HPTRF2 - HUDSON POWERS

Jonathan Scott's Family History Web Directory is an information-packed reference guide that distils the best of the internet into one easy-to-use format. Themed sections cover different topics, from 'getting started' to specific occupations, and there is an index reproducing all the websites in A-Z order. His handbook is a vital source for less experienced researchers, and a handy aide-memoire for more seasoned campaigners. Web addresses are listed by topic, then in order of importance and usefulness. An extraordinary range of sites that will interest family historians is included from records of births and deaths, tax, crime and religion, to military records and records of work and occupations. Also featured are sites that give information about archives, blogs and forums, social networking and sharing research. The internet can be an overwhelming place for the genealogist. Jonathan Scott's book provides readers with online shortcuts, tips for getting the best from well-known websites, plus the details of all kinds of lesser-known and hard-to-find sources.

Internet has a vast amount of information, but it is not always easy to find your way around. In this book, Stuart Raymond, he points out where to find the information you need to trace your family thistory.

Ireland has experienced considerably more tragedy when it comes to the preservation of resources for family historians than its close neighbor Britain. Many of the nations primary records were lost during the civil war in 1922 and through other equally tragic means. But in this new book Chris Paton, the Northern-Irish-born author of the best-selling *Tracing Your Family History on the Internet*, shows that not only has a great deal of information survived, it is also increasingly being made available online. Thanks to the pioneering efforts of the Public Record Office of Northern Ireland, the National Archives of Ireland, organizations such as FindmyPast Ireland, Ancestry.co.uk and RootsIreland, and the massive volunteer genealogical community, more and more of Irelands historical resources are accessible from afar. As well as exploring the various categories of records that the family historian can turn to, Chris Paton illustrates their use with fascinating case studies. He fully explores the online records available from both the north and the south from the earliest times to the present day. Many overseas collections are also included, and he looks at social networking in an Irish context where many exciting projects are currently underway. His book is an essential introduction and source of reference for anyone who is keen to trace their Irish roots.

The census is an essential survey of our population, and it is a source of basic information for local and national government and for various organizations dealing with education, housing, health and transport. Providing the researcher with a fascinating insight into who we were in the past, Emma Jolly's new handbook is a

useful tool for anyone keen to discover their family history. With detailed, accessible and authoritative coverage, it is full of advice on how to explore and get the most from the records. Each census from 1841 to 1911 is described in detail, and later censuses are analyzed too. The main focus is on the census in England and Wales, but censuses in Scotland, Ireland, the Channel Islands and the Isle of Man are all examined and the differences explained. Particular emphasis is placed on the rapidly expanding number of websites that offer census information, making the process of research far easier to carry out. The extensive appendix gathers together all the key resources in one place. Emma Jolly's guide is an ideal introduction and tool for anyone who is researching the life and times of an ancestor.

Scotland is a land with a proud and centuries long history that far pre-dates its membership of Great Britain and the United Kingdom. Today in the 21st century it is also a land that has done much to make its historical records accessible, to help those with Caledonian ancestry trace their roots back to earlier times and a world long past. In *Tracing Scottish Family History on the Internet*, Chris Paton expertly guides the family historian through the many Scottish records offerings available, but also cautions the reader that not every record is online, providing detailed advice on how to use web based finding aids to locate further material across the country and beyond. He also examines social networking and the many DNA platforms that are currently further revolutionising online Scottish research. From the Scottish Government websites offering access to our most important national records, to the holdings of local archives, libraries, family history societies, and online vendors, Chris Paton takes the reader across Scotland, from the Highlands and Islands, through the Central Belt and the Lowlands, and across the diaspora, to explore the various flavours of Scottishness that have bound us together as a nation for so long.

Leaves From The Family Tree is a collection of posts on family history from the News From Nowhere Blog.

A complete guide to researching genealogical questions online explains how to find records by using the Internet, how to create a home page for oneself, software and hardware needs, available genealogical Web sites, and more. The book covers the basics of both gathering family data and online searches.

