## UB5U0F - LEWIS BROCK

---

Part poem, part silent stage with luminous light-box illustrations, this innovative picture book puts autumn on display to beautifully capture the art and science of season change. 15,000 first printing.

Read Along or Enhanced eBook: Young children are naturally curious about the world around them. Tell Me Why Leaves Change Color offers answers to their most compelling questions about the changing seasons. Age-appropriate explanations and appealing photos encourage readers to continue their quest for knowledge. Additional text features and search tools, including a glossary and an index, help students locate information and learn new words.

Garden Myths examines over 120 horticultural urban legends. Turning wisdom on its head, Robert Pavlis dives deep into traditional garden advice and debunks the myths and misconceptions that abound. He asks critical questions and

uses science-based information to understand plants and their environment. Armed with the truth, Robert then turns this knowledge into easy-to-follow advice. - Is fall the best time to clean the garden? - Do bloom boosters work? - Will citronella plants reduce mosquitoes in the garden? - Do pine needles acidify soil? - Should tomatoes be suckered? - Should trees be staked at planting time? - Can burlap keep your trees warm in winter? - Will a pebble tray increase humidity for houseplants? "Garden Myths is a must-read for anyone who wants to use environmentally sound practices. This fascinating and informative book will help you understand plants better, reduce unnecessary work, convince you to buy fewer products and help you enjoy gardening more."

What Happens To Leaves in Fall? Read Along or Enhanced eBook Triangle Interactive, Inc.

Illustrations and rhyming text celebrate autumn, with its falling leaves, crisp

mornings, and gusty breezes.

**#1 NEW YORK TIMES BESTSELLER • ONE OF TIME MAGAZINE'S 100 BEST YA BOOKS OF ALL TIME** The extraordinary, beloved novel about the ability of books to feed the soul even in the darkest of times. When Death has a story to tell, you listen. It is 1939. Nazi Germany. The country is holding its breath. Death has never been busier, and will become busier still. Liesel Meminger is a foster girl living outside of Munich, who scratches out a meager existence for herself by stealing when she encounters something she can't resist—books. With the help of her accordion-playing foster father, she learns to read and shares her stolen books with her neighbors during bombing raids as well as with the Jewish man hidden in her basement. In superbly crafted writing that burns with intensity, award-winning author Markus Zusak, author of *I Am the Messenger*, has given us one of the most enduring stories of our time. “The kind of book that can be life-changing.” —The New York Times “Deserves a place on the same shelf with *The Diary of a Young Girl* by Anne Frank.” —USA Today **DON'T MISS BRIDGE OF CLAY, MARKUS ZUSAK'S FIRST NOVEL SINCE THE BOOK THIEF.**

A totalitarian regime has ordered all books to be destroyed, but one of the book burners suddenly realizes their merit.

*The Study of Plants in a Whole New Light* “Matt Candeias succeeds in evoking the wonder of plants with wit and wisdom.” —James T. Costa, PhD, executive director, Highlands Biological Station and author of *Darwin's Backyard* **#1 New Release in Nature & Ecology, Plants, Botany, Horticulture, Trees, Biological Sciences, and Nature Writing & Essays** In his debut book, internationally-recognized blogger and podcaster Matt Can-

deias celebrates the nature of plants and the extraordinary world of plant organisms. A botanist's defense. Since his early days of plant restoration, this amateur plant scientist has been enchanted with flora and the greater environmental ecology of the planet. Now, he looks at the study of plants through the lens of his ever-growing houseplant collection. Using gardening, houseplants, and examples of plants around you, *In Defense of Plants* changes your relationship with the world from the comfort of your windowsill. The ruthless, horny, and wonderful nature of plants. Understand how plants evolve and live on Earth with a never-before-seen look into their daily drama. Inside, Candeias explores the incredible ways plants live, fight, have sex, and conquer new territory. Whether a blossoming botanist or a professional plant scientist, *In Defense of Plants* is for anyone who sees plants as more than just static backdrops to more charismatic life forms. In this easily accessible introduction to the incredible world of plants, you'll find:

- Fantastic botanical histories and plant symbolism
- Passionate stories of flora diversity and scientific names of plant organisms
- Personal tales of plantsman discovery through the study of plants

If you enjoyed books like *The Botany of Desire*, *What a Plant Knows*, or *The Soul of an Octopus*, then you'll love *In Defense of Plants*.

