the bravery of the boys and their coach, this is the breathtaking rescue that captivated the entire world.

"Wow. This book totally rocks. It arrived on a day when I was in deep confusion and sadness about my age. Everything about it, from my invisibility to my neck. Within four or five wise, passionate pages, I had found insight, illumination, and inspiration. I never use the word empower, but this book has empowered me." —Anne Lamott, New York Times bestselling author Author, activist, and TED speaker Ashton Applewhite has written a rousing manifesto calling for an end to discrimination and prejudice on the basis of age. In our youth obsessed culture, we're bombarded by media images and messages about the despairs and declines of our later years. Beauty and pharmaceutical companies work overtime to convince people to purchase products that will retain their youthful appearance and vitality. Wrinkles are embarrassing. Gray hair should be colored and bald heads covered with implants. Older minds and bodies are too frail to keep up with the pace of the modern working world and olders should just step aside for the new generation. Ashton Applewhite once held these beliefs too until she realized where this prejudice comes from and the damage it does. Lively, funny, and deeply researched, *This Chair Rocks* traces her journey from apprehensive boomer to pro-aging radical, and in the process debunks myth after myth about late life. Explaining the roots of ageism in history and how it divides and debases, Applewhite examines how ageist stereotypes cripple the way our brains and bodies function, looks at ageism in the workplace and the bedroom, exposes the cost of the all-American myth of independence, critiques the portrayal of elders as burdens to society, describes what an all-age-friendly world would look like, and offers a rousing call to action. It's time to create a world of age equality by making discrimination on the basis of age as unacceptable as any other kind of bias. Whether you're older or hoping to get there, this book will shake you by the shoulders, cheer you up, make you mad, and change the way you see the rest of your life. Age pride!