The history of Ireland is one that was long dominated by the question of land ownership, with complex and often distressing tales over the centuries of dispossession and colonisation, religious tensions, absentee landlordism, subsistence farming, and considerably more to sadden the heart. Yet with the destruction of much of Ireland's historic record during the Irish Civil War, and with the discriminatory Penal Laws in place in earlier times, it is often within land records that we can find evidence of our ancestors' existence, in some cases the only evidence, where the relevant vital records for an area may never have been kept or may not have

survived. In *Tracing Your Irish Ancestors Through Land Records*, genealogist and best-selling author Chris Paton explores how the surviving records can help with our ancestral research, but also tell the stories of the communities from within which our ancestors emerged. He explores the often controversial history of ownership of land across the island, the rights granted to those who held estates and the plights of the dispossessed, and identifies the various surviving records which can help to tease out the stories of many of Ireland's forgotten generations. Along the way Chris Paton identifies the various ways to access the records, whether in Ireland's many archives, local and national, and increasingly through a variety of online platforms.

Straddling parts of Counties Antrim and Down, the city of Belfast has seen its fair share of history across the centuries. From its humble beginnings as a ford based settlement between two tributaries of the River Lagan, it grew following its grant of a charter in 1613 to become a corporation town, and expanded dramatically when later made a city in 1888. Along the way it has experienced the darkest of times, including the Belfast Blitz and the recent Troubles, to some of the most enlightened developments across Ireland and the UK. In *Tracing Your Belfast Ancestors*, genealogist and best-selling author Chris Paton returns home to provide a research gateway for those wishing to trace their ancestors from the Northern Irish capital. With a concise summary of the city's history, a tour of some of the city's most amazing archives, libraries and museums, and a detailed overview of the records generated by those who came before, he expertly steers the reader towards centuries of ancestral exploration, both through online resources and within the city of Belfast itself □ and with a wee bit of craic along the way!

For many enthusiasts pursuing their family history research, the online world offers a seemingly endless archive of digitized materials to help us answer the questions posed by our ancestors. In addition to hosting records, however, the internet also offers a unique platform on which we can host our research and lure in prospective cousins from around the world, to help build up a larger shared ancestral story. In *Sharing Your Family History Online*, genealogist and best-selling author Chris Paton will explore the many ways in which we can present our research and encourage collaboration online. He will detail the many organizations and social media applications that can permit cooperation, describe the software platforms on which we can collate our stories, and illustrate the many ways in which we can publish our stories online. Along the way, Chris Paton will also explore how we can make our research work further for us, by drawing in experts and distant cousins from around the world to help us break our ancestral brick walls, not just through sharing stories, but by accessing uniquely held documentation by family members around the world, including our very own shared DNA.

Jonathan Scott is a freelance writer specializing in family history. He is a former deputy editor of *Family History Monthly* and has penned the 'Best Websites' column for *Who Do You Think You Are?* Magazine since 2007. He also writes the magazine's monthly 'Around Britain' feature and compiles the end-of-year look-ahead at developments online. In addition to his work in family history, he has compiled *Collecting Children's Books* and *Rare Book Price Guide*

The history of the British prison system only had systematic records from the middle of the nineteenth century. Before that, material on prisoners in local jails and houses of correction was patchy and minimal. In more recent times, many prison records have been destroyed. In *Tracing Your Prisoner Ancestors*, crime historian Stephen Wade attempts to provide information and guidance to family and social history researchers in this difficult area

of criminal records. His book covers the span of time from medieval to modern, and includes some Scottish and Irish sources. The sources explained range broadly from central calendars of prisoners, court records and jail returns, through to memoirs and periodicals. The chapters also include case studies and short biographies of some individuals who experienced our prisons and left some records.

This practical guide identifies the major websites and online sources of data available to family historians. It is ideal for both beginners and more experienced researchers as it explores the most useful sources and helps readers to navigate each one. The *Genealogist's Internet* features fully updated URLs and all of the recent developments in online genealogy. This fully updated fifth edition, endorsed by the National Archives, is the comprehensive guide for anyone researching their family history online. It covers:

- Online census records and wills, including the 1911 Census
- Civil registration indexes
- Information on occupations and professions
- DNA matching
- New genealogy websites and search engines
- Surname studies
- Passenger lists and migration records
- Information on digitised historical maps and photographs

This book also includes the impact of blogging, podcasting and social networking on family history research, allowing family historians to find others with similar research interests and to share their results. Whether you want to put your family tree online, find distant relatives or access the numerous online genealogical forums, discussion groups and mailing lists, this book is a must-have.