It's fall! The leaves are changing color. Learn about the magical process of how leaves change their color with this *Let's-Read-and-Find-Out* picture book. This nonfiction picture book is an excellent choice to share during homeschooling, in particular for children ages 4 to 6. It's a fun way to learn to read and as a supplement for activity books for children. Graceful text and simple, fun diagrams

help introduce concepts like photosynthesis and the different types of leaves. This book also includes simple activities to do with leaves, like leaf rubbings. Both the text and art were expert-vetted for accuracy. This is a Level 2 Let's-Read-and-Find-Out, which means the book explores more challenging concepts perfect for children in the primary grades and supports the Common Core Learning Standards and Next Generation Science Standards. Let's-Read-and-Find-Out is the winner of the American Association for the Advancement of Science/Subaru Science Books & Films Prize for Outstanding Science Series.

**NEW YORK TIMES BEST SELLER •** From the world's leading forest ecologist who forever changed how people view trees and their connections to one another and to other living things in the forest—a moving, deeply personal journey of discovery Suzanne Simard is a pioneer on the frontier of plant communication and intelligence; she's been compared to Rachel Carson, hailed as a scientist who conveys complex, technical ideas in a way that is dazzling and profound. Her work has influenced filmmakers (the Tree of Souls of James Cameron's *Avatar*) and her TED talks have been viewed by more than 10 million people worldwide. Now, in her first book, Simard brings us into her world, the intimate world of the trees, in which she brilliantly illuminates the fascinating and vital truths—that trees are not simply the source of timber or pulp, but are a complicated, interdependent circle of life; that forests are social, cooperative creatures connected through underground networks by which trees communicate their vitality and vulnerabilities with communal lives not that different from our own. Simard writes—in inspiring, illuminating, and accessible ways—how trees, living side by

side for hundreds of years, have evolved, how they perceive one another, learn and adapt their behaviors, recognize neighbors, and remember the past; how they have agency about the future; elicit warnings and mount defenses, compete and cooperate with one another with sophistication, characteristics ascribed to human intelligence, traits that are the essence of civil societies—and at the center of it all, the Mother Trees: the mysterious, powerful forces that connect and sustain the others that surround them. Simard writes of her own life, born and raised into a logging world in the rainforests of British Columbia, of her days as a child spent cataloging the trees from the forest and how she came to love and respect them—embarking on a journey of discovery, and struggle. And as she writes of her scientific quest, she writes of her own journey—of love and loss, of observation and change, of risk and reward, making us understand how deeply human scientific inquiry exists beyond data and technology, that it is about understanding who we are and our place in the world, and, in writing of her own life, we come to see the true connectedness of the Mother Tree that nurtures the forest in the profound ways that families and human societies do, and how these inseparable bonds enable all our survival.

A family relocates to a small house on Ash Tree Lane and discovers that the inside of their new home seems to be without boundaries

Fun text and charming illustrations show how leaves grow and change throughout the seasons. Critical thinking and comprehension questions help readers understand the text and engage with the changing seasons.

Illustrations and rhyming text celebrate autumn, with its falling leaves, crisp mornings, and gusty breezes. Story Starters and Science Notebooking Developing Student Thinking Through Literacy and Inquiry Libraries Un-

limited Story Starters and Science Notebooking: Developing Student Thinking Through Literacy and Inquiry is designed to provide a meaningful, comfortable framework in which teachers and parents can encourage elementary children to explore scientific ideas in an inquiry-oriented format. The basis for each scientific concept presented in Story Starters and Science Notebooking is embedded in a story appropriate for elementary-aged children. The activity that follows each narrative encourages learners to observe, compare, gather data, organize or classify, and draw conclusions about the problem posed from the story. Because current scientific knowledge and understanding guide scientific investigations, background information in each chapter provides teachers with a synopsis of the scientific concept involved in the activity for that story. The story starters present a framework for inquiry, which eliminates the free-wheeling, uncontrolled, and unstructured view some teachers have of inquiry. These are either original stories or familiar children's stories that ask learners to investigate a possible scientific explanation for a problem or scenario. Learners then communicate their findings in an oral, written, pictorial, or technological form back to a lead character from the story. Extension activities provide an opportunity for learners to compare their answers with what scientists already know about the world and also motivate them to frame new questions. Grades 3-6 Introduction Notebooking activities Problems to solve Background information for teachers 60 illustrations and halftones 24 figures Appendix Leaves in Fall Bullfrog Books In Leaves in Fall, young readers will discover the changes leaves go through during fall. Vibrant, full-color photos and carefully leveled text will en-

