I picked up Wrong: Why Experts Keep Failing Us and How to Know When not to Trust Them by David Freedman on a whim. The book really offered very little that was new or particularly enlightening; it was more useful as a reminder of how even well-meaning and well-constructed research can go wrong as well the realities of publishing and the ways in which the need for new and compelling materials ...

So why, then, do we blindly follow experts? Freedman has an idea, which he elaborates on in his book Wrong: Why Experts Keep Failing Us — and How to Know When Not to Trust Them. Freedman talked to TIME about why we believe experts, how to find good advice and why we should trust him — even though he's kind of an expert.

David H. Freedman, author of "Wrong: Why Experts Keep Failing Us—and How to Know When Not to Trust Them," says most scientific and medical studies that you see or hear mentioned in news reports turn out to be incorrect, misleading or irrelevant to most people. Other commonly offered expert advice, on everything from investing to home repair, is equally suspect.