Many people in the past – perhaps a majority – were poor. Tracing our ancestors amongst them involves consulting a wide range of sources. Stuart Raymond's handbook is the ideal guide to them. He examines the history of the poor and how they survived. Some were supported by charity. A few were lucky enough to live in an almshouse. Many had to depend on whatever the poor law overseers gave them. Others were forced into the Union workhouse. Some turned to a life of crime. Vagrants were whipped and poor children were apprenticed by the overseers or by a charity. Paupers living in the wrong place were forcibly 'removed' to their parish of settlement. Many parishes and charities offered them the chance to emigrate to North America or Australia. As a result there are many places where information can be found about the poor. Stuart Raymond describes them all: the records of charities, of the poor law overseers, of poor law unions, of Quarter Sessions, of bankruptcy, and of friendly societies. He suggests many other potential sources of information in record offices, libraries, and on the internet.

With millions of records now available online, those interested in their family history have a wealth of information—and misinformation—at their fingertips. In this book, author Kimberly Powell, the *About.com* Guide to Genealogy, helps both novice and experienced genealogists sort it all out. She shows readers where to search and which key-words they'll need to create an accurate family tree—from start to finish. With this book, readers will learn how to create an online search strategy, use search engines and Soundex to find kin, reach out to others with peer-to-peer record swapping, discover useful records from around the world, and more. Packed with tips on free databases, search sites, and downloadable government records, readers will have all they need to use the Web to dig out their family's true tale!

This is a professional genealogy and family history worldwide humanities and social sciences megaportal, connected to thousands of related sub-sets, with billions of primary or secondary database records.

"The ideal instructional guide and reference for anyone doing genealogical research" by the author of *Tracing Your Scottish Family History on the Internet* (Midwest Book Review). Despite its

Union with England and Wales in 1707, Scotland remained virtually independent from its partners in many ways, retaining its own legal system, its own state church, and its own education system. In *Tracing Scottish Ancestry Through Church and State Records*, genealogist Chris Paton examines the most common records used by family historians in Scotland, ranging from the vital records kept by the state and the various churches, the decennial censuses, tax records, registers of land ownership and inheritance, and records of law and order. Through precepts of clare constat and ultimis haeres records, feudalism and udal tenure, to irregular marriages, penny weddings and records of sequestration, Chris Paton expertly explores the unique concepts and language within many Scottish records that are simply not found elsewhere within the British Isles. He details their purpose and the information recorded, the legal basis by which they were created, and where to find them both online and within Scotland's many archives and institutions. "A useful and very readable introduction to Scottish records, with many case studies to assist the reader, but there is also much in it that may be new to more experienced family historians." —*The Local Historian*, journal of the British Association for Local History "Leads the reader through the Scottish record jungle." —*Canada's Anglo-Celtic Connections*

Discover your Irish roots! Trace your Irish ancestors from American shores back to the Emerald Isle. This in-depth guide from Irish genealogy expert Claire Santry will take you step-by-step through the exciting--and challenging--journey of discovering your Irish roots. You'll learn how to identify immigrant ancestor, find your family's county and townland of origin, and locate key genealogical resources that will breathe life into your family tree. With historical timelines, sample records, resource lists, and detailed information about where and how to find your ancestors online, this guide has everything you need to uncover your Irish heritage. In this book, you'll find:

- The best online resources for Irish genealogy
- Detailed guidance for finding records in the old country, from both the Republic of Ireland and Northern Ireland
- Helpful background on Irish history, geography, administrative divisions, and naming patterns
- Case studies that apply concepts and strategies to real-life research problems

Whether your ancestors hail from the bustling streets of Dublin or a small town in County Cork, *The Family Tree Irish Genealogy Guide* will give you the tools you need to track down your ancestors in Ireland.