gage early readers as they learn why leaves drop from trees in fall. A labeled diagram helps readers identify different types of leaves, while a picture glossary reinforces new vocabulary. Children can learn more about leaves online using our safe search engine that provides relevant, age-appropriate websites. Leaves in Fall also features reading tips for teachers and parents, a table of contents, and an index. Leaves in Fall is part of Jump!'s What Happens in Fall? series. The Book Thief Knopf Books for Young Readers #1 NEW YORK TIMES BESTSELLER • ONE OF TIME MAGAZINE'S 100 BEST YA BOOKS OF ALL TIME The extraordinary, beloved novel about the ability of books to feed the soul even in the darkest of times. Primer for Every Season Timber Press "A Way to Garden prods us toward that ineffable place where we feel we belong; it's a guide to living both in and out of the garden." —The New York Times Book Review For Margaret Roach, gardening is more than a hobby, it's a calling. Her unique approach, which she calls "horticultural how-to and woo-woo," is a blend of vital information you need to memorize and intuitive steps you must simply feel and surrender to. In *A Way to Garden*, Roach imparts decades of garden wisdom on seasonal gardening, ornamental plants, vegetable gardening, design, gardening for wildlife, organic practices, and much more. She also challenges gardeners to think beyond their garden borders and to consider the ways gardening can enrich the world. Brimming with beautiful photographs of Roach's own garden, *A Way to Garden* is practical, inspiring, and a must-have for every passionate gardener. *Fall Leaves* Houghton Mifflin Harcourt Part poem, part silent stage with luminous light-box illustrations, this innovative picture book puts autumn on display to beautifully capture the art and science of season change. 15,000 first printing. *Building Natural Ponds* Create a Clean, Algae-free Pond without Pumps, Filters, or Chemicals New Society Publishers Build a natural pond for wildlife, beauty, and quiet contemplation Typical backyard ponds are a complicated mess of pipes, pumps, filters, and nasty chemicals designed to adjust pH and keep algae at bay. Hardly the bucolic, natural ecosystem beloved by dragonflies, frogs, and songbirds. The antidote is a natural pond, free of hassle, cost, and complexity and designed as a fully functional ecosystem, ideal for biodiversity, swimming, irrigation, and quiet contemplation. *Building Natural Ponds* is the first step-by-step guide to designing

and building natural ponds that use no pumps, filters, chemicals, or electricity and mimic native ponds in both aesthetics and functionality. Highly illustrated with how-to drawings and photographs, coverage includes: Understanding pond ecosystems and natural algae control Planning, design, siting, and pond aesthetics Step-by-step guidance for construction, plants and fish, and maintenance and trouble shooting Scaling up to large ponds, pools, bogs, and rain gardens. Whether you're a backyard gardener looking to add a small serene natural water feature or a homesteader with visions of a large pond for fish, swimming, and irrigation, *Building Natural Ponds* is the complete guide to building ponds in tune with nature, where plants, insects, and amphibians thrive in blissful serenity. Robert Pavlis, a Master Gardener with over 40 years of gardening experience, is owner and developer of Aspen Grove Gardens, a six-acre botanical garden featuring over 2,500 varieties of plants. A well-respected speaker and teacher, Robert has published articles in *Mother Earth News*, *Ontario Gardening* magazine, the widely read blog *Garden-Myths.com*, which explodes common gardening myths and gardening information site *GardenFundamentals.com*. *Falling Leaves: The True Story of an Unwanted Chinese Daughter* Crown Publishing Group (NY) The daughter of a wealthy Hong Kong businessman describes her very difficult childhood and the psychological abuse she suffered at the hands of her stepmother *Leaves in the Wind* A Bouquet of Short Stories on Relationships Education Publishing Our happiness in life often rests on the relationships we nurture with people and things around us. Sometimes, these relationships uplift us and sometimes they break us. This is a collection of twelve short sto-

