This book develops and expands on theories that aim at explaining the root causes of ethnic and racial conflicts. The aim is to shift focus from research, policies and strategies based on tackling the effects of ethnic and racial conflicts, which have so far been ineffective as evidenced by the increase in ethnic conflicts, to more fundamental ideas, models and strategies. Contents extend across many disciplines including evolution, biology, religion, communication, mythology and even introspec-

tive perspectives. Drawn from around the world, contributors to the book are respected and experienced award winning authors, scholars and thinkers with deep understanding of their special fields of contribution. The book was inspired by the conditions in Kenya, where ethnic violence flared up with terrifying consequences following a disputed election in 2008. Although the conflict was resolved by the intervention of the international community, Kenyans - like many other Africans - continue to live in fear of ethnic conflicts break-

ing out with more disastrous consequences. The book will be useful to policy makers, NGOs and others involved in promoting peace. It will also be useful in guiding research and as a text book in universities and colleges.

he undertakes an even greater challenge: to explain how consciousness can lead the way to total freedom and perfect health. Unconditional Love brings together disciplines ranging from modern physics and neuroscience to the ancient traditions of Indian wisdom to show how our perceptions create our reality for good or ill--and how the outside world can be shaped by altering the world within. In a book filled with hope and inspiration, Dr. Chopra offers compelling proof of the power of consciousness and a daring new vision of our own unlimited potential.

A Times News Poll taken in 2005 says that only 13 percent of the population has lived the best possible life they could have - and author Jule Gaige has something to say to the 87 percent who do not. In her book, *I Gave Up My Life to Find IT*, Gaige shares

her journey to wholeness and her realization of her true potential for abundance, harmony, peace, and joy. Written for anyone that commits to overcoming illness, relationship discord, discontent, addiction or lack/financial unrest, *I Gave Up My Life to Find IT* expresses a greater life purpose. What makes this book different than others in the genre is that Gaige gently guides the reader through the process to repair the breaks caused by mind. Resisting one's true potential means losing the perspective of how vast and significant our true power is. By accepting limitations in mind, we learn to forget our infinite capacity. Gaige's book is a push back for each of us to "walk our talk."

Is it possible for a woman to be empowered and be happy? Inspired to Greatness: A Feminine Approach to Healing the World explores the question from a research perspective, utilizing the method of narrative analysis to examine women's one-on-one interviews. What makes this book special is the focus on the narrative voice of the women participants, which differentiates it from previous explorations and research. Our participants are among those Western women who are a part of the vanguards

who infiltrated the male dominated workforce and advanced toward significant professional empowerment. The findings suggest that a fear-based survival mode is keeping women, who outwardly seem empowered, from an inner feeling of empowerment and thus from happiness. The participants spoke of being called to greater fulfillment in their lives and recognized that conscious active responsibility would be necessary to satisfy those needs, though in many cases it remained unclear whether they would decide to act upon the realization or not. It is of great importance that we pay attention to such women's interpretation of their experiences. Society needs to attend to the findings we will explore within this book. These results are critical to psychological health and reflect deeply on how to help women find the courage to move forward. Because a healthy society relies on women rising, owning their experience, balancing their priorities, and having access to steps for health, it is clear that women's emotional, mental, physical, and spiritual health would be improved through access to specific programs that will promote unconditional love, integration, and conscious aware-

ness designed to access the individual's inner sage and as yet unrealized potentialities. Tracy Cooper is a Ph.D. in Clinical Psychology, specializing in integrative therapy and personal empowerment. At the University of California, Berkeley she was a psychotherapist within the Psychological Services department. Presently, she is a psychotherapist offering comprehensive care to patients with chronic medical conditions and serious mental illness. As a community activist, she is involved with several non-profit organizations. She is the founder of The Uloma Foundation, she serves as a board member for Arts for All, and manages a mental health program at Interfaith Community Services. Tracy Cooper is an academic and literary author. She contributed to the book *What Women Want: A Book for Men* and she is the author of the children's book series *Sophie Starchild*. *Infinite Reach: Spirituality in a Scientific World* connects and integrates the great spiritual insights with science and mathematics for the increasing numbers of Americans who consider themselves spiritual but not religious, or spiritual and religious, or "none of the above," and who no longer find traditional religious doctrines and insti-

tutions credible or matching their experience. In nontechnical language it precisely and clearly traces how current brain-mind research informs and enhances inner spiritual and religious experience, and how scientific cosmology confirms spiritual intuitions. From hunting-gathering prehistory, through city-states, empires, and the great religions, scientific methods advance exponentially faster into the future, while the great spiritual insights have never been surpassed, though often ignored or denied. But scientific knowing and spiritual knowing share infinite reach. Brain-mind research contributes to understanding and living meditation and spiritual practices in silence, ritual, and vision. Modern physics and mathematics demonstrate how humans observe and participate in the actual evolution of the universe. Fractals in chaos theory are spiritual images of ultimate reality. In creating, loving, and undifferentiated presence we find our own unique voice in the mystery of ultimate reality, touching down here and now in the specifics of this present moment.

Making sense of the world around us and understanding what we are is a burning desire every human being experiences and

this book is a comprehensive response to this urge. In this work, the nature of the Universe is examined from the day it originated and human nature is analyzed from the day Homo sapiens evolved from the hominids to the present. Along the way, the very enigmatic questions of origins of life, love, sex and God are explained with the backing of well-researched and documented scientific truths. The vast knowledge the world has gained through the ages on evolution, anthropology, archaeology, geology, history, sociology and all relevant scientific disciplines has been harnessed. Great care has been taken to present these complex issues in the most simple and clear language so that everybody understands. Science is basically a study of nature. Any person who tries to understand nature in depth gets dazed by the wonders that unfold before him. The beauty, harmony, unity and the unbelievable manifestations in which the universe presents itself go beyond any human imagination. At this point, anyone becomes spiritual. There is no quarrel between the spiritualists and scientists at this deepest level. There is only unity and harmony. This work is for those who want to understand

this world, realize what they are and enjoy the bliss and peace such awareness brings.