Part encyclopedia, part dictionary, part almanac - Jonathan Scott's *Dictionary of Family History* doesn't claim to be exhaustive, but it is practical, easy to use, entertaining and genuinely informative. It is the kind of book you can dip into or use as a starting point for deeper study, and it is the essential companion for experienced family historians and for anyone who is approaching this fascinating subject for the first time. Thousands of A to Z entries are full of intriguing facts. There are definitions, timelines and terminologies, details of archives and websites as well as advice on research methods and explanations of genealogical peculiarities and puzzles that would test the knowledge of even veteran researchers. Longer entries explaining the mechanics of the first census and other major sources and records rub shoulders with simple one-line definitions of obscure terms, useful addresses and signposts to little-known but rewarding corners of family, local and social history. This concise, clear and wide-ranging compendium of helpful, sometimes surprising information is a valuable reference tool for everyone in the field.

A two volume set which provides researchers with more than 70,000 links to every conceivable genealogical resource on the Internet.

For readers with family ties to Manchester and Salford, and researchers delving into the rich history of these cities, this informa-

tive, accessible guide will be essential reading and a fascinating source of reference. Sue Wilkes outlines the social and family history of the region in a series of concise chapters. She discusses the origins of its religious and civic institutions, transport systems and major industries. Important local firms and families are used to illustrate aspects of local heritage, and each section directs the reader towards appropriate resources for their research. No previous knowledge of genealogy is assumed and in-depth reading on particular topics is recommended. The focus is on records relating to Manchester and Salford, including current districts and townships, and sources for religious and ethnic minorities are covered. A directory of the relevant archives, libraries, academic repositories, databases, societies, websites and places to visit, is a key feature of this practical book.

This fully revised second edition of Chris Paton's best-selling guide is essential reading if you want to make effective use of the internet in your family history research. Every day new records and resources are placed online and new methods of sharing research and communicating across cyberspace become available, and his handbook is the perfect introduction to them. He has checked and updated all the links and other sources, added new ones, written a new introduction and substantially expanded the social networking section. Never before has it been so easy to research family history using the internet, but he demonstrates that researchers need to take a cautious approach to the information they gain from it. They need to ask, where did the original material come from and has it been accurately reproduced, why was it put online, what has been left out and what is still to come? As he leads the researcher through the multitude of resources that are now accessible online, he helps to answer these questions. He shows what the internet can and cannot do, and he warns against the various traps researchers can fall into along the way. As seen in *Your Family Tree Magazine*.

The First World War was perhaps the most traumatic event of the Twentieth Century. Millions of men, women and children were affected by it. And it still has a resonance today more than a hundred years after the Armistice. This guide offers a simple, yet comprehensive, guide to researching the men and women from Britain - and its dominions and colonies - who took part in the First World War either at the front or at home. It is an accessible, up-to-date and expert introduction to get you on your way and to answer those questions you might come across during your researches. In a straightforward, easy-to-follow style the book introduces readers to the multitude of sources they can use to explore the history of the First World War for themselves. In a series of short, instructive chapters the book takes the reader through the process of researching ancestors who served during the First World War providing short cuts and background information as required. The book covers the key sources, including the National Archives and the many online sites that researchers can turn to. It also covers records of casualties, munitions workers, conscientious objectors and service personnel from the British Dominions. Popular television programmes highlight the satisfaction that can be gained from investigating the history of houses, and there is always plenty of interest in the subject, with archives becoming ever more accessible with access to the internet. As the subject covers a broad field, the authors have set out to include advice on those aspects that usually apply to a project and others that will be of particular use for beginners. The reader is guided through every stage of research, from the first exploration of the archives to the completion of the task. Suggestions are also included on how to present the findings - a house history makes a very attractive gift. The authors describe how to deduce the age of a property (it is very seldom directly recorded when a house was built)

and characteristics of research on particular types of property – such as cottages, manor houses, inns, mills, former church properties, and farms – are discussed. In one example, research demonstrated that a farm was likely to have been a Domesday manor – a fascinating discovery achieved using records accessible to any beginner.