ries based on real experiences of simple people who are often neglected or lost in the intricate web of life. The stories are an attempt to reflect their emotions, dilemmas, loss, pain and personal struggles. The characters represent the common man or woman ensconced in their mundane lives, yet who have their own stories to tell. Harihar, in *Family Matters*, is a failure as a father, unable to guide his own son, but he gets a second chance to redeem himself when he fathers an illegitimate child and decides to take onus of his family. Anita, a bored housewife, longs for love and passion and is unable to break away from the man she secretly loves in spite of realizing that she is breaking the sacred bonds of marriage. Sai, a young boy, displays aggressive behavior because of the cruel way his stepmother treats him. Swami and Gowri is a childless couple who have nothing to fall back on when their meagre property is snatched from them. They are the casualty of a fast developing IT city. Ilaa is a young Marathi girl who desires to obtain an education but is forced to get married. All the other characters have similar tales to share. *Leaves* A complicated topic is made easier with this title introducing leaves and explaining their anatomy and how they make food for plants. Labeled diagrams and photographs and a glossary will make learning the important jobs of leaves even simpler! *Finding the Mother Tree* Discovering the Wisdom of the Forest Knopf NEW YORK TIMES BEST SELLER • From the world's leading forest ecologist who forever changed how people view trees and their connections to one another and to other living things in the forest—a moving, deeply personal journey of discovery Suzanne Simard is a pioneer on the frontier of plant communication and intelligence; she's been com-

pared to Rachel Carson, hailed as a scientist who conveys complex, technical ideas in a way that is dazzling and profound. Her work has influenced filmmakers (the Tree of Souls of James Cameron's *Avatar*) and her TED talks have been viewed by more than 10 million people worldwide. Now, in her first book, Simard brings us into her world, the intimate world of the trees, in which she brilliantly illuminates the fascinating and vital truths--that trees are not simply the source of timber or pulp, but are a complicated, interdependent circle of life; that forests are social, cooperative creatures connected through underground networks by which trees communicate their vitality and vulnerabilities with communal lives not that different from our own. Simard writes--in inspiring, illuminating, and accessible ways--how trees, living side by side for hundreds of years, have evolved, how they perceive one another, learn and adapt their behaviors, recognize neighbors, and remember the past; how they have agency about the future; elicit warnings and mount defenses, compete and cooperate with one another with sophistication, characteristics ascribed to human intelligence, traits that are the essence of civil societies--and at the center of it all, the Mother Trees: the mysterious, powerful forces that connect and sustain the others that surround them. Simard writes of her own life, born and raised into a logging world in the rainforests of British Columbia, of her days as a child spent cataloging the trees from the forest and how she came to love and respect them--embarking on a journey of discovery, and struggle. And as she writes of her scientific quest, she writes of her own journey--of love and loss, of observation and change, of risk and reward, making us understand how deeply

human scientific inquiry exists beyond data and technology, that it is about understanding who we are and our place in the world, and, in writing of her own life, we come to see the true connectedness of the Mother Tree that nurtures the forest in the profound ways that families and human societies do, and how these inseparable bonds enable all our survival. *Leaves of Prayer*—Scriptural Passages and Catholic Reflections for Those Who Enjoy Nature

iUniverse

Our experiences of life and the earth lead us to ponder nature, life, and the Creator. Within these *Leaves of Prayer* are arranged reflections, selected Biblical passages, and quotations upon the mystery of God's creation for prayer, study, and meditation. As Catholics, we are called to appreciate both the natural world and human life. The twenty chapters offer prayerful, optimistic meditations and images for reflecting upon God's creation—the universe, seasons, rainbows and auroras, the earth, mountains and hills, rock, wind, water, ice and snow, lightning and fire, flora, fauna, wings and angels, the human family, stewardship, suffering, death and resurrection. Pope John Paul II, Catholic saints, and scholars of various faiths are quoted upon the mystery of God's creation, our appreciation of nature, and our roles as servants of one another and caretakers of life and the environment. Twenty-five images are arranged throughout including line drawings of Christian symbols and photos of God's earth and His creatures. *Leaves of Prayer* provides a simple

and faithful guide to a closer relationship with the Creator and to a greater awareness of our role to protect life as helpful servants of our brothers and sisters, and wise and holy managers of the earth and its resources. "God looked at everything he had made, and he found it very good." —Genesis 1: 31

Fall Leaves Change Colors

Scholastic Reference

Simple text and illustrations explain how and why leaves change colors as autumn approaches.

The Romance of Plant Life

Interesting Descriptions of the Strange and Curious in the Plant World

Good Press

"The Romance of Plant Life" by G. F. Scott Elliot. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten—or yet undiscovered gems—of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format.