On January 29, 2001, President George W. Bush signed an executive order creating the White House Office of Faith-Based and Community Initiatives. This action marked a key step toward institutionalizing an idea that emerged in the mid-1990s under the Clinton administration--the transfer of some social programs from government control to religious organizations. However, despite an increasingly vocal, ideologically charged national debate--a debate centered on such questions as: What are these organizations doing? How well are they doing it? Should they be supported with tax dollars?--solid answers have been few. In *Saving America?* Robert Wuthnow provides a wealth of up-to-date information whose absence, until now, has hindered the pursuit of answers. Assembling and analyzing new evidence from research he and others have conducted, he reveals what social support faith-based agencies

are capable of providing. Among the many questions he addresses: Are congregations effective vehicles for providing broad-based social programs, or are they best at supporting their own members? How many local congregations have formal programs to assist needy families? How much money do such programs represent? How many specialized faith-based service agencies are there, and which are most effective? Are religious organizations promoting trust, love, and compassion? The answers that emerge demonstrate that American religion is helping needy families and that it is, more broadly, fostering civil society. Yet religion alone cannot save America from the broad problems it faces in providing social services to those who need them most. Elegantly written, *Saving America?* represents an authoritative and even-handed benchmark of information for the current--and the coming--debate.

While many books strive to stimulate thinking through provocative anecdotes and theories, *Why Are We Created?* takes a different path. It begins with a question and continues with a multitude of questions like these: •What is the importance of recognizing the presence of the sacred

within us and around us? •How can individuals create a purposeful and fruitful way of life? •How does happiness relate to one's purpose? The intent of these questions is to encourage thoughtfulness, observation, and research that enlarges understanding while offering a sense of direction. The goal is to help individuals live a more useful and happy life. Sir John and Reverend Dunlap use the questions to help readers explore the role of humility as a key to knowledge and progress. They look at the creative power of purposeful thinking and ask how life might be changed if we refuse to dwell on any thought we would not want objectified in our life. They pose questions related to consciously directing one's life. Helping to shed light on the possible connection between spiritual principles and human concepts is commentary from a wide range of sources: the scriptures, Mother Teresa, Albert Einstein, Edward O. Wilson, Emanuel Swedenborg, Emmet Fox, A. H. Maslow, Sir Isaac Newton, Dr. Albert Schweitzer, and Archbishop Desmond Tutu, among many others. Author Information

Their makeshift salvation is doomed, however, since the same clashing forces - anxiety versus compassion, oppression versus freedom, and self-interest versus the common good - create upheaval in the larger arena of relationships, on the city level and beyond. As a result, an unlikely alliance forms between the seaside bohemians and some of the brightest students in their neighborhood. From their uncommon insights and authentic mission, the folks of Santa Maya discover an immense power -

one that enables them to create a city they can truly call their own, where "we the people" are truly in charge.

The universe supports you and is offering to help you—in very concrete ways. Best-selling self-help author Dave Richo shows how to recognize this help that's all around us—Grace—and how to access it. Grace is the term Dave Richo uses to describe any of those events in which help comes your way unexpectedly: when the solution to a perplexing problem just suddenly pops into your head; when you suddenly find the strength to rise to an occasion you didn't think you could endure; when the next phase in your spiritual path becomes plain as day. Moments of Grace usually come as surprises, but, Richo shows, we can learn to expect them—for Grace is a resource any of us can access. He begins by showing where to look to recognize the Grace that surrounds you: in na-

ture, in religion/spirituality, in relationships, in yourself. He then provides practical exercises for learning how to manifest Grace in your life--to recognize and claim the help the universe is constantly offering you.

The first half of the book explains that the treatment is a brutal regime, but there are light-hearted moments. In the second half of the book, the author describes what he learned about cancer such as what cancer is, the prevalence of cancer, the role of the pharmaceutical industry, and how cancer is treated in the West as compared to complementary therapies in the East. He asks 'Why me?' and discovers physical, mental and spiritual reasons to explain why cancer decided to pay him a visit. The concept of miraculous or spontaneous remissions appears to be largely ignored by the medical profession but is a major interest to the author, along with other healing methods outside the Western orthodox model. The book finishes with a message of hope through the development of a 'Simple Man's Cancer Model' which provides a framework for healing to take place based on personal experience, studying spontaneous healings, a large dose of common

sense and a sprinkling of anecdotal evidence. The author suggests that certain changes need to take place within an individual for healing to occur. How the person makes those changes is a personal choice, as there are numerous healers, books, workshops and seminars where such information and healing can be obtained. The final chapter suggests that 'Integrated Healthcare' could be the next step forward and invites the reader to imagine and, more importantly, help to create a world without cancer.

To define and explore contemporary philosophical critiques of Christian belief is the purpose of this book, which arises out of a conference held at Princeton Theological Seminary. In a frank and extensive confrontation, outstanding philosophers and theologians met to search for greater clarity on some important issues in the philosophy of religion. The book contains the papers written for the conference, the prepared criticism, and excerpts from the debates. The discussions revolved around the experiential grounds of religious belief; the question as to what conclusions may legitimately be drawn from religious experience; the "emptiness" or otherwise of

Christian belief and ethic in the modern world; the Freudian explanation of faith; and the Barthian defense of Christianity.