Praise for the 1st Edition "Easy to read yet filled with facts and information, this is a solid reference guide with everything for the beginner – and perhaps something for the more experienced too." –Family History Monthly "There is a lot of good advice in this book for those starting out." –Ancestors Navigate your way through your family's past Interested in family history? Keen to discover who your ancestors really were? Want to find out more from the comfort of your own home? If so, this book is for you. Walking you through the process of researching, organising and presenting your family tree online, this expert guide makes it simple. So what are you waiting for? Get plugged in and start tracking down your ancestors today! Lay the groundwork – take the first steps on your genealogical journey and start searching for evidence Find out about your ancestors – discover who your predecessors were and where they came from Get to grips with research tools – find the best online and offline archives and dig deeper into your family's past Present your results effectively – compile your findings into a family tree and create a place to host your material online Open the book and find: What clues you can get from photos, letters, diaries and your relatives The best genealogy websites in the UK and around the world How to get the most out of archives and documents Techniques for creating family history charts on your computer The advantages of coordinating your hunt with other researchers Ways to share research online Tips and tricks for building a family history web page Learn to: Get the most out of genealogy websites and resources Store and organise information on your computer Create your family tree and host it online

This comprehensive and fascinating guide from genealogist and historian Celia Heritage will prove indispensable for both local and family historians. A wide-ranging examination of historical and archaeological findings means that the book will also appeal to anyone with an interest in death and burial. Celia throws light on changing social attitudes to death and burial from pre-historic times to the modern day, investigates the origins and evolution of cemeteries and graveyards, and discusses the many different types of graves and memorials as well as looking at how memorial designs have changed. One chapter takes an in-depth look at the origins of the parish churchyard, while another looks at graveyards associated with nonconformist churches and institutions, including workhouses, asylums, hospitals and gaols. Celia details a wide range of online and offline sources that will help locate burials and memorials, also offering vital advice regarding good research practice. There is plenty of detail about less well-known genealogy sources such as records relating to re-interment, un-

dertakers[] and stonemasons[] records, together with better known sources such as burial registers and memorial inscriptions. Throughout, there is a wide range of hands-on case studies which bring the subject to life and put it right into the hands of the researcher. This is far more than just genealogy, and Celia portrays this fascinating subject from the view of both historian and archaeologist.

This book is innovative. A plethora of genealogy books primarily assume that family history research is by adults, for adults, marking family history as an 'adults only' sphere of life. This book establishes a new dimension in family history research. It is written in the belief that engaging in family history is a venture for all of the present-day family, regardless of age and, sometimes, because of age. To assist those of all ages who venture into this wider domain of family history the book is laden with practical examples. The author has an outstanding educational background with marked national success at all levels, from sole-teacher of a rural school to professorship achievements. At each level he has been noted nationally. His qualifications reflect this lasting commitment to education with imagination and an abiding belief in the potential of families and their children. He is an acknowledged international expert in teams and team leadership. The subject of his Doctor of Philosophy thesis was in this field and his Master of Philosophy thesis, 'The Singing Word', was an experiential development of children's creative writing. He is a lifelong genealogist. This book, assuredly, has new material for families, educators and children. It leads from their research of the family's yesterdays to depictions of the family's contemporary setting. It then leads children and adults into factual and creative portrayals of their present lives which will be handed on to future generations as informative elements of past and present family history.

In this, the fully updated second edition of his best-selling guide to researching Irish history using the internet, Chris Paton shows the extraordinary variety of sources that can now be accessed online. Although Ireland has lost many records that would have been of great interest to family historians, he demonstrates that a great deal of information survived and is now easily available to the researcher. Thanks to the pioneering efforts of the Public Record Office of Northern Ireland, the National Archives of Ireland, organizations such as FindmyPast Ireland, Ancestry.co.uk and RootsIreland and the volunteer genealogical community, an ever-increasing range of Ireland's historical resources are accessible from afar. As well as exploring the various categories of records that the family historian can turn to, Chris Paton illustrates their use with fascinating case studies. He fully explores the online records available from both the north and the south from the earliest times to the present day. Many overseas collections are also included, and he looks at social networking in an Irish context where many exciting projects are currently underway. His book is an essential introduction and source of reference for anyone who is keen to trace their Irish roots.