Chats with the children, an illustrated manual of object lessons, ed. from the work of F. Wiedermann by H.P. and W.L. Rooper

The Child's Book of Nature

Three Parts in One

After the Leaves Fall

Tyndale House Publishers, Inc.

Julia DeSmit can't wait for her life to begin. After her mother leaves when Julia is nine years old, she's raised by an unassuming, gentle father and a saintly, matriarchal grandmother until her father dies just as Julia is becoming a young adult. On the cusp of womanhood, Julia feels jaded by her circumstances and longs for a new identity. College seems like the perfect place to start over. But when Julia makes a mistake that will change her life forever, she returns to her grandmother's farm, defeat-

ed and convinced of her own worthlessness. Only through the gentle prodding of her loving grandmother does Julia begin to accept the imprint her childhood has left on her life and look for hope in a loving God who longs to make all things new. The Book of Wonders Gives Plain and Simple Answers to the Thousands of Everyday Questions that are Asked and which All Should be Able To, But Cannot Answer : Fully Illustrated with Hundreds of Educational Pictures which Stimulate the Mind and Give a Bird's Eye View of the Wonders of Nature and the Wonders Produced by Man Leaves Fall Carson-Dellosa Publishing Leaves help a tree. Leaves make food for a tree. Find out more about how leaves are a tree's friend. Paired to the fiction title Bad Rex! New York Teachers' Monographs A Whisper of Leaves Close-Up Books When ESL teacher Riko finds an old journal buried in the forests beneath Mt Fuji, a malevolent, untraceable force begins to threaten her at every turn. But is it all in her head? The more she studies the journal for answers, the more questions she uncovers. Worse, no-one takes her fears seriously and her best lead appears to be a belligerent old man, whose only care in the world is raking leaves deep in the forest. With her grip on reality shaken and friendships strained to breaking point, Riko must discover the truth about the journal in order to put ghosts of the past to rest before she loses everything. A mysterious ghost-story full of suspense! Leaves and Flowers Discover! Plants Milliken Publishing Company The activities in this book explain elementary concepts in the study of plants, including leaves and photosynthesis, flowers, pollination and fertilization, and more! General background information, suggested activities, questions for discussion, and answers are included. Leaves Penguin A curi-

ous bear observes how leaves change throughout the seasons. On board pages.

What do leaves do? Students will learn how leaves use air, water, and sunlight to make food for the plant.

Explains how leaves change color and fall off during autumn.

Our happiness in life often rests on the relationships we nurture with people and things around us. Sometimes, these relationships uplift us and sometimes they break us. This is a collection of twelve short stories based on real experiences

of simple people who are often neglected or lost in the intricate web of life. The stories are an attempt to reflect their emotions, dilemmas, loss, pain and personal struggles. The characters represent the common man or woman ensconced in their mundane lives, yet who have their own stories to tell. Harihar, in Family Matters, is a failure as a father, unable to guide his own son, but he gets a second chance to redeem himself when he fathers an illegitimate child and decides to take onus of his family. Anita, a bored housewife, longs for love and passion and is unable to break away from the man she secretly loves in spite of realizing that she is breaking the sacred bonds of marriage. Sai, a young boy, displays aggressive behavior because of the cruel way his stepmother treats him. Swami and Gowri is a childless couple who have nothing to fall back on when their meagre property is snatched from them. They are the casualty of a fast developing IT city. Ilaa is a young Marathi girl who desires to obtain an education but is forced to get married. All the other characters have similar tales to share.

Build a natural pond for wildlife, beauty, and quiet contemplation Typical backyard ponds are a complicated mess of pipes, pumps, filters, and nasty chemicals designed to adjust pH and keep algae at bay. Building Natural Ponds is the first step-by-step guide to designing and building natural ponds that use no pumps, filters, chemicals, or electricity

and mimic native ponds in both aesthetics and functionality. Highly illustrated with how-to drawings and photographs, coverage includes: Understanding pond ecosystems and natural algae control Planning, design, siting, and pond aesthetics Step-by-step guidance for construction, plants and fish, and maintenance and trouble shooting Scaling up to large ponds, pools, bogs, and rain gardens. Whether you're a backyard gardener looking to add a small serene natural water feature or a homesteader with visions of a large pond for fish, swimming, and irrigation, *Building Natural Ponds* is the complete guide to building ponds in tune with nature, where plants, insects, and amphibians thrive in blissful serenity. Robert Pavlis, a Master Gardener with over 40 years of gardening experience, is owner and developer of Aspen Grove Gardens, a six-acre botanical garden featuring over 2,500 varieties of plants. A well-respected speaker and teacher, Robert has published articles in *Mother Earth News*, Ontario Gardening magazine, the widely read blog *Garden-Myths.com*, which explodes common gardening myths and gardening information site *GardenFundamentals.com*.

Seasonal changes in nature are so familiar that we often fail to stop and contemplate: Hey, why is this happening? Falling leaves are one of the most noticeable changes in autumn to inquisitive young minds, and sometimes the most perplexing. This bright and cheerful book, which supports elementary science standards, describes what happens in trees to cause this curious occurrence. Strikingly colorful images of nature provide support to the significant science concepts that your young botanists will learn.

Julia DeSmit can't wait for her life to begin. After her mother leaves when Julia is

nine years old, she's raised by an unassuming, gentle father and a saintly, matriarchal grandmother until her father dies just as Julia is becoming a young adult. On the cusp of womanhood, Julia feels jaded by her circumstances and longs for a new identity. College seems like the perfect place to start over. But when Julia makes a mistake that will change her life forever, she returns to her grandmother's farm, defeated and convinced of her own worthlessness. Only through the gentle prodding of her loving grandmother does Julia begin to accept the imprint her childhood has left on her life and look for hope in a loving God who longs to make all things new.

A complicated topic is made easier with this title introducing leaves and explaining their anatomy and how they make food for plants. Labeled diagrams and photographs and a glossary will make learning the important jobs of leaves even simpler!

The daughter of a wealthy Hong Kong businessman describes her very difficult childhood and the psychological abuse she suffered at the hands of her step-mother

Simple text and illustrations explain how and why leaves change colors as autumn approaches.

A curious bear observes how leaves change throughout the seasons. On board pages.

"The Romance of Plant Life" by G. F. Scott Elliot. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten—or yet undiscovered gems—of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost

readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format.

Story Starters and Science Notebooking: Developing Student Thinking Through Literacy and Inquiry is designed to provide a meaningful, comfortable framework in which teachers and parents can encourage elementary children to explore scientific ideas in an inquiry-oriented format. The basis for each scientific concept presented in Story Starters and Science Notebooking is embedded in a story appropriate for elementary-aged children. The activity that follows each narrative encourages learners to observe, compare, gather data, organize or classify, and draw conclusions about the problem posed from the story. Because current scientific knowledge and understanding guide scientific investigations, background information in each chapter provides teachers with a synopsis of the scientific concept involved in the activity for that story. The story starters present a framework for inquiry, which eliminates the free-wheeling, uncontrolled, and unstructured view some teachers have of inquiry. These are either original stories or familiar children's stories that ask learners to investigate a possible scientific explanation for a problem or scenario. Learners then communicate their findings in an oral, written, pictorial, or technological form back to a lead character from the story. Extension activities provide an opportunity for learners to compare their answers with what scientists already know about the world and also motivate them to frame new questions. Grades 3-6 Introduction Notebooking activities Problems to solve Background information for teachers 60 illustrations and halftones 24 figures Appen-

dix

The activities in this book explain elementary concepts in the study of plants, including leaves and photosynthesis, flowers, pollination and fertilization, and more! General background information, suggested activities, questions for discussion, and answers are included.

Leaves help a tree. Leaves make food for a tree. Find out more about how leaves are a tree's friend. Paired to the fiction title Bad Rex!.

Provides a simple introduction to the scientific principles that explain why the leaves of some trees change color in the autumn and then fall from the trees.

"A Way to Garden prods us toward that ineffable place where we feel we belong; it's a guide to living both in and out of the garden." —The New York Times Book Review For Margaret Roach, gardening is more than a hobby, it's a calling. Her unique approach, which she calls "horticultural how-to and woo-woo," is a blend of vital information you need to memorize and intuitive steps you must simply feel and surrender to. In A Way to Garden, Roach imparts decades of garden wisdom on seasonal gardening, ornamental plants, vegetable gardening, design, gardening for wildlife, organic practices, and much more. She also challenges gardeners to think beyond their garden borders and to consider the ways gardening can enrich the world. Brimming with beautiful photographs of Roach's own garden, A Way to Garden is practical, inspiring, and a must-have for every passionate gardener.
